

GOVERNMENT COLLEGE OF ENGINEERING, CHHATRAPATI SAMBHAJINAGAR

**(An Autonomous Institute of Govt. of Maharashtra)
Railway Station Road, Osmanpura, Chhatrapati Sambhajnagar
Phone – (0240) 2366101, 2366111, Fax (0240) 2332835**

Curriculum for M. Tech. in Computer Science & Engineering (NEP Compliant)

(With Effect from Academic Year 2023-24)

Approved in XXV IIIth Academic Council
Dated: 25th Jun 2024

Vision of the Institute

- In pursuit of global competitiveness, the institute is committed to excel in engineering education and research with concern for environment and society.

Mission of the Institute

- Provide conducive environment for academic excellence in engineering education.
- Enhance research and development along with promotion to sponsored projects and industrial consultancy.
- Foster development of students by creating awareness for needs of society, sustainable development and human values.

Vision of Computer Science and Engineering department:

To develop cultured and technically competent computer professionals and scholars with sustained growth in employability, high impact research outcome and become genuine asset to industry and society

Mission Computer Science and Engineering department:

The mission of the Department of Computer Science and Engineering is to develop undergraduate and postgraduate students having professional accomplishment through-

1. Developing Creativity and Logical Reasoning amongst the learner
2. Updating curricula according to industry requirements and standards
3. Promote leadership quality, social accountability and ethics in disciplined environment, quality Education.
4. Creating environment conducive to research

Program Educational Objective(s)

After postgraduation, the Computer Science & Engineering postgraduates would be able to

PEO 1: Technical Expertise: Implement fundamental domain knowledge of core courses for developing effective computing solutions by incorporating creativity and logical reasoning.

PEO 2: Successful Career: Deliver professional services with updated technologies in computer science based career.

PEO 3: Soft Skills: Develop leadership skills and incorporate ethics, team work with effective communication & time management in the profession.

PEO 4: Life Long Learning: Conduct research among computing professionals as per market needs.

Program Outcome(s)

After Post graduation Students will be able to

PO1: An ability to independently carry out research investigation and development work to solve practical problems.

PO2: An ability to write and present a substantial technical report/document.

PO3: Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.

PO4: Design components or processes to solve complex engineering problems by conducting Experiments.

PO5: Utilize the techniques, skills and modern computer Engineering tools, Software and techniques necessary for Engineering practice.

Approved in XXV IIIth Academic Council
Dated: 25th Jun 2024

GENERAL COURSE STRUCTURE & THEME

A. Definition of Credit:

| | |
|--------------------------------|------------|
| 1 Hr. Lecture (L) per week | 1 Credit |
| 1 Hr. Tutorial (T) per week | 1 Credit |
| 1 Hr. Practical (P) per week | 0.5 Credit |
| 2 Hours Practical (P) per week | 1 Credit |

B. Range of Credits: M.Tech.in Computer Science & Engineering : The total number of credits proposed for the two-year full time M.Tech. in Computer Science & Engineering is kept as 82.

C. Semester wise Credit Distribution Structure for Two-Year Full-Time PG Program in Computer Science & Engineering :

| Semester | | I | II | III | IV | Total Credits |
|--|--|-----------|-----------|-----------|-----------|---------------|
| Programme Core Course (PCC) | Program Courses | 08 | 12 | - | - | 20 |
| Programme Elective Course (PEC) | | 08 | 06 | - | - | 14 |
| Open Elective (OE) Other than a particular program | Multidisciplinary Courses | - | 03 | 03 | - | 06 |
| Vocational and Skill Enhancement Course (VSEC) | Skill Courses | 02 | 02 | - | - | 04 |
| Ability Enhancement Course (AEC) | Humanities Social Science and Management (HSSM) | - | 03 | - | - | 03 |
| Entrepreneurship/Economics/ Management Courses | | - | - | 03 | - | 03 |
| Indian Knowledge system (IKS) | | | | 02 | | 02 |
| Research Methodology | Experiential Learning Courses | 04 | - | - | - | 04 |
| Project | | - | - | 10 | 16 | 26 |
| Co-curricular Courses (CC) | Liberal Learning Courses | - | - | - | - | Audit |
| Total Credits (Major) | | 22 | 26 | 18 | 16 | 82 |

D. Category-wise Courses

1. VOCATIONAL AND SKILL ENHANCEMENT COURSE (VSEC)

| S. No | Category | Course Title | Semester | Hours per week | | | Total Credits |
|----------------------|----------|-------------------|----------|----------------|----------|-----------|---------------|
| | | | | Lecture | Tutorial | Practical | |
| 1 | VSEC | Mini Project – I | I | 0 | 0 | 4 | 02 |
| 2 | VSEC | Mini Project – II | II | 0 | 0 | 4 | 02 |
| Total Credits | | | | | | | 04 |

Signature

2. HUMANITIES & SOCIAL SCIENCES COURSES [HSSM]

| S. No | Category | Course Title | Semester | Hours per week | | | Total Credits |
|---------------|---|------------------------------|----------|----------------|----------|-----------|---------------|
| | | | | Lecture | Tutorial | Practical | |
| 1 | Ability Enhancement Course (AEC) | Technical Communication | II | 3 | 0 | 0 | 03 |
| 2 | Entrepreneurship/Economics/Management Courses | Economics/Management Courses | III | 3 | 0 | 0 | 03 |
| Total Credits | | | | | | | 06 |

3. EXPERIENTIAL LEARNING COURSES (ELC)

| S. No | Category | Course Title | Semester | Hours per week | | | Total Credits |
|---------------|----------------------|----------------------|----------|----------------|----------|-----------|---------------|
| | | | | Lecture | Tutorial | Practical | |
| 1 | Research Methodology | Research Methodology | I | 4 | 0 | 0 | 04 |
| 2 | Project | Dissertation - I | III | 0 | 0 | 20 | 10 |
| 3 | Project | Dissertation - II | IV | 0 | 0 | 32 | 16 |
| Total Credits | | | | | | | 30 |

4. LIBERAL LEARNING COURSES (CO-CURRICULAR COURSES (CC))

| S. No | Category | Course Title | Semester | Hours per week | | | Total Credits |
|---------------|----------|--------------|----------|----------------|----------|-----------|---------------|
| | | | | Lecture | Tutorial | Practical | |
| 1 | CC | Yoga/Clubs | I | 0 | 0 | 2 | Audit |
| Total Credits | | | | | | | - |

5. OPEN ELECTIVE (OE) OTHER THAN A PARTICULAR PROGRAM

Two courses of 3 credits

Following courses are offered as Open Electives (OE) by Computer Science & Engineering Department

| S. No | Category | Course Title | Semester | Hours per week | | | Total Credits |
|---------------|----------|-----------------------------------|----------|----------------|----------|-----------|---------------|
| | | | | Lecture | Tutorial | Practical | |
| 1 | OE | Professional Ethics and Cyber Law | II | 3 | 0 | 0 | 03 |
| 2 | OE | Data Science | III | 3 | 0 | 0 | 03 |
| Total Credits | | | | | | | 06 |

Course Description : Data structures play a central role in modern computer science. In addition, data structures are essential building blocks in obtaining efficient algorithms. This course covers advanced data structures.

Course Outcomes

After successful completion the course, students will be able to:

| | |
|------------|---|
| CO1 | Understand the implementation of symbol table using hashing techniques. |
| CO2 | Develop and analyze algorithms for red-black trees, B-trees and Splay trees. |
| CO3 | Develop algorithms for text processing applications. |
| CO4 | Identify suitable data structures and develop algorithms for computational geometry problems. |
| CO5 | Understand the implementation of symbol table using hashing techniques. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Dictionaries: Definition, Dictionary Abstract Data Type, Implementation of Dictionaries. Hashing: Review of Hashing, Hash Function, Collision Resolution Techniques in Hashing, Separate Chaining, Open Addressing, Linear Probing, Quadratic Probing, Double Hashing, Rehashing, Extendible Hashing. |
| Unit 2 | String algorithms : - Rabin karp algorithm, finding each trees, fibonacci heap ers |
| Unit 3 | Trees: Binary Search Trees, AVL Trees, Red Black Trees, 2-3 Trees, B-Trees, Splay Trees |
| Unit 4 | Text Processing: String Operations, Brute-Force Pattern Matching, The Boyer-Moore Algorithm, The Knuth-Morris-Pratt Algorithm, Standard Tries, Compressed Tries, Suffix Tries, The Huffman Coding Algorithm, The Longest Common Subsequence Problem (LCS), Applying Dynamic Programming to the LCS Problem. |
| Unit 5 | Computational Geometry: One Dimensional Range Searching, Two Dimensional Range Searching, Constructing a Priority Search Tree, Searching a Priority Search Tree, Priority Range Trees, Quadrees, k-D Trees. |

Course Description: Machine learning is a branch of computer science that uses algorithms to imitate the way in which humans learn. It uses statistical methods to train algorithms and make predictions. Machine learning is one of the most in-demand Data Science skills, which allows data scientists to increase the accuracy of predictions of algorithms.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|--|
| CO1 | Understand the characteristics of machine learning strategies |
| CO2 | Apply various supervised learning methods to real life problems |
| CO3 | Apply probabilistic and unsupervised learning models for handling unknown pattern |
| CO4 | Identify and integrate more than one techniques to enhance the performance of learning |
| CO5 | Illustrate reinforcement learning and the core principles behind it. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Introduction, Examples of Various Learning Paradigms, Perspectives and Issues, Version Spaces, Finite and Infinite Hypothesis Spaces. |
| Unit 2 | Classification and Regression Trees, Regression: Linear Regression, Multiple Linear Regression, Logistic Regression, Support vector machines: Linear and Non-Linear, Kernel Functions. |
| Unit 3 | Introduction to clustering, Hierarchical: AGNES, DIANA, Partitional: K-means clustering, K-Mode Clustering, Expectation Maximization, Gaussian Mixture Models, Probabilistic Learning Bayesian Learning, Bayes Optimal Classifier, Naive Bayes Classifier Generative Models (mixture models and latent factor models) |
| Unit 4 | Ensemble Learning Model Combination Schemes, Voting, Bagging: Random Forest Trees, Boosting: Adaboost. |

| | |
|---------------|--|
| Unit 5 | Learning Theory, Introduction to Reinforcement Learning, Bandit algorithms – UCB, PAC Learning, VC Dimension |
|---------------|--|

Course Outcomes:

After completion of this course students will be able to:

| Course Outcomes | |
|-----------------|---|
| CO1 | Learn to perform classification tasks using a python programming. |
| CO2 | Learn to perform clustering tasks using a python programming. |
| CO3 | Demonstrate the working of algorithms ensemble algorithms |
| CO4 | Exercise the RL techniques with varied input values for different parameters. |

List of the Experiments:

The student shall perform minimum ten experiments of the following using Python

| Sr. No. | Title of the Experiments | Skill / Knowledge Level | CO | Marks for ISE |
|------------------------------|---|-------------------------|-----|---------------|
| Level: Basic (all) | | | | |
| 1 | Implement Linear regression | S1 | CO1 | 02 |
| 2 | Implement Logistic Regression | S2 | CO2 | 02 |
| 3 | Implement EM algorithm | S2 | CO2 | 02 |
| 4 | Implement Naïve Bayes Classification | S2 | CO1 | 03 |
| 5 | Implement Random forest Algorithm | S2 | CO1 | 03 |
| Level: Moderate (all) | | | | |
| 6 | Implement bagging algorithm | S2 | CO3 | 02 |
| 7 | Implement K means Clustering technique on Weather dataset | S2 | CO2 | 02 |

| | | | | |
|-----------------------------|--|----|-----|----|
| 8 | Implement hierarchical clustering using python | S2 | CO2 | 02 |
| 9 | Implement boosting algorithm | S2 | CO3 | 02 |
| Level: Complex (all) | | | | |
| 10 | Implement reinforced learning to solve any problem . | S3 | CO4 | 03 |
| 11 | Apply RL algorithm | S2 | CO4 | 02 |

Assessment:

ISEII: In-Semester Evaluation of 25 marks based on performance of students in practical hours, practical assignments completed, and timely submission.

Assessment Table:

| | | |

Course description:

Developments in cloud computing technology are transforming the way we live and work. This course will equip students with specialist knowledge in this fast-growing field and allow to explore a range of advanced topics in cloud computing like: Exploring different cloud computing platforms, virtualization, VDC architecture, etc

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|-----|---|
| CO1 | To install cloud computing environments. |
| CO2 | To study a survey on cloud building blocks and technologies. |
| CO3 | To perform cloud computing admin and programming using open source tools. |
| CO4 | Identify real time cloud applications in different scenarios appropriate to society |
| CO5 | To study Cloud security aspects |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Introduction, Roots of Cloud Computing: From mainframe to Cloud, Benefits of Cloud Computing SOA, Web services, Web 2.0, Mashups, Grid computing, Utility computing, Hardware virtualization, Essentials of Cloud characteristics, Challenges, Cloud economics, Role of Networks in Cloud Computing: Cloud types and service models, Cloud computing platforms : Openstack, Opennimbus, Eucalyptus Primary Cloud Service models, Cloud Services brokerage, Primary cloud deployment models, cloud computing reference model, The greenfield and brownfield deployment options |
| Unit 2 | Introduction, Characteristics of Virtualized environments, Taxonomy of Virtualization techniques, Pros and Cons of Virtualization, Technology examples: Xen, KVM, Vmware, Microsoft Hyper-V Infrastructure as Service, best-of breed cloud infrastructure components, cloud ready converged infrastructure, Virtual machine provisioning and migration services, Anatomy of Cloud infrastructure, Distributed management of virtual infrastructure, scheduling techniques, SLA Commitment |
| Unit 3 | Storage system architecture, Big data, Virtualize data centre(VDC) architecture, VDC Environment, server, storage, networking, desktop and application virtualization techniques and benefits, Virtual Machine Components and Process of converting physical to VMs, Block and file level storage virtualization, Virtual Provisioning, and automated storage tiering, VLAN, VSAN and benefits, Network traffic management techniques in VDC, Cloud file systems: GFS and HDFS, BigTable, HBase and Dynamo. Features and comparisons among GFS,HDFS. |
| Unit 4 | Introduction and architecture for federated cloud computing, Performance prediction for HPC on Cloud. SLA management: Types of SLA, Life cycle of SLA, Traditional approaches of SLA. service catalog, service |

| | |
|---------------|---|
| | management and functional interfaces of services , cloud portal and its functions, cloud interface standards along with SOAP and REST, system integration and work-flow modeling, cloud service life-cycle phases: service planning, service creation, service operation, and service termination Control layer, its functions and benefits,element and unified manager, software defined approach and techniques for managing IT resources |
| Unit 5 | Introduction, Global Risk and Compliance aspects in cloud environments and key security terminologies, Technologies for Data security, Data security risk, Cloud computing and identity, Digital identity and access management, Content level security, Security-As-A-Cloud Service |

CSPEC5003: Soft Computing

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 4 Hrs/Week | ISEI | 20 Marks |
| Tutorial | - | ISEII | 20 Marks |
| Total Credits | 4 | ESE | 60 Marks |

Course Description:

Soft computing is an emerging approach to computing which parallel the remarkable ability of the human mind to reason and learn in an environment of uncertainty and imprecision. soft computing is the only solution when we don't have any mathematical modelling of problem solving (i.e., algorithm), need a solution to a complex problem in real time, easy to adapt with changed scenario and can be implemented with parallel computing. It has enormous applications in many application areas such as medical diagnosis, computer vision, hand written character recondition, pattern recognition, machine intelligence, weather forecasting, network optimization, etc.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|--|
| CO1 | Identify and describe soft computing techniques and their roles in building intelligent machines |
| CO2 | Apply fuzzy logic and reasoning to handle uncertainty and solve various engineering |
| CO3 | Apply genetic algorithms to combinatorial optimization problems |
| CO4 | Evaluate and compare solutions by various soft computing approaches for a given problem. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | INTRODUCTION TO SOFT COMPUTING AND NEURAL NETWORKS: Evolution of Computing: Soft Computing Constituents, From Conventional AI to Computational Intelligence: Machine Learning Basics. |
| Unit 2 | NEURAL NETWORKS: Machine Learning Using Neural Ne |

| | |
|---------------|---|
| | Networks, Feed forward Networks, Supervised Learning Neural Networks, Radial Basis Function Networks : Reinforcement Learning, Unsupervised Learning Neural Networks, Adaptive Resonance architectures, Advances in Neural networks |
| Unit 3 | FUZZY LOGIC: Fuzzy Sets, Operations on Fuzzy Sets, Fuzzy Relations, Membership Functions: Fuzzy Rules and Fuzzy Reasoning, Fuzzy Inference Systems, Fuzzy Expert Systems, Fuzzy Decision Making. |
| Unit 4 | Matlab/Python Lib: Introduction to Matlab/Python, Arrays and array operations, Functions and Files, Study of neural network toolbox and fuzzy logic toolbox, Simple implementation of Artificial Neural Network and Fuzzy Logic |
| Unit 5 | Introduction to genetic algorithm, operators in genetic algorithm –Coding – selection – cross over – mutation, Stopping condition for Genetic algorithm flow, Genetic-neuro hybrid systems, Genetic-Fuzzy rule based systems Recent Trends in deep learning, various classifiers,. Implementation of recently proposed soft computing techniques. |

CSPEC5005 : Distributed Computing Systems

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 4 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 4 | ESE | 60 Marks |

Course Description:

Distributed computing is the method of making multiple computers work together to solve a common problem. It makes a computer network appear as a powerful single computer that provides large-scale resources to deal with complex challenges. This course introduces distributed Computing Systems architecture and the concepts of distributed file system. It explores communication in distributed system along with communication protocols.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | To understand the basics of Computing Systems and its functionalities |
| CO2 | To study distributed Computing system concepts agreement protocols and Create models for distributed Computing systems. |
| CO3 | To learn basics of agreement problem along with its solution |
| CO4 | To learn concurrency control and properties of transaction in Distributed Computing systems. |

| | |
|------------|--|
| CO5 | Apply different techniques learned in the distributed Computing system |
|------------|--|

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Introduction: Introduction to Distributed Computing Systems, System Models, and Issues in Designing a Distributed Operating System, Examples of distributed systems. |
| Unit 2 | Features of Message Passing System, Synchronization and Buffering, Introduction to RPC and its models, Transparency of RPC, Implementation Mechanism, Stub Generation and RPC Messages, Server Management, Call Semantics, Communication Protocols and Client Server Binding. |
| Unit 3 | Introduction, Design and implementation of DSM system. Granularity and Consistency Model, Advantages of DSM, Clock Synchronization, Event Ordering, Mutual exclusion, Deadlock, Election Algorithms. |
| Unit 4 | Task Assignment Approach, Load Balancing Approach, Load Sharing Approach, Process Migration and Threads. |
| Unit 5 | File Models, File Accessing Models, File Sharing Semantics, File Caching Schemes, File Replication, Atomic Transactions, Cryptography, Authentication, Access control and Digital Signatures. |

CSPEC5006 : Internet of Things & Raspberry Pi

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 4 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 4 | ESE | 60 Marks |

Course Description: Internet of Things (IoT) is presently a hot technology worldwide. Government, academia, and industry are involved in different aspects of research, implementation, and business with IoT. IoT cuts across different application domain verticals ranging from civilian to defense sectors. These domains include agriculture, space, healthcare, manufacturing, construction, water, and mining, which are presently transitioning their legacy infrastructure to support IoT.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | Identify applicability of IoT in given scenario |
| CO2 | Illustrate installation on IoT platform |
| CO3 | Develop programs for Raspberry Pi |
| CO4 | Develop web services |
| CO5 | Apply Security to IoT App |

Signature

Signature

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | What Is the Internet of Things (IoT) Introduction to IOT, Introduction to the Internet of Things, Background, What is Internet of Things (IoT)?, Introduction to Embedded System, Embedded Boards, General Introduction to Arduino Boards, Are Mobile Phones IoT devices? IoT Platforms, Wearable Platform, Embedded Platforms, Cloud Platform for IoT, What IoT means for the developers |
| Unit 2 | IOT Platforms Getting Started With Arduino Development Environment, Basics of Arduino C Program, Writing our First Arduino Program, Simple Blinking Program, Taking Input from Serial Port, Working With Digital Switches, Working with Sensors (Touch Switch Example), User Defined Functions, ArdOS – Installation, Working With ArdOS |
| Unit 3 | Introduction to Raspberry Pi with Raspbian OS Raspberry Pi system specifications Ports, Pins and their uses , Raspberry Pi with Raspbian OS, Setting Up Raspbian OS, Configuring your Raspbian, GUI - Lightweight X11 Desktop Environment” or in short LXDE, File system layout (Logical layout, Physical Layout) Installing and uninstalling software - Finding Software, Installing Software, Uninstalling Software, Upgrading Software, “Hello World” Programming on Raspberry Pi |
| Unit 4 | Web Service & Sensors Creating a Web Service to be consumed by connected Devices via Internet, Working with Sensors like, proximity sensors, temperature sensor, image sensor, rfid sensor etc |
| Unit 5 | Securing IoT Apps- Introduction to Wireless Hacking, Security Model and Threat Taxonomy for Internet of Things (IoT), Privacy Issues in Smart Devices, Introduction to Lightweight Symmetric Cryptosystem, Public Key Cryptography for IoT |

|-----------------------------------|---------------------------|----------------|
| Teaching Scheme | Examination Scheme | |
| Practical:04Hrs. /Week | ISEII | 25Marks |
| Credit:02 | ESE | 25Marks |

Course Objectives:

1. To make the student conversant with industrial activities / project execution activities
2. To exemplify various industrial aspects in manufacturing processes and industrial design
3. Student will able to analyze and solve industrial mini problem / work on in-house project

Course Outcomes:

After completing the course students will able to

| Course Outcomes | |
|-----------------|--|
| CO1 | Illustrate industrial project / in-house project |
| CO2 | Identify industrial problems / in-house |
| CO3 | Integrate and apply the knowledge gained through different courses into practical problems |
| CO4 | Prepare a consolidated report |

Detailed description:

1. Student shall identify and collect pragmatic industrial information / in-house project / social problem as a Mini Project – I.
2. Student shall obtain a solution by applying suitable techniques.
3. Student has to exhibit the continuous progress review through regular reporting and presentations.
4. The candidate shall submit the report on Mini Project – I in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on work undergone, content delivery, presentation skills, documentation and report.
6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Assessment:

ISE II- Continuous Assessment of individual student

Maximum Marks-25

ESE – Viva Voce based on presentation and report

Maximum Marks-25

INCCC5001: Yoga (Audit Course)

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|------|
| Practical | 4 Hrs/Week | ISE I | ---- |
| Total Credits | -- | ISE II | ---- |
| | | ESE | |

Course Description: Yoga - In today's stressful life, there is much more need to experience relaxation and remain focus. The inner connect is very much needed to retain stability. Beyond physical exercise there is much more to do in the field of Yoga. The content of this course includes Yoga, Pranayama, Meditation, Relaxation, rejuvenation and connection with our own self. The introduction of such an experiential course helps to boost self confidence and with regulation of mind through meditation improves concentration. Meditation is basically training of mind and helps to regulate it. Along with experiential learning, the students are also exposed to learnings contained in the supported literature.

Course Outcomes:

After completing the course, students will be able to:

| | |
|-----|--|
| CO1 | Understand and perform Yoga Asana |
| CO2 | Gain knowledge about Pranayama and perform it. |
| CO3 | Apply the concept of Meditation in everyday life and studies |

Syllabus:

- (1) Perfection in at least 3 types of Yoga-asana (Trikonasan, Konasan and Ushtrasan)
- (2) Perfection in at least 3 types of Pranayama (Anulom-Vilom, Bhramari and Kapalbhathi)
- (3) Regular practice of Yoga-asana, Pranayama and Meditation for 10 minutes during the allotted periods as per the timetable and daily at home.

TEXTBOOKS:

1. The Heartfulness way", Heartfulness Kamlesh Patel and Joshua Pollock
2. The Yoga Sutras of Patanjali — Sri Swami Satchidananda
3. The Yamas and Niyamas — Deborah Adele
4. Yoga Practices for Anxiety and Depression --- H. R. Nagendra & R. Nagarathana

Assessment:

The evaluation is based on participating and performing Yoga, Pranayama and meditation regularly and perfectly under the guidance by Yoga Teachers in class as per schedule. Meditation trainers will observe intrinsic goodness, right attitude and happy and joyous way of doing things.

| MERMC5001 Research Methodology | | |
|--------------------------------|------------------------|---------|
| Teaching Scheme | Examination Scheme | |
| Lectures: 04 Hrs. / Week | ISEI | 20Marks |
| Credits: 04 | ISEII | 20Marks |
| | EndSemesterExamination | 60Marks |

Course Objectives:

1. To guide students from understanding foundational research concepts to critically formulating research problems, culminating in the adept creation of comprehensive research plans and literature reviews.
2. To develop a comprehensive understanding of various research methods, both qualitative and quantitative
3. To facilitate students in analysing, evaluating, and creating research proposals.
4. To attain mastery in data collection methods, sampling, data analysis techniques, and result interpretation for robust research outcomes.
5. To Equip students with the skills to proficiently create and present diverse research reports, encompassing various formats, oral delivery, technical writing, and ethical awareness regarding plagiarism.

Course Outcomes:

After completing the course students will able to

| Course Outcomes | |
|-----------------|---|
| CO1 | Develop the ability to comprehend core research concepts, define key elements like variables and hypotheses, and critically evaluate literature to identify research gaps. |
| CO2 | Justify their chosen research methods and explain their advantages and limitations. |
| CO3 | Create well-structured research proposals that include clear research objectives, methods, and expected outcomes. |
| CO4 | Proficient in using data analysis techniques relevant to their chosen research methods, such as statistical analysis for quantitative research or thematic analysis for qualitative research. |
| CO5 | Create comprehensive research reports in diverse formats, such as academic papers, presentations, and technical reports. |

Detailed Syllabus:

| | |
|--------|--|
| Unit 1 | Introduction to RM: Meaning of Research, Objectives of Research, Research Approaches, Significance of Research, Research Methods versus Methodology, Research and Scientific Method, Research Process, Criteria of Good Research, Defining the Research Problem, Selecting the Problem, Technique Involved in Defining a Problem, Research Design, Important Concepts Relating to Research Design, Developing a Research Plan, Literature review. |
| Unit 2 | Methods of Research: Qualitative and quantitative methods of research like Historical, case study, ethnography, exposit facto, documentary and content analysis, survey (Normative, descriptive, evaluative etc.) field and laboratory experimental studies. Characteristics of methods and their implications in research area. |
| Unit 3 | Development of research proposal: Research proposal and its elements Formulation of research problem-criteria of sources and definition Development of objectives and characteristics of objectives. Development hypotheses and applications. |
| Unit 4 | Methods of data collection: Concept of sampling and other concepts related to sampling. Probability and non-probability samples, their characteristics and implications. Tools of data collections, their types, attributes and uses. Redesigning, research tools-like questionnaire, opinionnaire, observation, interviews, scales and tests etc. Methods of data analysis: Analysis of qualitative data based on various tools. Analysis of quantitative data and its presentation with tables, graphs etc. Statistical tools and techniques of data analysis-measures of central tendency, dispersion. Decision making with hypothesis testing through parametric and non-parametric tests. Validity and delimitations of research findings. |
| Unit 5 | Interpretation and Report Writing: Meaning of Interpretation, Techn |

Interpretation, Significance of Report Writing, Steps in Writing Report, Layout of the Research Report, Types of Reports, Oral Presentation, Mechanics of Writing a Research Report, Writing a technical paper, plagiarism and its implications.

CSPCC5004: Advanced Data Mining

| | | | |
|----------|--|-------------------|--|
| Teaching | | Evaluation Scheme | |
|----------|--|-------------------|--|

| | | | |
|----------------------|-------------------|---------------|-----------------|
| Scheme | | | |
| Lectures | 4 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 4 | ESE | 60 Marks |

Course Description: The objective of this course is to introduce Advanced Data Mining techniques. Application of data mining in web mining, pattern matching, time series and cluster analysis is included to aware students of broad data mining areas.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | Understand the characteristics of advanced data mining techniques |
| CO2 | Apply various unsupervised learning methods to real life problems |
| CO3 | Apply sequential mining to data streams |
| CO4 | Apply advanced data mining to time series data |
| CO5 | Study different web mining techniques |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Data Mining: Characteristics, Mining frequent patterns, association and correlations; Sequential Pattern Mining concepts, primitives, scalable methods; |
| Unit 2 | Classification and prediction; Cluster Analysis – Types of Data in Cluster Analysis, Partitioning methods, Hierarchical Methods; Transactional Patterns and other temporal based frequent patterns. Clustering graph and network data, advanced cluster analysis. |
| Unit 3 | Mining Data Streams, Methodologies for stream data processing and stream data systems, Frequent pattern mining in stream data, Sequential Pattern Mining in Data Streams, Classification of dynamic data streams, Class Imbalance Problem; Graph Mining; Social Network Analysis; |
| Unit 4 | Mining Time series Data, Periodicity Analysis for time related sequence data, Trend analysis, Similarity search in Time-series analysis |
| Unit 5 | Web Mining, Mining the web page layout structure, mining web link structure, mining multimedia data on the web, Automatic classification of web documents and web usage mining; Distributed Data Mining. |

CSPCC5005 : Recommender System

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|----------|
| Lectures | 4 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 4 | ESE | 60 Marks |

Course Description: This course is process seeks to predict user preferences. This specialization covers all the fundamental techniques in recommender systems, from non-personalized and project-association recommenders through content-based and collaborative filtering techniques

Course Outcomes

Students will be able to:

| | |
|------------|---|
| CO1 | Relate techniques for making recommendations, including non-personalized, content- based, and collaborative filtering |
| CO2 | Illustrate automation of a variety of choice-making strategies with the goal of providing affordable, personal, and high-quality recommendations. |
| CO3 | Apply techniques for making recommendations, including non-personalized, content-based, and collaborative filtering |
| CO4 | Evaluate recommender systems on the basis of metrics such as accuracy, rank accuracy, diversity, product coverage, and serendipity |
| CO4 | Design recommendation system for a particular application domain |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Introduction: Overview of Information Retrieval, Retrieval Models, Search and Filtering Techniques: Relevance Feedback, User Profiles, Recommender system functions, Matrix operations, covariance matrices, Understanding rating Applications of recommendation systems, Issues with recommender system. |
| Unit 2 | Content-based Filtering: High level architecture of content-based systems, Advantages and drawbacks of content based filtering, Item profiles, Discovering features of documents, pre-processing and feature extraction, Obtaining item features from tags, Methods for learning user profiles, Similarity based retrieval, Classification algorithms. |
| Unit 3 | Collaborative Filtering: User-based recommendation, Item-based recommendation, Model based approaches, Matrix factorization, Attacks on collaborative recommender systems. |
| Unit 4 | Hybrid approaches: Opportunities for hybridization, Monolithic hybridization design: Feature combination, Feature augmentation, Parallelized hybridization design: Weighted, Switching, Mixed, Pipelined hybridization design: , Limitations of hybridization strategies |
| Unit 5 | Types of Recommender Systems: Recommender systems in personalized web search, knowledge-based recommender system, Social tagging recommender systems, Trust-centric recommendations, Group recommender systems. Evaluation of RS. |

|----------------------|-------------------|-------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description:

This course provides an introduction to computer vision, including fundamentals of image formation, camera imaging geometry, feature detection and matching, stereo, motion estimation and tracking, image classification, scene understanding, and deep learning with neural networks.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | Identify basic concepts, terminology, theories, models and methods in the field of computer vision. |
| CO2 | Articulate the known principles of human visual system in terms of mathematical representation. |
| CO3 | Illustrate the basic methods of computer vision related to edge detection and detection of other primitives, stereo, motion and object recognition. |
| CO4 | Suggest a design of a computer vision system for a specific problem. |
| CO5 | Analyze the Statistical texture description. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | The image, its representations and properties – image representations a few concepts, Image digitization, Digital image properties, Color images, Pixel relationship, Image Enhancement- Spatial filtering. |
| Unit 2 | The Image, Its mathematical and physical background – Linear integral transforms, Image Pre-processing - Pixel brightness transformations, Geometric transformations, Local pre-processing, Image restoration. |
| Unit 3 | Segmentation I – Thresholding, Edge-based segmentation, Evaluation issues in segmentation. Segmentation II – Mean Shift Segmentation, Active contour models – snakes, Geometric deformable model – level sets and geodesic active contours. |
| Unit 4 | Use of 3D vision – Shape from X, Full 3D objects, 3D model-based vision, 2D view-based representations of a 3D scene, 3Dreconstruction from an unorganized set of 2D views – a case study. Human Vision: Stereopsis. |
| Unit 5 | Texture – Statistical texture description, Syntactic texture description methods, Hybrid texture description methods, Texture recognition method applications. |

CSPEC5007: Speech and Natural Language Processing

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description:

This course includes the concepts and techniques of Natural language processing for

based on part of speech and Constituency parsing & analyzing speech signal in time and frequency domain.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | Describe the mathematical and linguistic foundations underlying approaches for NLP modules in Text processing and speech recognition. |
| CO2 | Demonstrate the working of sequence models for text processing. |
| CO3 | Use signal processing techniques to analyze and represent the speech signal. |
| CO4 | Discuss statistical approach for automatic speech recognition including feature extraction, acoustic modeling and language modeling. |
| CO5 | Develop a deep learning models associated with the design, implementation, training and deployment of speech and text processing. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Language Model and Part-of-Speech- Different Levels of NLP, Text Normalization, Minimum Edit Distance, N-gram Language Models Smoothing, Huge Language Models, Perplexity's Relation to Entropy, Part-of-Speech Tagging, HMM for Part-of-Speech Tagging, Viterbi algorithm, Named Entities and Named Entity Tagging, Conditional Random Fields (CRFs) - Evaluation of Named Entity Recognition. |
| Unit 2 | Constituency Parsing and Lexical Semantics - Introduction to Parsing, Linguistic Constituents and Constituency tests, Partial or Shallow Parsing, Dependency Parsing, Word Senses, Relations Between Senses, WordNet: A Database of Lexical Relations, Methods for Word Sense Disambiguation. |
| Unit 3 | Feature Representation for Natural Language Processing- Vector Semantics - Words and Vectors - Cosine for measuring similarity - TF-IDF: Weighing terms in the vector - Point wise Mutual Information (PMI) - Neural Language Models - Word Embeddings: Word2Vec, Glove and Fast text. |
| Unit 4 | Deep learning architecture for NLP- RNNs as Language Models, Stacked and Bidirectional RNN architectures, LSTM, Self-Attention Networks: Transformers, Transformers as Language Models, Applications of NLP: Sentiment analysis, Question and answering, Chat Bot. |
| Unit 5 | Automatic Speech Recognition:- Introduction Acoustic feature: Speech production, Raw Waveform, MFCC, Phones, Statistical Speech Recognition: Acoustic Models, Language Model, HMM Decoding, Error Metrics, DNN/HMM Hybrid, Text to Speech, WaveNet for Text to Speech. |

Course Description:

This course develops an understanding of the algorithms used to protect users connected over the network and to study some of the design choices behind these algorithms. It aims to develop a workable knowledge of the mathematics used in cryptology using some algorithms. The course emphasizes to give an understanding of previous attacks on cryptosystems with the aim of preventing future attacks. A wide variety of basic cryptographic primitives will be discussed along with recent developments in some advanced topics.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|--|
| CO1 | Analyze security issues in computer system. |
| CO2 | Study Advance algorithms for information interchange |
| CO3 | Design and evaluate the Cryptosystems. |
| CO4 | Study policies, standards and regulations related to information security. |
| CO5 | Identify and resolve issues in computer networking environment. |

Detailed syllabus:

| | |
|---------------|--|
| UNIT 1 | Overview: Computer Security Concepts, The OSI Security Architecture, A Model for Network Security, Block Ciphers and the Data Encryption Standard. |
| UNIT 2 | Advanced Encryption Standard: The Origins AES, AES Structure, AES Round Functions, AES Key Expansion, An AES Example, AES Implementation. |
| UNIT 3 | Public-Key Cryptography and RSA: Principles of Public-Key Cryptosystems, The RSA Algorithm, Other Public-Key Cryptosystems: Diffie-Hellman Key Exchange, Elliptic Curve Cryptography. Cryptographic hash function(SHA), Digital signature standard(DSS) |
| UNIT 4 | Information Security Overview, Risk Analysis, Compliance with Standards, Regulations, and Laws, Secure Design Principles, Security Policies, Standards, Procedures, and Guidelines, Data Security: Securing Unstructured Data, Information Rights Management, Storage Security, Database Security. |

| | |
|---------------|---|
| UNIT 5 | Network Security: Secure Network Design, Network Device Security, Firewalls, Virtual Private Networks, Wireless Network Security, Intrusion Detection and Prevention Systems. |
|---------------|---|

| CO5 | 2 | 1 | 3 | 3 | 3 |

3 - High 2 – Medium 1 –Low

Assessment:

ISE I: In semester evaluation of 20 marks, will be based on Class Test.

ISE II: Teachers Assessment of 20 marks is based on one of the / or combination of few of the following:

1. Quiz
2. Assignments
3. Question and answer
4. PowerPoint presentation

Assessment Pattern:

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | End Semester Examination |
|------------------------------|-----------------|-------|--------|--------------------------|
| K1 | Remember | 5 | 5 | 10 |
| K2 | Understand | 15 | 5 | 10 |
| K3 | Apply | 5 | 5 | 20 |
| K4 | Analyze | 0 | 5 | 20 |
| K5 | Evaluate | 0 | 0 | 0 |

| | | | | |
|------------------------|--------|----|----|----|
| K6 | Create | 0 | 0 | 0 |
| Total Marks 100 | | 20 | 20 | 60 |

CSPEC5009: Biometrics

| Teaching Scheme | | Evaluation Scheme | |
|------------------------|-------------------|--------------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description:

The modern meaning of the term biometrics used in Computer Science, and consequently of the term biometric system, explicitly mainly refers to the automatic identification or verification of the identity of a person based on physical or behavioral characteristics.

Signature

Signature

The course provides basic knowledge and skills necessary for the design and development of automated systems for the recognition of people on the based biometric features.

Biometrics finds applications in biology, medicine, genetics, in the agricultural and forestry sciences, environmental science and other related fields.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|--|
| CO1 | To understand the basics of biometrics and its functionalities |
| CO2 | To study biometric evaluation and feature extraction |
| CO3 | To learn different types of biometric recognition system |
| CO4 | To learn to develop applications with biometric security |
| CO5 | Illustrate the multidisciplinary technologies for biometric applications |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Introduction: Introduction of biometric traits and its aim, Biometric functionalities: verification and identification, Biometric system, Authentication, Biometric systems errors, Applications of Biometric systems, Security and privacy issues, attacks on biometric systems, Application areas |
| Unit 2 | Acquisition and Pre-processing Basics: Image acquisition, working with different image types, Feature types and descriptors, Geometric transformations, masking, filters Biometric System Evaluation: Identification and verification, Threshold, Score distribution, FAR and FRR, System design issues, Positive/negative identification, Authentication methods, and statistical test of significance, Trade-offs b/w security and convenience. |
| Unit 3 | Physiological Biometrics: Overview, Properties of physiological biometrics, Fingerprint: friction ridge pattern, Face recognition, IRIS recognition, Other traits, Challenges, Soft biometrics, Open Issues. Behavioral Biometrics: Overview, Properties of behavioral biometrics, Gait, Signature, Keystroke based recognition, Error sources, Open issues. |
| Unit 4 | Multimodal Biometrics: Suitable biometric, Biometric attributes, Zephyr charts, Multi biometrics. Fusion methods, Multimodal identification. |
| Unit 5 | Biometric System Vulnerabilities: Circumvention, Covert acquisition, Quality control, Template generation, Interoperability, Data storage challenges. Biometric Applications: Application areas, User system interaction, Application development, Design validation, Disaster recovery plan, Maintenance, Application concerns: effect of genetics, weather, aging etc, Privacy concerns. |

CSPEC5010 : Big Data Analytics

| Teaching Scheme | | Evaluation Scheme | |
|------------------------|-------------------|--------------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description: This course gives an overview of Big Data Analytics, i.e. storage, retrieval and processing of big data. In addition, it also focuses on the “technologies”, i.e., the tools/algorithms that are available for storage, processing of Big Data. It also helps a student to perform a variety of “analytics” on different data sets and to arrive at positive conclusions.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | Applying Map Reduce paradigm to solve problems |
| CO2 | Apply Hadoop ecosystem components for big Data use cases |
| CO3 | Constructing a real world application to solve specific business problems using powerful analytic techniques. |
| CO4 | Ability to initiate and design highly scalable systems that can accept, store, and analyze large volumes of unstructured data in batch mode and/or real time. |
| CO5 | Analysis of data near real time data using tensorflow and graphs. |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Map-Reduce: MAPREDUCE PROGRAMMING: Introduction, Mapper, Reducer, Combiner, Partitioner, Searching, Sorting, Compression, Real time applications using MapReduce, Data serialization and Working with common serialization formats, Big data serialization formats. Evolution of Hadoop and Map/Reduce, semi-structured data: web logs, videos, speech recordings, photographs, e-mails, Tweets, and similar data. |
| Unit 2 | Spark Framework Introduction to GPU Computing, CUDA Programming Model, CUDA API, Simple Matrix, Multiplication in CUDA, CUDA Memory Model, Shared Memory Matrix Multiplication, Additional CUDA API Features. Data Analysis with Spark Shell, Writing Spark Application - Spark Programming in Scala, Python, R, Java - Application Execution |

| | |
|---------------|--|
| Unit 3 | NoSQL storage solutions: Cassandra for their critical features: speed of reads and writes, ability to scale to extreme volumes. SQL Context Importing and Saving data Data frames using SQL |
| Unit 4 | Memory-resident and graph databases: GraphX overview – Creating Graph, Graph Algorithms. Spark GraphX , |
| Unit 5 | Tensor Flow: Regression, Clustering, and Classification. |

CSPEC5011: High Performance Computing

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description: High Performance Computing is a course on High Performance Computing Clusters providing a solid foundation in parallel computer architectures, parallel programming models. This course will discuss fundamentals of grid computing systems covering topics ranging from what an HPC cluster consists of to how to efficiently solve complex large scale problems in various the areas like cloud computing.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | To Study memory hierarchies, processor types and techniques in high performance computing |
| CO2 | To understand the Designing of high performance computing. |
| CO3 | To Study different platforms involved in achieving high performance computing |
| CO4 | To develop efficient and high performance programming |
| CO5 | Apply different computing models learned in the High Performance Computing system |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Overview of Grid Computing Technology, History of Grid Computing, High Performance Computing, Cluster Computing. Peer-to-Peer Computing, Internet Computing, Grid Computing Model and Protocols, Types of Grids: Desktop Grids, Cluster Grids, Data Grids, High-Performance Grids, Applications and Architectures of High Performance |
|---------------|---|

| | |
|---------------|--|
| | Grids, High Performance Application Development Environment. |
| Unit 2 | Open Grid Services Architecture, Introduction, Requirements, Capabilities, Security Considerations, GLOBUS Toolkit. |
| Unit 3 | Overview of Cluster Computing, Cluster Computer and its Architecture, Clusters Classifications, Components for Clusters, Cluster Middleware and SSI, Resource Management and Scheduling, Programming, Environments and Tools, Cluster Applications, Cluster Systems, |
| Unit 4 | Beowulf Cluster: The Beowulf Model, Application Domains, Beowulf System Architecture, Software Practices, Parallel Programming with MPL, Parallel Virtual Machine (PVM). |
| Unit 5 | Overview of Cloud Computing, Types of Cloud, Cyber infrastructure, Service Oriented Architecture Cloud Computing Components: Infrastructure, Storage, Platform, Application, Services, Clients, Cloud Computing Architecture. |

CSPEC5012: Wireless Sensor Network

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description: To understand the fundamentals of wireless sensor networks and its application to critical real time scenarios. To study the various protocols at various layers and its differences with traditional protocols.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|------------|---|
| CO1 | To provide awareness about challenges wireless sensor networks. |
| CO2 | To acquire knowledge of various networking sensors |

| | |
|------------|--|
| CO3 | To comprehend the infrastructure establishment |
| CO4 | To discuss sensor network platforms and tools. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Overview of wireless sensor networks: Challenges for Wireless Sensor Networks, Enabling Technologies for Wireless Sensor Networks. |
| Unit 2 | Architectures: Single-Node Architecture - Hardware Components, Energy Consumption of Sensor Nodes , Operating Systems and Execution Environments, Network Architecture - Sensor Network Scenarios |
| Unit 3 | Networking sensors: Physical Layer and Transceiver Design Considerations, MAC Protocols for Wireless Sensor Networks, Low Duty Cycle Protocols And Wakeup Concepts - S-MAC. |
| Unit 4 | Infrastructure Establishment: Topology Control , Clustering, Time Synchronization, Localization and Positioning, Sensor Tasking and Control. |
| Unit 5 | Sensor network platform and tools: Node Hardware – Berkeley Motes, Programming Challenges, Node-level software platforms |

CSOEC5002: Professional Ethics and Cyber Laws (OPEN ELECTIVE I)

| Teaching Scheme | | Evaluation Scheme | |
|----------------------|-------------------|-------------------|-----------------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description: This course will introduce concepts of Professional and Philosophical Ethics amongst the students; it will summarise Cyber Crimes and its associated investigation and forensics with relation to Cyber law. Students will have a new dimension to look towards their day to day computer activities.

Course Outcome:

| | |
|------------|--|
| CO1 | Apply Philosophical and Professional Ethics to solve Ethical Dilemma & identify their Professional Responsibilities. |
| CO2 | Study Intellectual Property Rights in Cyberspace. |

| | |
|------------|---|
| CO3 | Summarize Cyber Forensics and its role in Cyber Laws |
| CO4 | Evaluate Cyber Crimes and its severity, and measures for Incident detection and response. |
| CO5 | Describe Scope, jurisdiction, offence and contraventions, powers of police, adjudication. |

Detailed Syllabus:

| | |
|---------------|--|
| UNIT 1 | Computer and Philosophical ethics: Moral v/s Ethics, Why Computer Ethics, Philosophical Ethics: Distinguishing Descriptive and Normative Claims, Ethical Relativism, Utilitarianism, Deontological Theories, Rights, Virtue Ethics, Professional Ethics: Why Professional Ethics, Characteristics of Professionals, The System of Professionals, is Computing a Profession..., Professional Relationships, Code of Ethics and Professional Conduct, Steps in Ethical Decision Making. |
| UNIT 2 | Ethics & Internet: Three Morally Significant Characteristics, Hacking & Hacker Ethics, Netiquette Intellectual property issues in cyberspace : Introduction to intellectual property Protections via Trade Secrets, Trademarks, Patents, Etc. Contracting to protect intellectual property, Protection options - Encryption / PGP, copyright on web-content, Copyright on software, digital contracts, digital signatures. |
| UNIT 3 | Data and Evidence Recovery: Introduction to Deleted File Recovery, Formatted Partition Recovery, Data Recovery Tools, Data Recovery Procedures and Ethics, Preserve and safely handle original media, Document a "Chain of Custody", Complete time line analysis of computer files based on file creation, file modification and file access, Recover Internet Usage Data, Recover Swap Files/Temporary Files/Cache Files, Introduction to Encase Forensic Edition, Forensic Tool Kit (FTK) etc, Use computer forensics software tools to cross validate findings in computer evidence-related cases. Cyber Forensics Investigation: Introduction to Cyber Forensic Investigation, Investigation Tools, eDiscovery, Digital Evidence Collection, Evidence Preservation, EMail Investigation, E-Mail Tracking, IP Tracking, EMail Recovery, Encryption and Decryption methods, Search and Seizure of Computers, Recovering deleted evidences, Password Cracking. |
| UNIT 4 | Cyber Security: Introduction to Cyber Security, Implementing Hardware Based Security, Software Based Firewalls, Security Standards, Assessing Threat Levels, Types of incidents, Stages of incident response Threats in cyberspace, Blended Attacks, incident prevention and detection, Forming an Incident Response Team, Reporting Cyber crime, Operating System Attacks, Application Attacks, Reverse Engineering & Cracking Techniques and Financial Frauds. |
| UNIT 5 | Information technology Act 2000 : Scope, jurisdiction, offence and contraventions, powers of police, adjudication. |

| Total Credits | 2 | ISE II | 25 Marks |
| | | ESE | 25 Marks |

After completing the course students will able to

| Course Outcomes | |
|-----------------|--|
| CO1 | Illustrate industrial project / in-house project |
| CO2 | Identify industrial problems / in-house |
| CO3 | Integrate and apply the knowledge gained through different courses into practical problems |
| CO4 | Prepare a consolidated report |

Detailed description:

1. Student shall identify and collect pragmatic industrial information / in-house project / social problem as a Mini Project – II.
2. Student shall obtain a solution by applying suitable techniques.
3. Student has to exhibit the continuous progress review through regular reporting and presentations. The candidate shall submit the report on Mini Project – II in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
4. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on work undergone, content delivery, presentation skills, documentation and report.
5. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Assessment:

ISE II- Continuous Assessment of individual student

Maximum Marks-25

ESE – Viva Voce based on presentation and report.

Maximum Marks-25

Assessment Pattern:

| Assessment Pattern Level No. | Knowledge Level | ISE II | ESE |
|------------------------------|-----------------|--------|-----|

EEAEC5001: Technical Communication (Humanities I)

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|----------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Total Credits | 3 | ISE II | 20 Marks |
| | | ESE | 60 Marks |

Course Outcomes (COs):

At the end of the course, the student will be able to

| | |
|------------|--|
| CO1 | Understand the nature and objective of Technical Communication relevant for the work place as Engineers. |
| CO2 | Utilize the technical writing for the purposes of Technical Communication and its exposure in various dimensions |
| CO3 | Enhance confidence in face of diverse audience. |
| CO4 | Evaluate their efficacy as fluent & efficient communicators by learning the voice-dynamics. |

Detailed Syllabus:

| | |
|----------------|--|
| UNIT -1 | Fundamentals of Technical Communication: Technical Communication: Features; Distinction between General and Technical Communication; Language as a tool of Communication; Dimensions of Communication: Reading & comprehension; Technical writing: sentences; Paragraph; Technical style: Definition, types & Methods; The flow of Communication: Downward; upward, Lateral or Horizontal; Barriers to Communication. |
| UNIT -2 | Forms of Technical Communication: Technical Report: Definition & importance; Thesis/Project writing: structure & importance; synopsis writing: Methods; Technical research Paper writing: Methods & style; Seminar & Conference paper writing; Key-Note Speech: Introduction & Summarization; Expert Technical Lecture: Theme clarity; Analysis & Findings; 7 Cs of effective business writing: concreteness, completeness, clarity, conciseness, courtesy, correctness, consideration. |

| | |
|----------------|--|
| UNIT -3 | Technical Presentation: Strategies & Techniques Presentation: Forms; interpersonal Communication; Classroom presentation; style; method; Individual conferencing: essentials: Public Speaking: method; Techniques: Clarity of substance; emotion; Humour; Modes of Presentation; Overcoming Stage Fear: Confident speaking; Audience Analysis & retention of audience interest; Methods of Presentation: Interpersonal; Impersonal; Audience Participation: Quizzes & Interjections. |
| UNIT -4 | Technical Communication Skills: Interview skills; Group Discussion: Objective & Method; Seminar/Conferences Presentation skills: Focus; Content; Style; Argumentation skills: Devices: Analysis; Cohesion & Emphasis; Critical thinking; Nuances: Exposition narration & Description; effective business communication competence: Grammatical; Discourse competence: combination of expression & conclusion; Socio-linguistic competence: Strategic competence: Solution of communication problems with verbal and non verbal means. |
| UNIT -5 | Kinesics & Voice Dynamics: Kinesics: Definitions; importance; Features of Body Language; Voice Modulation: Quality, Pitch; Rhythm; intonation; Pronunciation; Articulation; stress & accent; Linguistic features of voice control: Vowel & Consonant Sounds. |

Assessment: ISEI (Class Test), ISEII (TA) & ESE

Teacher Assessment:: Students will perform one or more of the following activities

1. Surprise Test
2. Assignment
3. Quiz
4. Any other activity suggested by course coordinator

Semester III

CSOEC6002 :Data Science

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|----------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Tutorial | - | ISE II | 20 Marks |
| Total Credits | 3 | ESE | 60 Marks |

Course Description: Identify and explain fundamental ingredients that constitute a Data collection and management. Describe what data science is and the skill sets needed to be a data scientist.

Course Outcomes:

After successful completion the course, students will be able to:

| | Course Outcomes |
|-----|--|
| CO1 | Explain how data is collected, managed and stored for data science |
| CO2 | Understand the key concepts in data science, including their real-world applications and the toolkit used by data scientists |
| CO3 | Implement data collection and management scripts using MongoDB |
| CO4 | To understand the mathematical foundations required |
| CO5 | To evaluate data science frameworks with a practical case study. |

Detailed Syllabus:

| | |
|--------|---|
| Unit 1 | Introduction to core concepts and technologies: Introduction, Terminology, data |
| Unit 2 | Data collection and management: Introduction, Sources of data, Data collection and APIs, Exploring and fixing data, Data storage and management, Using multiple data sources |
| Unit 3 | Data analysis: Introduction, Terminology and concepts, Introduction to statistics, Central tendencies and distributions, Variance, Distribution properties and arithmetic, Samples/CLT, Basic machine learning algorithms, Linear regression, SVM, Naive Bayes. |
| Unit 4 | Data Visualisation Using Matplotlib & Seaborn libraries : Scatter plot, line plot, bar plot, histogram, box plot, pie chart, pair plot |

| | |
|---------------|---|
| Unit 5 | Case Study Regression and Classification (use of any case study using a dataset) Regression datasets - Crime_in_india, Salary_Classification, Income_Data, Classification Datasets - Shopping_Mall,Social_Network_Ads |
|---------------|---|

MEEEM6001: Entrepreneurship Development (Humanities II)

| Teaching Scheme | | Evaluation Scheme | |
|------------------------|------------|--------------------------|----------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Total Credits | 3 | ISE II | 20 Marks |
| | | ESE | 60 Marks |

Course Objectives:

1. Interpreting information about support systems, skill sets, financial and risk covering institutions and other for building an enterprise so that budding entrepreneurs can make right decisions for starting and running a venture.
2. Articulating the entrepreneurial process of creating new businesses, role of Creativity and innovation in Entrepreneurial start-ups
3. Preparing a context of social innovation and social entrepreneurship and issues and practices of financing entrepreneurial businesses., and live cases of social, techno, women entrepreneurs

Course Outcomes:

After completing the course students will able to

| | |
|-----|--|
| CO1 | Articulate the value proposition of an Entrepreneurial venture. |
| CO2 | Evaluate a business plan to determine if it is complete and of investment grade; |
| CO3 | Demonstrate key entrepreneurial leadership qualities |
| CO4 | Determine the competitiveness of their business versus direct competitors by creating a competitive matrix |

Detailed Syllabus:

| | |
|----------------|--|
| UNIT -1 | Introduction to Entrepreneurship. Business ideas, Development of a Business plan |
| UNIT -2 | Establishing a small-scale enterprise, Functional strategies for new business, Overview of financial markets – Meaning and scope |
| UNIT -3 | Social entrepreneurship, Sustainability of non-profit organizations, Financing and risks in social enterprises, Business Strategies and Scaling up |

Approved in XXV IIIth Academic Council
Dated: 25th Jun 2024

| | |
|----------------|---|
| UNIT -4 | Entrepreneurial Management, managing growth, expansion and winding up of business, Valuation of a new company, corporate entrepreneurship, Entrepreneurship in the era of Globalization: Environment and Strategy |
| UNIT- 5 | Entrepreneurship, Creativity and Innovation, Centre of Innovation, Incubation and Entrepreneurship- An expert Interview, Entrepreneurship: Role of stimulating creativity, Creative teams and managerial responsibilities, Innovation and entrepreneurship: types and sources of innovation, Creativity and Innovations in Start Ups, Start-up Case Studies |

Approved in XXV IIIth Academic Council
Dated: 25th Jun 2024

ECEEM6002: Engineering Economics (Humanities II)

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|----------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Total Credits | 3 | ISE II | 20 Marks |
| | | ESE | 60 Marks |

Objectives:

- To built up the knowledge of managerial economics and analysis of project considering economical concepts.
- Expertise in costing, finance and accounting related to the organization. Able to do corporate planning

Course Outcome:

After completing the course, students will able to:

| | |
|-----|--|
| CO1 | Implement the knowledge of economics for costing, finance and accounting of engineering problems |
| CO2 | Execute economic analysis of Analyze engineering projects. |
| CO3 | Understand financial analysis of engineering projects and prepare project report. |
| CO4 | Understand various aspects of corporate planning |

Detailed Syllabus:

| | |
|----------------|--|
| UNIT- 1 | Engineering Economics and estimation: The principle and use of economic analysis in engineering practice. Discounted cash flow analysis, corporate tax and investment, Depreciation and economic studies, replacement analysis, valuation of assets. Estimating: Importance and aim, objectives, functions, Estimating Procedure, Constituents of Estimation. Concept of direct tax, indirect tax as GST. |
| UNIT -2 | Depreciation & break even analysis: Introduction, purpose, methods for calculating depreciation-straight line method, Diminishing balance method, sum of year digit method, machine hour basis method. Break even analysis: Introduction, assumptions in break even analysis, important terms and definitions, calculation of breakeven point, advantages and limitations. |
| UNIT- 3 | Economic analysis of projects: analysis of risks and uncertainty, elements of demand analysis and forecasting, production function, output and pricing decisions Labor costing: Introduction, factors influencing wage rate, methods of wage payments for direct and indirect labor-time wage system, Wage incentives: different plans, labor, indirect expenses |
| UNIT -4 | Costing: Definition, aims, procedure for Costing, types of costs, Costing controls, Control of Costs, Profit and Pricing Policy. Costing methodology for raw materials, Products and Services, Nature of Costs-Direct, Traceable and Non traceable. Determining of Cost of manufactured products, methods of overhead allocation |

| | |
|----------------|--|
| UNIT -5 | Corporate Planning: Corporate objectives, goals and policies, process of corporate planning, SWOT analysis, GAP analysis, strategy formulation, investment evaluation, capital budgeting, industrial dynamics, Business case development. |
|----------------|--|

Assessment: ISE I (Class Test), ISE II (TA) & ESE

Teacher Assessment:: Students will perform one or more of the following activities

1. Surprise Test
2. Assignment
3. Quiz
4. Any other activity suggested by course coordinator

MEEEM6003: Industrial Management (Humanities II)

| Teaching Scheme | | Evaluation Scheme | |
|-----------------|------------|-------------------|----------|
| Lectures | 3 Hrs/Week | ISE I | 20 Marks |
| Total Credits | 3 | ISE II | 20 Marks |
| | | ESE | 60 Marks |

Course Objectives:

1. Provide an overview of the principles, concepts, and importance of industrial management in modern business environments.
2. Examine techniques for maintaining and improving product and service quality.
3. Develop skills in formulating and implementing strategic plans for industrial organizations to achieve long-term objectives and stay competitive in the market.
4. Provide an overview of the role and importance of Management Information Systems in modern organizations, including their impact on decision-making, efficiency, and competitive advantage.
5. Introduce students to the fundamental concepts, theories, and models that underlie human resource development, including adult learning principles, organizational development, talent management, and performance improvement.

Course Outcomes:

After completing the course students will able to

| | |
|-----|---|
| CO1 | Understanding of fundamental concepts and theories related to industrial management. |
| CO2 | Acquire the ability to analyze complex industrial challenges |
| CO3 | Evaluate methodologies to ensure consistent product quality and process improvement. |
| CO4 | Examining human resources in various industrial setting |
| CO5 | Formulate and implement strategic plans that align with organizational goals and adapt to changing market dynamics. |

Detailed Syllabus:

| | |
|----------------|---|
| UNIT- 1 | Basics of Management: Introduction, Definition of management, characteristics of management, functions of management - Planning, Organizing, Staffing, Directing, Co-ordination, Controlling, Motivating, Communication, Decision Making, Principles of management – F.W.Taylor, Henry Fayol, Elton Mayo, Administration and management, Nature of management, levels of management, managerial skills, managerial roles, Forms of Organization- Line, Line –staff etc. Forms of ownerships – Partnership, Proprietorship, Joint stock, Co-operative society, Govt. Sector etc., concept of Globalization |
| UNIT -2 | Quality Management: Definition of quality, goalpost view of quality, continuous improvement definition of quality, types of quality – quality of design, conformance and performance, phases of quality management, Juran's and Demings view of quality, Quality Management Assistance Tools: Ishikawa diagram – Pareto Analysis – Pokka Yoke (Mistake Proofing). quality circles, TQM, Kaizen, Five S (5S), Six sigma Quality Management Standards (Introductory aspects only)- The ISO 9001:2000 Quality Management System Standard- The ISO 14001:2004 Environmental Management System Standard- ISO 27001:2005 Information Security Management System. |
| UNIT -3 | Strategic Management: Military origins of strategy Evolution - Concept and Characteristics of strategic management –Defining strategy – Mint berg's 5P's of strategy – Corporate, Business and Functional Levels of strategy - Strategic Management Process. |

ECIKS6001 Vedic Approach to Mathematics

| Teaching: Scheme | Examination Scheme | |
|---------------------|--------------------|----------|
| Lectures:02hrs/week | ISEI | 10 Marks |
| Credits:2 | ISEII | 10Marks |
| | ESE | 30 Marks |

Course description: This course is planned as Ability enhancement course. It is an exposure to the Engineering students about vedic Mathematics. Vedic Mathematics is a collection of Techniques/Sutras to solve mathematical arithmetics in easy and faster way. It consists of 16 Sutras (Formulae) and 13 sub-sutras (Sub Formulae) which can be used for problems involved in arithmetic, algebra, geometry, calculus, conics. By using Vedic maths, the problems are solved mentally with the use of few or some of steps which increase accuracy and reduce mistakes. Through the application of the sutras, it ensures both speed and accuracy and enhances computational skills. In this course some of the topics from Vedic Mathematics are introduced which are use full to Engineering Students.

Course Objectives:

The main objectives of the course are:

1. Multiply two or three digits numbers.
2. Compute the division by two and three digit divisors.
3. Check the divisibility by two or three digit numbers without actual division.
4. Evaluate square, cubes, square roots and cube roots of larger numbers within no time.
5. To factorise the quadratic expressions of single variable.
6. To find the Solution of Linear Simultaneous Equations

Course Outcomes

After completing the course, students will be able to:

| | |
|-----|---|
| CO1 | Do multiplication and division of two and three digit numbers by applying Sutras in Vedic Mathematics |
| CO2 | To factorise and find LCM/HCF of numbers by applying Sutras in Vedic Mathematics |
| CO3 | To solve Simultaneous Linear Equations by applying Sutras in Vedic Mathematics |

Detailed Syllabus:

| | |
|--------|--|
| Unit 1 | Multiplication : 1. Ekadhikenpurven method (multiplication of two numbers of two digits) 2. Eknunenpurven method (multiplication of two numbers of three digits) 3. Urdhvatiragbhyam method (multiplication of two numbers of three digits) 4. Nikhilam Navtashchramam Dashtaha (multiplication of two numbers of three digits) |
| Unit 2 | Division and Divisibility : Part A: Division 1. Nikhilam Navtashchramam Dashtaha (two digits divisor) 2. Paravartya Yojyet method (three digits divisor) Part B: Divisibility 1. Ekadhikenpurven method (two digits divisor) 2. Eknunenpurven method (two digits divisor) |
| Unit 3 | Factorisation /LCM/HCF |
| Unit 4 | Solution of Linear Simultaneous Equations : Simple equations, Simultaneous Simple Equations, Quadratic Equations, Cubic Equations, Simultaneous Quadratic Equations. |

| | |
|---------------|---|
| Unit 5 | Power and Root Power : (i) Square (two digit numbers), (ii) Cube (two digit numbers). (iii) Square root (four digit number) (iv) Cube root (six digit numbers) [Self Study and assignments] |
|---------------|---|

| CSDIS6001: Dissertation I | | | |
|---------------------------|-------------|-------------------|-----------|
| Teaching Scheme | | Evaluation Scheme | |
| Practical Hours | 20 Hrs/Week | ISE II | 100 Marks |
| Total Credits | 10 | ESE | 100 Marks |
| | | ESE | 100 Marks |

Course Description:
The dissertation shall consist of a report on research work done by the candidate or a comprehensive and critical review of any recent development in the subject or detailed report of the project work consisting of a work related to computer science & engineering that the candidate has to execute. The dissertation will consist of two parts as dissertation – I and dissertation – II.

Course Objectives:

1. To acquaint with the process of undertaking literature survey/industrial visit and identifying the problem
2. Able to define precise problem
3. To specify objectives on the basis of problem statement
4. To identify the research methodology processes and its implementation.

Course Outcomes:
After completing the course students will able to

| Course Outcomes | |
|-----------------|---|
| CO1 | Identify a practical problem from industry or research problem |
| CO2 | Review literature to identify gaps and define objectives & scope of the work to decide the problem definition |
| CO3 | Interpret the problem |

Detailed description:

1. Dissertation – I is an integral part of the dissertation work. In this, the student shall complete the preliminary work of the dissertation which will consist of problem statement, literature review, scheme of implementation, Layout and Design of the Set-up. The student is expected to complete the dissertation at least up to the design phase.
2. The candidate has to exhibit the continuous progress through regular reporting and presentations.
3. The candidates have to validate their work undertaken by submitting and/or publishing it at standard platforms – conference and/or peer reviewed journal.
4. The candidate shall submit the report of dissertation – I in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on literature study, work undergone, content delivery, presentation skills, documentation and report.
6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

| Course Outcomes | |
|-----------------|--|
| CO1 | Implement suitable research methodology |
| CO2 | Carryout experimentation responsibly and ethically |
| CO3 | Evaluate data and evidence of work |
| CO4 | Synthesize and write the project work |

Detailed description:

1. In Dissertation – II, the student shall consolidate and complete the remaining part of the dissertation which will consist of selection of research methodology, installations, implementations, testing, results, measuring performance, discussions using data tables considered for the improvement with existing/known algorithms/systems, comparative analysis, characterization and validation of results and conclusions.
2. The candidate has to exhibit the continuous progress through regular reporting and presentations.
3. The investigations and findings need to be validated appropriately at standard platforms one at conference and other in peer reviewed journal.
4. The candidate shall submit the report of dissertation – II in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the

guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on literature study, work undergone, results and conclusion, contribution, content delivery, presentation skills, documentation and report.

6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Format for Dissertation Report:

1. The total No. of minimum pages shall not be less than 50.
2. Plagiarism check by standard and approved software is must, and certificate shall be enclosed with the report.
3. Three report copies, loosely bound, shall be submitted in the department, one for examiner, one for supervisor and one for department.
4. The report shall be both side print hard bound. A hardbound report shall be made after examination by completing the examiner and guide's expected correction, before that report must be loosely bound.
5. For standardization of the reports the following format shall be strictly followed.

Page size: A4

Top Margin: 1"

Bottom Margin: 1"

Left Margin: 1.5"

Right Margin: 1.5"

Para Text: Times New Roman 12-point font

Line Spacing: 1.5 Lines

Page Numbers: Right aligned at footer. Font 10-point Times New Roman

Headings: 14-Points, Times New Roman, Boldface.

Index of Report

1. Title Sheet
2. Certificate (Institution) as per standard format. Certificate shall have signatures of Guide, External Examiner, HoD and Principal.
3. Certificate (Company, if sponsored by company)
4. Undertaking by candidate as per standard format
5. Acknowledgement
6. Table of Contents
7. List of abbreviations
8. List of Figures
9. List of Photographs / Plates
10. List of Tables
11. Abstract of the Dissertation
12. Introduction
13. Literature Survey / Theory
14. Design / Experimentation / Fabrication / Production / Actual work carried out for the same
15. Observation, Results Analysis and validation
16. Conclusion
17. References
18. List of papers published
19. Plagiarism check report

Assessment:

ISE II- Continuous Assessment of individual student

Maximum Marks-150

ESE – Viva Voce based on presentation and report
Maximum Marks-150
