

INSTITUTE CELL FOR COLLABORATIVE PROJECTS & CONSULTANCY

FOR COMPUTER SCIENCE AND INFORMATION TECHNOLOGY

From:

Department of Computer Science & Engineering,
Government College of Engineering, Aurangabad

Greetings from ICCPC!!

It gives us immense pleasure to inform you, that we have taken an initiative to promote industry oriented collaborative projects and research.

As computing is becoming the integral part of every government as well as private institution, we would like to offer our expertise and manpower in this regards.

In this era of competition and targets, the quantum of work is very high and so institutions, government as well as private, are a bit reluctant to conduct research; research that is based on several experiments, permutations & combinations. This research will eventually improve the effectiveness, which will result in setting new datum.

On the other hand talented and energetic Graduates and Post-Graduates from colleges lack in knowledge of what actually is required in the market. Idea is to bridge this gap.

With this vision we are offering consultancy in following areas:

- ❖ Research & analysis in your domain
- ❖ Networking
- ❖ Software engineering
- ❖ Data mining and Decision support system
- ❖ Image Processing
- ❖ Software testing & Validation
- ❖ Web application & Software development
- ❖ Technology consulting
