

# **Government College of Engineering, Aurangabad**

**Chhatrapati Sambhajanagar**

**(An Autonomous Institute of Government of Maharashtra)**

**Station Road, Osmanpura, Aurangabad – 431005 (M.S.)**

**Phone – (0240) 2366101, 2366111, Fax (0240) 2332835**

## **DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING**

**SY B.TECH. (CSE) CURRICULUM  
STRUCTURE**

**FROM ACADEMIC YEAR 2024-25**

**As per NEP**

Approved in XXV IIIth Academic Council  
Dated: 25<sup>th</sup> Jun 2024

### **Vision of the Institute**

- In pursuit of global competitiveness, the institute is committed to excel in engineering education and research with concern for environment and society.

### **Mission of the Institute**

- Provide conducive environment for academic excellence in engineering education.
- Enhance research and development along with promotion to sponsored projects and industrial consultancy.
- Foster development of students by creating awareness for needs of society, sustainable development and human values.

### **Vision of the Computer Science & Engineering Department**

- To develop cultured and technically competent computer professionals and scholars with sustained growth in employability, high impact research outcome and become genuine asset to industry and society

### **Mission of the Computer Science & Engineering Department**

- Developing Creativity and Logical Reasoning amongst the learner
- Updating curricula according to industry requirements and standards
- Promote leadership quality, social accountability and ethics in disciplined environment, quality Education.
- Creating environment conducive to research

### **Program Outcomes**

Engineering Graduates will be able to:

- PO1: Apply knowledge of mathematics, science and algorithm in solving complex Computer engineering problems.
- PO2: Generate solutions by conducting experiments and applying techniques to analyze and interpret data.
- PO3: Design component, or processes to meet the needs within realistic constraints.
- PO4: Identify, formulate, and solve Software Engineering, Networking and Data Mining problems.
- PO5: Comprehend professional and ethical responsibility in computing profession.
- PO6: Express effective communication skills.
- PO7: Participate in global, economic, environmental, and societal context.
- PO8: Recognize the need for, and an ability to engage in life-long learning.
- PO9: Knowledge of contemporary issues and emerging developments in computing profession.
- PO10: Utilize the techniques, skills and modern computer Engineering tools, Software and techniques necessary for Engineering practice.
- PO11: Function effectively as an individual and as a member or leader in diverse teams

and in multidisciplinary settings.

- PO12: Design research problems and conduct research in computing environment.

### Program Specific Outcomes

- PSO1:-Ability to apply probability, statistics, programming applications and science in the development of computing solution in appropriate areas for system software, database, networking, web development, network security & Operating system.
- PSO2 :- Ability to apply standard practices & methods in software project management and development using suitable programming environment & tools to deliver a quality product for the industry.
- PSO3:-Able to apply ethical, social, professional, fields with proper communication skills & team work & pursue lifelong learning

### GENERAL COURSE STRUCTURE & THEME

#### A. Definition of Credit

|                                |            |
|--------------------------------|------------|
| 1 Hr. Lecture (L) per week     | 1 Credit   |
| 1 Hr. Tutorial (T) per week    | 1 Credit   |
| 1 Hr. Practical (P) per week   | 0.5 Credit |
| 2 Hours Practical (P) per week | 1 Credit   |

#### B. Total Credits for the completion of B.Tech. in Computer Science & Engineering:

The total number of credits proposed for the four-year B.Tech in Computer Science & Engineering (CSE) with 1 Multidisciplinary minor (Compulsory) degree is **176** as per the structure given below:

#### A. Semester wise Credit Distribution Structure for Four Year UG Program in Computer Science & Engineering with One Multidisciplinary Minor

| Semester | I | II | III | IV | V | VI | VI<br>I | VIII | Total<br>Credits |
|----------|---|----|-----|----|---|----|---------|------|------------------|
|----------|---|----|-----|----|---|----|---------|------|------------------|

|  |   |           |           |           |           |           |           |           |           |            |
|--|---|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|------------|
| Basic Science Course                               | BSC/ESC   | 8         | 8         |           | --        | --        | --        | --        | --        | 16         |
| Engineering Science Course                         |   | 7         | 7         |           | --        | --        | --        | --        | --        | 14         |
| Programme Core Course (PCC)                        | Program Courses                                 | --        | 02        | 11        | 11        | 6         | 12        | 8         | 0         | 50         |
| Programme Elective Course (PEC)                    |   | --        | --        |           |           | 04        | 08        | 08        | 0         | 20         |
| Multidisciplinary Minor (MD M)                     | Multidisciplinary Courses                       |           | -         | 04        | 03        | 04        | 03        | 0         | 00        | 14         |
| Open Elective (OE) Other than a particular program |   | --        | --        | 03        | 03        | 02        | --        | --        | --        | 08         |
| Vocational and Skill Enhancement Course (VSEC)     | Skill Courses                                   | 02        | 02        | --        | 02        | --        | 02        | --        | --        | 08         |
| Ability Enhancement Course (AEC -01, AEC-02)       | Humanities Social Science and Management (HSSM) |           | 02        |           | 02        | --        | --        | --        | --        | 04         |
| Entrepreneurship/Economics/ Management Courses     |   | --        |           | 02        | 02        | --        | --        | --        | --        | 04         |
| Indian Knowledge System (IKS)                      |   | 02        |           |           | --        | --        | --        | --        | --        | 02         |
| Value Education Course (VEC)                       |   | --        | --        | 02        | 02        | --        | --        | --        | --        | 04         |
| Research Methodology                               | Experiential Learning Courses                   | --        | --        | --        | --        | --        | --        |           | 04        | 04         |
| Comm. Engg. Project (CEP)/Field Project (FP)       |   | --        | --        | 02        | --        | --        | --        | -         | -         | 02         |
| Project  |   | --        | --        | --        | --        | --        | --        | 04        |           | 04         |
| Internship/ OJT                                    |   | --        | ---       |           |           | --        | --        |           | 12-       | 12         |
| Co-curricular Courses (CC)                         | Liberal Learning Courses                        | 02        | 02        |           | --        | --        | --        | --        | -         | 04         |
| <b>Total Credits (Major)</b>                       |   | <b>21</b> | <b>23</b> | <b>27</b> | <b>24</b> | <b>20</b> | <b>25</b> | <b>20</b> | <b>16</b> | <b>170</b> |

**Students can opt for any of the following as per the rules and regulations given by institute:**

1. B. Tech with one Multidisciplinary Minor = Total 170 Credits
2. B. Tech with one Multidisciplinary Minor and Honor in A.I.M.L / programming paradigm = Total 188 Credits
3. B. Tech with one Multidisciplinary Minor and Honor by Research = Total 188 Credits
4. B. Tech with two Multidisciplinary Minors = Total 184 Credits

**VOCATIONAL AND SKILL ENHANCEMENT COURSE (VSEC)**

## 7. MULTIDISCIPLINARY MINOR (MD M)and OPEN ELECTIVE (OE) OTHER THAN A PARTICULAR PROGRAM

List of Multidisciplinary Minor Courses from other faculties: Total 14 Credits as per GR

**Two courses of 4 credits and two courses of 3 credits.**

Open electives of 8 credits can be offered from these other faculties.

**Two courses of 3 credits and 01 course of 02 credits.**

| Specialization                       | Dramatics                   | Film Making                     | Fine Art                                | Music   |

|  |            | <b>End Semester Exam</b>  | 60 Marks |

Perquisites: Nil

Course Description: The course aims to equip the students with statistical tools and concepts that help in decision-making. This course is intended to provide engineering students a coherent and balanced account of probability and statistics that form the basis of many engineering analysis tools.

Course objectives:

Create interest in students in statistical thinking.

1. To understand, analyze, and solve problems on random variables statistics, significance testing and goodness of fit tests for probability distributions

Course Outcomes expected:

On completion of this course student should be able to:

| Course Outcomes |  |
|-----------------|--|
| CO1             | Define the basic concepts of probability distributions, random variable and sampling.  |
| CO2             | Explain the concepts of random variable, probability distributions and population parameters of large or small size sample.                          |
| CO3             | Apply the regression techniques (least square method) and correlation techniques to the sample data, testing hypothesis for small and large samples. |
| CO4             | Compute and interpret the results of bi-variate regression and correlation analysis, for forecasting.  |
| CO5             | to apply non-parametric tests for significance testing and goodness of fit of the probability distribution.  |

Detailed Syllabus:

|          |  |
|----------|--|
| Unit-I   | Basic Statistics: Measures of central tendency, dispersion, moments, skewness and kurtosis, correlation coefficient, lines of regression, curve fitting, method of least square, straight lines, second degree parabola, exponential and power curves.   |
| Unit-II  | Random Variables: Random variable, discrete random variables, Continuous random variables. definition of distribution and types of distribution: p.d.f, p.m.f, c.d.f. of random variables, characteristic function of random variables, univariate and bivariate distribution and its marginal distribution. |
| Unit-III | Mathematical Expectations: Mathematical expectation: definition and properties, mean, variance, standard deviation in terms of expectations, moment generating function, characteristics function.   |
| Unit-IV  | Probability distribution: Binomial distribution, Poisson distribution, normal distribution, chi-square distribution and student's t distribution.  |

|        |   |
|--------|---|
| Unit-V | <p>Sampling and Tests of Significance: Basic concepts sampling and its type (simple random, stratified and cluster), its needs; types of hypothesis, types of error, critical region; level of significance. Procedure of testing hypothesis, test of significance: large sample test for single proportion, difference of proportions, single mean, difference of means, and difference of standard deviations.</p> <p>Test for single mean, difference of means and correlation coefficients, test for ratio of variances - chi-square test for goodness of fit and independence of attributes.</p> |

## Mapping of Course outcome with Program Outcomes

| Course Outcome | P O 1 | P O 2 | P O 3 | P O 4 | P O 5 | P O 6 | P O 7 | P O 8 | P O 9 | PO 10 | PO 11 | PO 12 |
|----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| CO1            | 3     | 2     |       | 2     |       |       |       |       |       |       |       | 1     |
| CO2            | 3     | 2     |       | 2     |       |       |       |       |       |       |       | 1     |
| CO3            | 3     | 2     |       | 2     | 2     |       |       |       |       |       |       | 1     |
| CO4            | 3     | 3     |       | 3     |       |       |       |       |       |       |       | 1     |
| CO5            | 3     | 3     |       | 3     |       |       |       |       |       |       |       | 1     |

3 – High, 2 – Medium, 1 – Low

### Teaching Strategies:

The teaching strategy planned through the lectures, and team based home works. Exercises assigned weekly to stimulate the students to actively use and revise the learned concepts, which also help the students to express their way of solving the problems fluently in written form. Most critical concepts and mistakes emphasized

Teacher's Assessment: Teacher's assessment of 10 marks based on the following.

- 1) Home assignments
- 2) Surprise tests with multiple choice questions.

Assessment: ISE-I, ISE-II, ISE-III (Class Test-1, Class Test-2, TA) & ESE

TA: Students will perform one or more of the following activities

1. Surprise Test
2. Assignment using Mathematical tools like Mathematica / MatLab or similar.
3. Quiz
4. Any other activity suggested by course coordinator

Assessment Pattern:

| Assessment Pattern Level No. | Knowledge Level | ISE I (Class Test-1) | ISE II (Class Test-2) | ISE III (TA+Surprise Test) | End Semester Examination |
|------------------------------|-----------------|----------------------|-----------------------|----------------------------|--------------------------|
| K1                           | Remember        | 01                   | 03                    |                            |                          |
| K2                           | Understand      | 14                   | 12                    | 10                         | 60                       |
| K3                           | Apply           |                      |                       |                            |                          |
| K4                           | Analyze         |                      |                       |                            |                          |
| K5                           | Evaluate        |                      |                       |                            |                          |
| K6                           | Create          |                      |                       |                            |                          |
| Total Marks 100              |                 | 15                   | 15                    | 10                         | 60                       |

**Perquisites: None**

**CourseDescription:**

This course represents a conceptual and practical introduction to organizing data computers so that it can be used efficiently. The course is designed to develop skills to design and analyze simple linear and non linear data structures. It strengthens the ability of the students to identify and apply the suitable data structure for the given real world problem. It enables them to gain knowledge in practical applications of data structures. This course introduces concepts like ADT, stack, queue, linked lists, tree, graph, sorting technique and searching technique.

**Course Outcomes:**

After Successful Completion The Course,students will be able to:

| Course Outcomes |  |
|-----------------|--|
| CO1             | Describe the concept of data abstraction and data structures like stack,queue. |
| CO2             | Implement Various Linear Data Structures Like Stacks,queues,linked lists.      |
| CO3             | Implement andtraversevariousnonlineardatastructuresliketreesandgraphs.         |
| CO4             | Analyze Compare various searching and sorting techniques.                      |
| CO5             | Develop User defined data structures in a high level language.                 |

**Detailed Syllabus:**

|        |  |
|--------|--|
| Unit 1 | <b>Introduction To Data Structure, Stack Queues:</b> Data structure - linear and nonlinear, abstract data typeAlgorithm, The stack as an ADT, stack applications - Basic Definition and examples: Infix, Postfix, and Prefix, Program to evaluate a Postfix expression, Limitations of the program,The queue and its sequential representation, The queue as an ADT. |
| Unit 2 | <b>Linear Data Structure &amp; their representation:</b> Definition, concept, operation on   |

|               |  |
|---------------|--|
|               | linked lists, Circular linked lists, Doubly linked lists, Operations Like Insertion, deletion, insertion order, searching, updating, Application Of linked list such a polynomial manipulation, Comparison Singly Linked, circularly linked list & doubly linked list.   |
| <b>Unit 3</b> | <b>Trees:</b> Definition, Basic terminology, operation binary trees, linked storage representation for binary search trees, Basic operation on binary search tree such as creating a binary search tree, searching, modifying an element, inserting & deleting the element, destroy a binary search tree, tree traversals ,in-order, pre-order, post-order ,tree application for expression evaluation & for solving sparse matrices, height balanced trees 2-3 tree, B trees, B+ trees. |
| <b>Unit 4</b> | <b>Graphs:</b> Definition, Basic Terminology, matrix representation implementation of graphs, graph Traversals, DFS, BFS, shortest Path, spanning tree.  |
| <b>Unit 5</b> | <b>Sorting &amp; searching and hashing techniques:</b> Different sorting tech, classification on the basis of big-O notation, tech such as straight selection sort, bubble sort, merge sort, quick sort, heap sort, shell sort, radix sort, comparisons between different sorting techniques. Sequential Searching, binary searching, Hashing Techniques.  |

### Mapping of Course outcomes with Program Outcomes and Program Specific Outcomes:

| Course outcome | Program Outcomes |      |      |      |     |     |      |      |      |      |       |       | PSO's |       |       |
|----------------|------------------|------|------|------|-----|-----|------|------|------|------|-------|-------|-------|-------|-------|
|                | PO 1             | PO 2 | PO 3 | PO 4 | PO5 | PO6 | PO 7 | PO 8 | PO 9 | PO10 | PO1 1 | PO1 2 | PSO 1 | PSO 2 | PSO 3 |
| <b>CO1</b>     | 3                | 3    |      |      |     |     |      | 2    |      |      |       |       | 2     | 2     |       |
| <b>CO2</b>     | 2                | 3    |      |      |     |     |      | 2    |      | 2    |       |       | 3     | 2     |       |
| <b>CO3</b>     | 2                | 3    |      |      |     |     |      | 2    |      | 2    |       |       | 3     | 2     |       |
| <b>CO4</b>     | 2                | 3    |      |      | 1   |     |      | 2    | 1    | 2    |       |       | 1     | 2     |       |
| <b>CO5</b>     | 1                | 3    |      |      | 1   |     |      | 2    | 1    | 2    |       | 2     | 1     | 2     |       |

### 3-High 2-Medium 1-Low

#### Assessment:

**ISE I and ISE II:** In Semester evaluations(ISE I and ISE II) of 15 marks, each will be based on ClassTest I and Class Test II respectively

**ISEIII:** Teachers Assessment of 10 marks is based on one of the/or combination of few of the following:

1. Quiz
2. Assignments
3. Question and answer
4. PowerPoint presentation

**Assessment Pattern:**

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | ISE III | End Semester Examination |
|------------------------------|-----------------|-------|--------|---------|--------------------------|
| K1                           | Remember        | 00    | 00     | 00      | 10                       |
| K2                           | Understand      | 10    | 05     | 02      | 15                       |
| K3                           | Apply           | 05    | 05     | 02      | 15                       |
| K4                           | Analyze         | 00    | 05     | 02      | 15                       |
| K5                           | Evaluate        | 00    | 00     | 02      | 05                       |
| K6                           | Create          | 00    | 00     | 02      | 00                       |
| <b>Total Marks 100</b>       |                 | 15    | 15     | 10      | 60                       |

| Assessment Tool                  | K1, K2   | K3                 |
|----------------------------------|----------|--------------------|
|                                  | CO1, CO2 | CO2, CO3, CO4, CO5 |
| <b>ISE I (15 Marks)</b>          | 10       | 05                 |
| <b>ISE II (15 Marks)</b>         | 00       | 15                 |
| <b>ISE III (10 Marks)</b>        | 05       | 05                 |
| <b>ESE Assessment (60 Marks)</b> | 30       | 30                 |
| <b>Total Marks 100</b>           |          |                    |

**Prerequisite: None**

**Course Description:** Topics will include what an operating system does, management of the CPU, memory, processes and devices with exposure to android operating system.

**Course Outcomes:**

After Successful Completion The Course, students will be able to:

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Differentiate Between Multiprocessing, multiprogramming, and multitasking. |
| <b>CO2</b>             | Differentiate Between Programs, processes and threads.                     |
| <b>CO3</b>             | Apply Segmentation And Paging Techniques                                   |
| <b>CO4</b>             | Compare Naming in Linux and Windows.                                       |
| <b>CO5</b>             | Explain Android Operating System   |

**Detailed Syllabus:**

|               |  |
|---------------|--|
| <b>Unit 1</b> | <b>Fundamentals of Operating System:-</b> OS services and Components, Multitasking, Multiprogramming, Multiprocessing Time Sharing, Buffering, Spooling, Distributed OS.   |
| <b>Unit 2</b> | <b>Process management and synchronization:</b> Process concept, process scheduling, operation on process, interprocess communication, example of IPC systems and communication in client-server systems. Process Scheduling: Basic Concepts, scheduling criteria, scheduling algorithm, algorithm evaluation. Process Coordination Synchronization : Background, the critical section problem, Peterson's solution, synchronization hardware, semaphores, classic problems of Synchronization. Deadlock: System Model, deadlock characterization, methods for handling deadlocks, deadlock prevention, deadlock avoidance, deadlock detection. |
| <b>Unit 3</b> | <b>Memory Management &amp; virtual memory:</b> Memory partitioning, Swapping, Paging, Segmentation, Virtual memory Overlays, Demand paging, Performance of   |

|               |   |
|---------------|---|
|               | Demand paging, Virtual memory concepts, Page Replacement Algorithms, Allocation Algorithms, Example OS : Linux  |
| <b>Unit 4</b> | <b>I/O Systems</b> Secondary Storage Structure, Disk Structure, Disk Scheduling, Disk Management, Swap-space management, Disk Reliability, Stable Storage Implementation, Introduction To clock, Clock hardware, Clock software |
| <b>Unit 5</b> | <b>File Systems:</b> File concept, File support, Access methods, Allocation Methods, Directory systems, File protection, Free space management<br>Example OS: Linux, Case Study: Android OS                                     |

| Course outcome | Program Outcomes |     |     |     |     |     |     |     |     |      |      |      | PSO's |      |      |
|----------------|------------------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|-------|------|------|

### Course Outcome:

After studying this course, students will be able to

| Course Outcomes |  |
|-----------------|--|
| CO1             | To get an understanding of machine learning techniques for text classification and clustering. |
| CO2             | To study the various probability-based learning techniques.                                    |
| CO3             | To apply the core skills in visualization for time series, data analysis..//11>                |
| CO4             | Apply statistical and other research tools to analyze and interpret data.                      |
| CO5             | To understand the role and stages of data science projects.                                    |

### Detailed Syllabus:

|               |  |
|---------------|--|
| <b>Unit 1</b> | <b>Introduction:</b> What Is Data Science? Where Do We See Data Science? How Does Data Science Relate to Other Fields? The Relationship between Data Science and Information Science, Computational Thinking, Skills for Data Science, Tools for Data Science, Issues of [Ethics, Bias, and Privacy in Data Science. |
| <b>Unit 2</b> | <b>Data:</b> Introduction, Types of Data, Structured Data, Unstructured Data, Challenges with Unstructured Data, Data Collection, Data Pre-processing, Data Cleaning, Data Integration, Data Transformation, Data Reduction, Data Discretization.  |
| <b>Unit 3</b> | <b>Techniques:</b> Data Analysis and Data Analytics, Descriptive Analysis, Diagnostic Analytics, Predictive Analytics, Prescriptive Analytics, Exploratory Analysis, Mechanistic Analysis.   |
| <b>Unit 4</b> | <b>Tools for Data Science:</b> Introduction to Python Getting Access to Python , Getting Started with Python Basics, Control Structures, Functions, Importing Data, Graphics and Data Visualization, Numpy and jupyter notebook Plotting the Data, Statistics .  |
| <b>Unit 5</b> | <b>Applications, Evaluations, and Methods:</b>   |

|  |   |
|--|---|
|  | <p><b>Data Collection Methods:</b> Introduction to Quantitative and Qualitative Methods</p> <p><b>Evaluation:</b> Comparing Models, Training–Testing and A/B Testing, Cross-Validation</p> <p><b>Hands-On with Solving Data Problems:</b> Collecting and Analyzing Twitter / YouTube Data</p> |
|--|---|

|                                 |             | <b>ESE</b>                | 60 MARKS |

**Prerequisites: None**

**Course Description:** C programming covers basic to advanced concepts like variables, arrays, pointers, strings, loops, etc. This C Programming is designed to learn and enhance their knowledge of the C programming language.

**Course Outcomes:**

After successful completion the course, students will be able to:

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Describe the fundamentals of C programming Language.                               |
| <b>CO2</b>             | Apply appropriate Control structures to solve problems.                            |
| <b>CO3</b>             | Describe the concept of Arrays and Strings.  |
| <b>CO4</b>             | Write User defined functions and apply the concept of recursion to solve problems. |
| <b>CO5</b>             | Describe the concept of Pointers, Structures and implement operations on files     |

**Detailed Syllabus:**

|                          |  |
|--------------------------|--|
| <p><b>Unit<br/>1</b></p> | <p><b>Overview of C:</b> History and importance of C, Basic structure of C program, executing a C program.<br/> <b>Constants, Variable and Data Types:</b> Introduction, Character Set, C Tokens, Keywords and Identifiers, Constants, Variables, Data Types, Declaration of Variables, Assigning Values to Variables, Defining Symbolic Constants.<br/> <b>Operators and Expressions:</b> Introduction, Arithmetic Operators, Relational Operators, Logical Operators, Assignment Operators, Increment and Decrement Operators, Conditional Operator, Bitwise Operators, Special Operators, Arithmetic Expressions, Evaluation of Expressions, Precedence of operators.</p> |
| <p><b>Unit<br/>2</b></p> | <p><b>Decision Making and Branching:</b> Introduction, Decision Making with IF Statement, Simple IF Statement, the IF-ELSE Statement, Nesting of IF-ELSE Statements, The ELSE IF Ladder, The Switch statement, The ? : Operator, The goto statement.<br/> <b>Decision Making and Looping:</b> Introduction, The while Statement, The do statement, The for statement, Jumps in LOOPS.</p>  |
| <p><b>Unit<br/>3</b></p> | <p><b>Arrays:</b> One-dimensional Arrays, Declaration of One-dimensional Arrays, Initialization of One-dimensional Arrays, Example programs- Bubble sort, Selection sort, Linear search, Binary search, Two-dimensional Arrays, Declaration of Two-dimensional Arrays, Initialization of Two-dimensional Arrays, Example programs-Matrix Multiplication, Transpose of a matrix.<br/> <b>Character Arrays and Strings:</b> Declaring and Initializing String Variables, Reading Strings from Terminal, Writing Strings to Screen, Arithmetic Operations on Characters, String-handling Functions, Example Programs (with and without using built-in string functions)</p>     |
| <p><b>Unit<br/>4</b></p> | <p><b>User-defined Functions:</b> Need for functions, Elements of User-defined Functions, Definition of Functions, Return Values and their Types, Function Calls, Function Declaration, Category of Functions, No Arguments and no Return Values, Arguments but no Return values, Arguments with Return Values, No Arguments but Returns a Value, Passing Arrays to Functions, Recursion, The Scope, Visibility and Lifetime of variables.<br/> <b>C Pointers:</b> Introduction, Declaring Pointer Variables, Initialization of Pointer variables, accessing a Variable through its Pointer.</p>   |
| <p><b>Unit<br/>5</b></p> | <p><b>Structures:</b> Introduction, Defining a structure, declaring structure variables, accessing structure members, structure initialization.<br/> <b>File Management in C:</b> Introduction, Defining and opening a file, closing a file, Input/output and Error Handling on Files.</p>   |

**3 - High 2 – Medium 1 –Low**

**Assessment:**

**ISE I and ISE II:** In semester evaluations (ISE I and ISEI II) of 15 marks, each will be based on Class Test I and Class Test II respectively.

**ISE III:** Teachers Assessment of 10 marks is based on one of the / or combination of few of the following:

- 1) Quiz
- 2) Assignments
- 3) Question and answer
- 4) PowerPoint presentation

**Assessment Pattern:**

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | ISE III | End Semester Examination |
|------------------------------|-----------------|-------|--------|---------|--------------------------|
| K1                           | Remember        | 05    | 00     | 00      | 10                       |
| K2                           | Understand      | 05    | 05     | 00      | 10                       |
| K3                           | Apply           | 05    | 05     | 00      | 10                       |
| K4                           | Analyze         | 00    | 05     | 05      | 10                       |
| K5                           | Evaluate        | 00    | 00     | 00      | 20                       |
| K6                           | Create          | 00    | 00     | 05      | 00                       |

**Course Outcomes:**

After completion of this course students will be able to:

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Implement Linear Data Structures Like Stack, and queue.                          |
| <b>CO2</b>             | Implement Linear Data Structures Like Linked Lists (Singly, Circular and Double) |
| <b>CO3</b>             | Implement and traverse nonlinear data structures like graphs and trees.          |
| <b>CO4</b>             | Demonstrate And Compare Different searching and sorting algorithms.              |

**List of The Experiments:** The student shall perform a minimum of the experiments of the following using C or C++

| Sr. No.                    | Title of the Experiments  | Skill / Knowledge Level | CO  | Marks for ISE |
|----------------------------|---|-------------------------|-----|---------------|
| <b>Level:Basic(all)</b>    |   |                         |     |               |
| 1                          | Implement The Stack And Use It To Solve the Postfix expression.                   | S1                      | CO1 | 02            |
| 2                          | Implement The Circular Queue.   | S2                      | CO1 | 02            |
| 3                          | Implement a Singly Linked List.   | S2                      | CO2 | 03            |
| 4                          | Implement a Circular Linked List.   | S1                      | CO2 | 02            |
| 5                          | Implement a Doubly Linked list.   | S2                      | CO2 | 03            |
| <b>Level:Moderate(all)</b> |   |                         |     |               |
| 6                          | Write A Program To Implement Merge Sort And bubble sort.                          | S2                      | CO4 | 02            |
| 7                          | Write A Program To Implement Quicksort.   | S2                      | CO4 | 02            |
| 8                          | Write A Program To Implement Binary Search tree and apple tree traversal methods. | S2                      | CO3 | 02            |
| 9                          | Write A Program To Implement Insertion Sort.                                      | S2                      | CO4 | 01            |
| <b>Level:Complex(all)</b>  |   |                         |     |               |
| 10                         | Write A Program To Implement Graph. And traverse graph by DFS.                    | S2                      | CO3 | 03            |
| 11                         | Write A Program To Implement Graph. And traverse graph by BFS.                    | S2                      | CO3 | 03            |

| TotalCredits                    | 01         | EndSemesterExam    | 25 Marks |

Total Hours required for this practical course: 30 Hours.

**Prerequisites:** Programming Language, Data Structures

**Course Outcome:**

After completion of this course students will be able to

|     | Course Outcomes   |
|-----|---|
| CO1 | Exposure to different OS  |
| CO2 | Awareness of concepts of multiprogramming, multithreading and multitasking    |
| CO3 | Demonstration of memory management algorithms                                 |
| CO4 | Demonstration of file-handling concepts by implementing suitable algorithms.  |
| CO5 | Awareness of computational issues, and resources in distributed environments. |

**List of Experiments:**

The student shall perform a minimum of the experiments of the following

| Sr. No. | Title of the experiments   |
|---------|--|
| 1       | Comparative Study of Different Operating Systems                                       |
| 2       | Demonstration of multitasking concept.   |
| 3       | Implementing various process creation algorithms(FCFS, SJF and Round-Robin Scheduling) |
| 4       | Implementation of memory allocation policies.  |

|    |   |
|----|---|
| 5  | Implementing Page replacement algorithms(FIFO,LIFO)       |
| 6  | Implementing segmentation algorithms                      |
| 7  | Implementing file-handling algorithms                     |
| 8  | Implementing file-handling algorithms                     |
| 9  | Implementing file-handling algorithms                     |
| 10 | Demonstration of working in a distributed OS environment. |

**Assessment:**

**ISE I:** In-Semester Evaluation of 25 marks based on performance of students' impractical hours, practical assignments completed, and timely submission

**Assessment Table: Assessment Pattern:**

### Course Outcomes:

After completion of this course students will be able to:

|            | <b>Course Outcomes</b>  |
|------------|---|
| <b>CO1</b> | Understand the development environment for compiling, debugging, linking and executing a C program.                                     |
| <b>CO2</b> | Analyzing the complexity of problems related to arrays , Modularize the problems into small modules and then convert them into programs |
| <b>CO3</b> | Apply the in-built functions and customized functions for solving the problems.   |
| <b>C</b>   | Designing programs to use library functions for string handling   |
| <b>C</b>   | Demonstrate file handling in C  |

### List of the Experiments:

The student shall perform minimum ten experiments of the following using Oracle databases.

| Sr. No.                   | Title of the Experiments  | CO           | Marks for ISE |
|---------------------------|---|--------------|---------------|
| <b>Level: Basic (all)</b> |   |              |               |
| 1                         | a) Write a C program to find sum and average of three numbers.<br><br>b) Write a C program to find the sum of individual digits of a given positive integer.<br><br>c) Write a C program to generate the first n terms of the Fibonacci sequence. | CO1          | 02            |
| 2                         | a) Write a C program to check whether a given number is perfect number or Not.<br><br>b) Write a C program to check whether a given number is strong number or not.   | CO1          | 02            |
| 3                         | a) Write a C program to find both the largest and smallest number in a list of integers.<br><br>b) Write a C Program to Sort the Array in an Ascending Order.   | CO2,CO3      | 03            |
| <b>Level: Moderate</b>    |   |              |               |
| 4                         | a) Write a C program to perform addition of two matrices.<br><br>b) Write a C program that uses functions to perform Multiplication of Two Matrices.  | CO2          | 03            |
| 5                         | a) Write a C program to use function to insert a sub-string in to given main string from a given position.  | CO2, CO3,CO4 | 03            |
| <b>Level: Complex</b>     |   |              |               |

|   |   |         |    |
|---|---|---------|----|
| 6 | <p>a) Write a C program that uses functions and structures to perform the following operations:</p> <p>i) Reading a complex number</p> <p>ii) Writing a complex number</p> <p>iii) Addition of two complex numbers</p> <p>iv) Multiplication of two complex numbers</p> | CO3,CO4 | 06 |
| 7 | <p>a) Write a C program to copy the contents of one file to another.</p> <p>b) Write a C program to merge two files into a third file.</p>  | CO5     | 06 |

**Assessment:**

**ISEI:** In-Semester Evaluation of 50 marks based on performance of students in practical hours, practical assignments completed, and timely submission.

**Assessment Table:**

|                                  |     |              |
|----------------------------------|-----|--------------|
| Assessment Tool                  |     |              |
|                                  | CO1 | CO2,C03, CO4 |
| <b>ISE1/</b> Term work(25 marks) | 4   | 21           |
| <b>ESE</b> (25 Marks)            | 4   | 21           |

| <b>Tutorial: 00 hrs/ week</b>            | <b>ISE II*</b>                  | <b>15 Marks</b> |
| <b>Credits: 03</b>                       | <b>ISE III*</b>                 | <b>10 Marks</b> |
|  | <b>End Semester Examination</b> | <b>60 Marks</b> |

**Prerequisites:** Basic Knowledge of Science and Technology, English Language

**Course description:** The objective of this Course is to provide new ways of creative thinking and Learn the innovation cycle of the Design Thinking process for developing innovative products that are useful for a student in preparing for an engineering career.

**Course Outcomes:**

After completing the course, students will able to:

|     | <b>Course Outcomes</b>  |
|-----|---|
| CO1 | 1. Compare and classify the various learning styles and memory techniques and Apply them in their engineering education.                                |
| CO2 | 2. Analyze emotional experience and Inspect emotional expressions to better understand users while designing innovative products.                       |
| CO3 | 3. Develop new ways of creative thinking and Learn the innovation cycle of Design Thinking process for developing innovative products.                  |
| CO4 | 4. Propose real-time innovative engineering product designs and Choose appropriate frameworks, strategies, and techniques during prototype development. |
| CO5 | 5. Perceive individual differences and their impact on everyday decisions and further Create a better customer experience.                              |

**Detailed Syllabus:**

|               |  |
|---------------|--|
| <b>Unit 1</b> | <b>Learning and Memory:</b> Introduction: Design Thinking, Evolution history, the Business context of innovation for applying design thinking, Sensory learning, Retention, Assessment, Evaluation and Interpretation. Learning and Memory; Kolb's learning styles. Memory process, Problems in retention, Memory enhancement techniques.  |
| <b>Unit 2</b> | <b>Role of Emotions:</b> Understanding Emotions; Experience & Expression, Assessing Empathy, Application with Peers. Basics of Design Thinking; Definition of Design Thinking, Need for Design Thinking, Objective of Design Thinking, Concept of Brainstorming, Stages of Design Thinking Process (explain with examples) – Empathize, Define, Ideate, Prototype, Test.   |
| <b>Unit 3</b> | <b>Being Ingenious &amp; Fixing Problem:</b> Understanding Creative Thinking Process, Understanding Problem Solving, Testing Creative Problem Solving. Process of Product Design; Design Thinking Approach, Stages of Product Design, Examples of best product designs and functions, <b>Assignment – Engineering Product Design</b>   |
| <b>Unit 4</b> | <b>Prototyping &amp; Testing:</b> What is Prototype? Why Prototype? Rapid Prototype Development Process, Testing; Sample Example, Test Group Marketing, Celebrating the Difference. (Understanding Individual differences & Uniqueness, Group Discussion and Activities to encourage the understanding, acceptance and appreciation of Individual differences )  |
| <b>Unit 5</b> | <b>Design Thinking &amp; Customer Centricity:</b> Practical Examples of Customer Challenges, Use of Design Thinking to Enhance Customer Experience, Parameters of Product experience, Alignment of Customer Expectations with Product Design. Feedback, Re-Design & Re-Create Feedback loop, Focus on User Experience, Address ergonomic challenges, User focused design, rapid prototyping & testing, final product. ( Final Presentation – “Solving Practical Engineering Problem through Innovative Product Design & Creative Solution”.) |

**Course description:**

Approved in XXV IIIth Academic Council

Dated: 25<sup>th</sup> Jun 2024

The objective of the course is fourfold:

1. Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

#### Course Outcomes

By the end of the course, students are expected to become more aware of themselves, and their surroundings (family, society, nature); they would become more responsible in life, and handling problems with sustainable solutions, while keeping human relationships and human nature in mind. They would have better critical ability. They would also become sensitive to their commitment towards what they have understood (human values, human relationship and human society). It is hoped that they would be able to apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction.

This is only an introductory foundational input. It would be desirable to follow it up by

- a) faculty-student or mentor-mentee programs throughout their time with the institution
- b) Higher level courses on human values in every aspect of living. E. g. as

aprofessional

**Detailed Syllabus:**

|        |  |
|--------|--|
| Unit 1 | <p><b>Course Introduction - Need, Basic Guidelines, Content and Process for Value Education</b></p> <p>Purpose and motivation for the course, recapitulation from Universal Human Values-I Self-Exploration–what is it? - Its content and process; ‘Natural Acceptance’ and Experiential Validation- as the process for self-exploration. Continuous Happiness and Prosperity- A look at basic Human Aspirations. Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario. Method to fulfil the above human aspirations: understanding and living in harmony at various levels.</p> <p><b>Home Work :</b> Include practice sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co- existence) rather than as arbitrariness in choice based on liking-disliking</p> |
|--------|--|

|               |   |
|---------------|---|
| <p>Unit 2</p> | <p><b>Understanding Harmony in the Human Being - Harmony in Myself!</b></p> <p>Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’. Understanding the needs of Self (‘I’) and ‘Body’ - happiness and physical facility. Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer). Understanding the characteristics and activities of ‘I’ and harmony in ‘I’. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail. Programs to ensure Sanyam and Health.</p> <p><b>Home Work :</b> Include practice sessions to discuss the role others have played in making material goods available to me. Identifying from one’s own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease</p>  |
| <p>Unit 3</p> | <p><b>Understanding Harmony in the Family and Society- Harmony in Human- Human Relationship</b></p> <p>1 Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship. Understanding the meaning of Trust; Difference between intention and competence. Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship. Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals. Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family.</p> <p><b>Home Work :</b> Include practice sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students’ lives.</p> |
| <p>Unit 4</p> | <p><b>Understanding Harmony in the Nature and Existence - Whole existence as Coexistence</b></p> <p>Understanding the harmony in the Nature. Interconnectedness and mutual fulfilment among the four orders of nature: recyclability and self-regulation in nature. Understanding Existence as Co-existence of mutually interacting units in all pervasive space. Holistic perception of harmony at all levels of existence.</p>  |

|                        |  |
|------------------------|--|
|                        | <p><b>Home Work :</b> Include practice sessions to discuss human being as cause of imbalance in nature (film “Home” can be used), pollution, depletion of resources and role of technology etc.</p>  |
| <p>U<br/>nit<br/>5</p> | <p><b>Implications of the above Holistic Understanding of Harmony on Professional Ethics</b><br/> Natural acceptance of human values. Definitiveness of Ethical Human Conduct. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order.<br/> Competence in professional ethics:<br/> a. Ability to utilize the professional competence for augmenting universal human order.<br/> b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems,<br/> c. Ability to identify and develop appropriate technologies and management patterns for above production systems.</p> <p><b>Some Case Studies can be given as home work</b> Case studies of typical holistic technologies, management models and production systems Strategy for transition from the present state to Universal Human Order:</p> <p>a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers</p> <p>b. At the level of society: as mutually enriching institutions and organizations</p> <p>Sum up.</p> <p><b>Home Work:</b> Include practice Exercises and Case Studies will be taken up in Practice Sessions eg. To discuss the conduct as an engineer or scientist etc.</p> |

MODE OF CONDUCT

Lectures hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them..While analysing and discussing the topic, the faculty mentor's role is in pointing to essential elements to help in sorting them out from the surface elements. In other words, help the students explore the important or critical elements. Such observations and their analyses are shared and discussed with other students and faculty mentor, in a group sitting. Tutorials (experiment or practical) are important for the course. The difference is that the laboratory is everyday life, and practical are how you behave and work in real life. Depending on the nature of topics, worksheets, home assignment and/or activity are included. The practice sessions (tutorials) would also provide support to a student in performing actions commensurate to his/her beliefs. It is intended that this would lead to development of commitment, namely behaving and working based on basic human values. It's Recommended That this content be placed before the student as it is, in the form of a basic foundation course, without including anything else or excluding any part of this content. Additional content may be offered in separate, higher courses.

**This course is to be taught by faculty from every teaching department, including HSS faculty.**

**Teacher preparation with a minimum exposure to at least one 8-day FDP on Universal Human Values is deemed essential.**

| <b>Credits: 02</b>            | <b>End Semester Examination</b> | <b>30 Marks</b> |

**Prerequisites:** Knowledge of common terminology and basic language

**Course description:** The course is designed to provide a basic understanding of the psychology of human behavior to the students. The students will be given exposure to various key concepts, terminology, principles and theories that comprise an introductory psychology course.

**Course Outcomes:**

After successful completion of the course, students will be able to:

| <b>Course Outcomes</b> |   |
|------------------------|---|
| <b>CO1</b>             | Define the term Psychology and demonstrate command of the basic terminology.                  |
| <b>CO2</b>             | Gain scientific knowledge of data collection and understanding basics of psychology research. |
| <b>CO3</b>             | Differentiate between physical and mental well-being. Manage stress and disorders of health.  |
| <b>CO4</b>             | Understand the social and psychological community behaviour.                                  |

**Detailed Syllabus:**

|               |  |
|---------------|--|
| <b>Unit 1</b> | Introduction to Psychology: Concept and definition, Roots of psychology. Key Perspectives; Behavioral, cognitive, psycho-dynamic, humanistic and sociocultural.                  |
| <b>Unit 2</b> | Methods in Psychology: Natural observation, survey and case study; Nature advantages and limitations. Experimental and correlational methods; Nature advantages and limitations. |
| <b>Unit 3</b> | Psychology of Health: Understanding stress and its various causes, manifestation as disorders, depression in social and industrial environments.                                 |

| <b>TotalCredits</b>            | <b>02</b>         | <b>End Semester Exam</b>  | <b>50 Marks</b> |

### **Course Description:**

A mini project is an assignment that you try to complete at the end of every semester, especially in engineering to strengthen the understanding of your fundamentals through effective application of theoretical concepts.

### **Course Outcomes:**

After successful completion of the course, students will be able to:

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Identify area of interest/problem domain.                        |
| <b>CO2</b>             | Collect related latest standard research papers and analyze them |
| <b>CO3</b>             | Apply & use the required Toolbox/algorithms.                     |
| <b>CO4</b>             | Apply the functions to solve problems / implement algorithms.    |
| <b>CO5</b>             | Develop a solution and test it.                                  |

**This project should develop one of the following technology which is not limited to:**

1. Cloud Computing
2. Android-Based Application
3. Computer Vision System
4. Image Processing
5. Neural Network
6. Bioinformatics
7. Data Analytics
8. Natural Language Processing
9. Soft Computing
10. Big data

**Assessment:**

**ISE I and ESE:** In semester evaluations 25 marks, each will be based on evaluation of algorithms & tools or tool box with a group of 3 to 4 students. Final submission will be based on their project evaluation with Output.

**Assessment Pattern:**

| Assessment Pattern Level No. | Skill Level    | Term Work | Practical Examination & viva voce |
|------------------------------|----------------|-----------|-----------------------------------|
| S1                           | Imitation      | 10        | 10                                |
| S2                           | Manipulation   | 10        | 10                                |
| S3                           | Precision      | 10        | 10                                |
| S4                           | Articulation   | 10        | 10                                |
| S5                           | Naturalization | 10        | 10                                |
| <b>Total Marks</b>           |                | 50        | 50                                |

| Tutorial: 0 Hr/Week                      | ISE II                    | : 10 Marks |
| Credits : 02                             | End Semester Exam         | : 30 Marks |

### Course Outcomes (COs):

At the end of the course, the student will be able to

|            |  |
|------------|--|
| <b>CO1</b> | Understand the nature and objective of Technical Communication relevant for the work place as Engineers.         |
| <b>CO2</b> | Utilize the technical writing for the purposes of Technical Communication and its exposure in various dimensions |
| <b>CO3</b> | Imbibe inputs by presentation skills to enhance confidence in face of diverse audience.                          |
| <b>CO4</b> | Evaluate their efficacy as fluent & efficient communicators by learning the voice-dynamics.                      |

### Detailed Syllabus:

|               |  |
|---------------|--|
| <b>Unit I</b> | <p><b>Fundamentals of Technical Communication:</b></p> <p>Technical Communication: Features; Distinction between General and Technical Communication; Language as a tool of Communication; Dimensions of Communication: Reading &amp; comprehension; Technical writing: sentences; Paragraph; Technical style: Definition, types &amp; Methods; The flow of Communication: Downward; upward, Lateral or Horizontal; Barriers to Communication.</p> |
|---------------|--|

|                 |  |
|-----------------|--|
| <b>Unit II</b>  | <b>Forms of Technical Communication:</b><br>7 Cs of effective business writing: concreteness, completeness, clarity, conciseness, courtesy, correctness, consideration; Technical Report: Definition & importance; Thesis/Project writing: structure & importance; C.V./Resume writing; Technical Proposal: Types, Structure & Draft. Seminar & Conference paper writing.  |
| <b>Unit III</b> | <b>Technical Presentation:</b><br>Strategies & Techniques Presentation: Forms; interpersonal Communication; Classroom presentation; style; method; Individual conferencing: essentials: Public Speaking: method; Techniques: Clarity of substance; emotion; Humour; Modes of Presentation; Overcoming Stage Fear: Confident speaking; Audience Analysis & retention of audience interest   |
| <b>Unit IV</b>  | <b>Technical Communication Skills and Kinesics &amp; Voice Dynamics:</b><br>Interview skills; Group Discussion: Objective & Method; Seminar/Conferences Presentation skills: Focus; Content; Style; Critical thinking; Nuances: Exposition narration & Description; Socio-linguistic competence: Strategic competence: Solution of communication problems with verbal and non verbal means.<br>Definitions; importance; Features of Body Language; Voice Modulation: Quality, Pitch; Rhythm; intonation; Pronunciation; Articulation; stress & accent; Linguistic features of voice control: Vowel & Consonant Sounds. |

**Text Books:**

1. Technical Communication – Principles and Practices by Meenakshi Raman & Sangeeta Sharma, Oxford Univ. Press, 2007, New Delhi.
2. Business Correspondence and Report Writing by Prof. R.C. Sharma & Krishna Mohan, Tata McGraw Hill & Co. Ltd., 2001, New Delhi.
3. Practical Communication: Process and Practice by L.U.B. Pandey; A.I.T.B.S. Publications India Ltd.; Krishan Nagar, 2014, Delhi.
4. Modern Technical Writing by Sherman, Theodore A (et.al); Apprentice Hall; New Jersey; U.S.
5. A Text Book of Scientific and Technical Writing by S.D. Sharma; Vikas Publication, Delhi.

| Lectures                                   | 3 Hrs/Week | ISE-I              | 15 Marks |
| Tutorial                                   | 0          | ISE-II             | 15 Marks |
| Total Credits                              | 03         | ISE-III            | 10 Marks |
|  |            | End Semester Exam  | 60 Marks |

### Prerequisites: None

**Course Description:** This course is intended to introduce the students to a coherent and balanced account of major discrete mathematical structures (Group, Rings, Integral Domain), Set theory (Binary relations, partial order relations, Equivalence relations, equivalence classes, partitions), Discrete functions and recurrence relations (Z-transform, generating functions), concepts that form the basis of programming Languages and organization of data structure.

### Course Outcomes:

After Successful Completion of The Course, students will be able to:

|  |   |
|--|---|
|  |   |
|  | Perform operations on discrete structures such as assets functions, relations construct proofs using mathematical induction and apply counting principle. |
|  | Evaluate problems involving recurrence relations and generating functions and combinatorial problems  |
|  | Demonstrate knowledge of algebraic structures such as groups, Subgroups, Generators, and Co-sets.   |
|  | Demonstrate knowledge of algebraic structures such as rings, Fields, Integral Domains, Polynomial rings, and cyclic codes.                                |
|  |   |

|              |   |
|--------------|---|
| <b>Unit1</b> | <b>Set, Relations and Functions:</b> Combination of sets, finite and infinite sets, unaccountably infinite sets, mathematical induction, multisets, Properties of Binary Relations, Equivalence Relation and partitions, Partial ordering Relations and Lattices. Chain and Antichains, A Job-Scheduling Problem, Functions and Pigeonhole principles                     |
| <b>Unit2</b> | <b>Discrete Numerical Functions and Recurrence Relations:</b> Manipulation and Numerical Functions, Asymptotic behaviour, Generating functions and Combinatorial Problems, Recurrence relations, Linear 9 recurrence relations with constant coefficients, Homogeneous Solutions, Particular Solutions, Total Solutions, Solutions By The Method of generating functions. |
| <b>Unit3</b> | <b>Groups:</b> Introduction to Algebraic Structures, Groups, Subgroups, Generators and Evaluation of Powers, Cosets and Lagrange's Theorem, Permutation Group, Isomorphism and Automorphism, Homomorphism, Normal subgroup.   |
| <b>Unit4</b> | <b>Rings and Fields:</b> Integral domain and fields. Ring Homomorphism, polynomial rings and cyclic codes.  |
| <b>Unit5</b> | <b>Graphs:</b> Graphs types, graphs Properties, Connectivity, Trees, planar graphs, graph colouring application of trees and graphs.  |

### Detailed Syllabus:

| CO2            | 3                | 2   | 1   |     |     |     |     |     |     |      |      |      |       |      |      |
| CO3            | 2                | 2   | 1   |     |     |     |     |     |     |      |      |      | 1     |      |      |
| CO4            | 3                | 2   | 1   |     |     |     |     |     |     |      |      |      | 1     |      |      |
| CO5            | 3                | 2   | 1   |     |     |     |     |     |     |      |      |      | 1     |      |      |

**Assessment:**

**ISE I and ISE II:** In Semester evaluations(ISE I and ISE II) of 15 marks, each will be based on ClassTest I and Class Test II respectively.

**ISE III:** Teachers' Assessment Of 10 marks is based on the/or combination of the following:

- 1) Quiz
- 2) Assignments
- 3) Question and answer
- 4) Power Point presentation

**Assessment Pattern:**

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | ISE III | End Semester Examination |
|------------------------------|-----------------|-------|--------|---------|--------------------------|
| K1                           | Remember        | 00    | 05     | 02      | 10                       |

**Prerequisites: None**

**Course Description:** Database management course involves studying different aspects of computerized data-keeping systems. The fundamentals of the relational database system which is the most widely used system are included in this course. Structured query language and transaction management systems are also included.

**Course Outcomes:**

After successful completion of the course, students will be able to:

|            | <b>Course Outcomes</b>  |
|------------|---|
| <b>CO1</b> | Apply the basic concepts of relational data model, ER model, relational database design and database query language SQL                 |
| <b>CO2</b> | Design and convert E-R diagrams into database tables that satisfy relational theory and provide users with queries, forms, and reports. |
| <b>CO3</b> | Design a relational database, analyze it and improve the database design by normalization   |
| <b>CO4</b> | Demonstrate knowledge of ACID properties of a transaction and several techniques of concurrency control                                 |
| <b>CO5</b> | Develop a database for any real-time application considering various design constraints and compare SQL and NoSQL                       |

Approved in XXV IIIth Academic Council

Dated: 25<sup>th</sup> Jun 2024

## Detailed Syllabus:

|               |   |
|---------------|---|
| <b>Unit 1</b> | <b>Introduction to Database Management System</b><br>Basic terminologies: Data, Database, Database Management System (DBMS), History of Database Systems, Purpose of Database Systems, Characteristics of Database approach, Comparison of the database system and file system, Data models, Schemas and instances, Three-schema architecture and data independence, Database users and administrators, Database applications Entity-Relationship Model, Mapping Constraints, Keys, Strong and Weak Entity types, Refining the ER Design, ER Design Issues, ER Diagrams, Reduction of ER diagram to tables, Generalization, Specialization and Aggregation, Extended Entity Relationship Model (EER).                 |
| <b>Unit 2</b> | <b>Relational Model and SQL</b><br>Structure of Relational Databases, Database schema, Relational Database Design Using ER-to-Relational Mapping, Mapping EER Model Constructs to Relations, Relational Query Language, Relational Algebra, Tuple Relational Calculus, Domain Relational Calculus SQL Overview, SQL Data Definition and Data Types, Types of SQL commands- DDL, DML, DCL, TCL, Integrity Constraints, SQL operators, Set operations, Null values, Aggregate functions, Nested and Complex queries, Views, Joins, PL/SQL Overview, Structure of PL/SQL program, Cursors, Stored procedures and functions, Triggers Concept of NoSQL Database, NoSQL using MongoDB, Comparative study of SQL and NoSQL. |
| <b>Unit 3</b> | <b>Relational Database Design</b><br>Features of good Relational Database Design, purpose of Normalization for Relational Databases, Functional Dependencies, Decomposition: lossless join decomposition and dependency preservation, Normal Forms- First Normal Form, Second Normal Form, Third Normal Form, Boyce-Codd Normal Form, Multivalued Dependencies and Fourth Normal Form, Join Dependencies and Fifth Normal Form.   |
| <b>Unit 4</b> | <b>File Structures, Indexing and Hashing</b><br>File Organization, Organization of records in files, Basic File Structures, Operations on Files, Indexing Structures for Files, Ordered Indices, Single-Level Ordered Indexes, Multilevel Indexes, Hashing Techniques- Static and Dynamic Hashing, Comparison of Ordered indices and hashing, Bitmap indices, Index definition in SQL.  |
| <b>Unit 5</b> | <b>Transactions and Concurrency Control</b><br>Transaction concept, Transaction States, A simple Transaction Model, Desirable Properties of Transactions, Concept of schedule, serial & non-serial schedules, Serializability: conflict & view serializable schedules, uses of Serializability, Recoverable and Non-recoverable schedules Concurrency Control Techniques: Lock based protocols, deadlock handling, Timestamp based protocols, Multiple granularity, Validation based protocols Recovery systems, log-based recovery, deferred and immediate database modification, object-oriented database design.   |

3 - High 2 - Medium 1 - Low

**Assessment:**

**ISE I and ISE II:** In semester evaluations (ISE I and ISEI II) of 15 marks, each will be based on Class Test I and Class Test II respectively.

**ISE III:** Teachers' Assessment of 10 marks is based on one of / or a combination of a few of the following:

- 1) Quiz
- 2) Assignments
- 3) Question and answer
- 4) PowerPoint presentation

**Assessment Pattern:**

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | ISE III | End Semester Examination |
|------------------------------|-----------------|-------|--------|---------|--------------------------|
| K1                           | Remember        | 05    | 00     | 00      | 10                       |

|   | End Semester Examination | 60 Marks |

**Prerequisites: Nil**

**Course Description:**

This course presents a conceptual and practical introduction to imperative and object-oriented programming, exemplified by Java. As well as providing grounding in the use of Java, the course will cover general principles of programming in object-oriented frameworks. This course introduces concepts like Exception handling, interfaces & multithreading which provides a real time programming approach in object-oriented programming.

**Course Outcomes:**

After Successful Completion The Course,students will be able to:

Approved in XXV IIIth Academic Council  
Dated: 25<sup>th</sup> Jun 2024

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Define the concept of OOP as well as wellasthepurposeandusage principles of inheritance, polymorphism, encapsulation, and method overloading.  |
| <b>CO2</b>             | Identify classes, objects, members of the class and the relationships among them needed for a specific problem.  |
| <b>CO3</b>             | UseOOPconceptslikeinheritance, Interface Package Real Time situations.   |
| <b>CO4</b>             | Identify Situations For Exceptions And multithreading incorporated in the program.   |
| <b>CO5</b>             | DevelopJavaapplicationprogramsusingsoundOOPpractices(e.g.,interfacesandAPIs)and properprogramstructuring(e.g.,by using access control identifies, multithreading,error exception handling) |

### Detailed Syllabus

|               |  |
|---------------|--|
| <b>Unit 1</b> | <p><b>Introduction:</b><br/>Difference between OOP and other conventional programming – advantages and disadvantages. An overview of OOP concepts: Class, object, message passing, inheritance, encapsulation, polymorphism. Importance of Java in the internet, Java applets and applications, security, portability, the bytecode. An Overview of Java, OOP, Two paradigms, abstraction, the three OOP Principles.</p> <p><b>DataTypes, Variables And Arrays:</b><br/>Simple types, integers, floating point types, characters, Booleans, variables – declaring variable, dynamic initialization, the scope and lifetime of variables, type conversion and casting, arrays-one dimensional arrays and multidimensional arrays.</p> <p><b>Operators And Control Statements:</b><br/>Arithmetic operators, bitwise operators, relational operators, logical operators, assignment operators, ternary operators, operator precedence. Control statements–if, switch, while, do-while, for nested loops, break, continue. All With Examples.</p> |
| <b>Unit 2</b> | <p><b>Classes and Object:</b><br/>Class fundamentals, declaring objects, assigning object references variables,</p>  |

|               |  |
|---------------|--|
|               | anonymous object, introducing methods, constructors with types, overloading of constructors, recursion in JAVA, use static final keyword, this keyword, new keyword, an instance of the operator, instance variable, Operator Overloading.   |
| <b>Unit 3</b> | <b>Inheritance, Aggregation &amp; reusability</b><br>Inheritance – basics, using super, creating a multi-level hierarchy, Java polymorphism (Method overloading, Method Overriding, Runtime polymorphism, Dynamic Binding, Aggregation, abstract classes, using final with inheritance, Wrapper classes. Packages, defining a package, package example, access Protection, Interfaces – defining an interface, implementing interfaces, applying interfaces, variables in interfaces, extending interfaces |
| <b>Unit4</b>  | <b>Exception Handling &amp; Multithreading:</b><br>Fundamentals, exception types, uncaught exceptions, using try and catch, multiple catch clauses, nested try statements, throw, throw, and finally, exception. Basics Of Multithreading, main thread, thread lifecycle, creation multiple threads, naming a thread, sleeping a thread, Encapsulation in Java   |
| <b>Unit5</b>  | <b>Java I/O:</b> Java I/O classes and Interfaces, File – directories, using filename filter, the stream classes, - input stream, output stream, File I/P stream, file output stream, Java Applets.   |

**Total Hours required for this course: 40 Hours.**

**Prerequisite:** NIL

**Course description:** This course designates the knowledge of professional & philosophical Ethics in the field of Computer, the students will be aware of the process for securing Intellectual Property, the content of this course will enable students on how to recover the Evidence and Investigation. The content demonstrates on how to secure your own presence online and will acquire Cyber Law provision related to all type cyber-crimes.

**Course Outcomes Expected:**

After completion of this course students will be able to:

- CO1:** Make defensible decision making based on Professional & Philosophical Ethics.
- CO2:** Develop process to file an IPR Application.
- CO3:** Investigate and Recover Cyber Evidence
- CO4:** Learn the security hardware devices and software in Cyber Security.
- CO5:** Suggest legal action to be taken against the cyber-crimes.

**Detailed Syllabus**

|               |  |
|---------------|--|
| <b>UNIT-1</b> | <p><b>Computer and Philosophical ethics:</b><br/> Moral v/s Ethics, Why Computer Ethics, Philosophical Ethics: Distinguishing Descriptive and Normative Claims, Ethical Relativism, Utilitarianism, Deontological Theories, Rights, Virtue Ethics, Professional Ethics: Why Professional Ethics, Characteristics of Professionals, The System of Professionals, is Computing a Profession., Professional Relationships, Code of Ethics and Professional Conduct, Steps in Ethical Decision Making.</p> |
|---------------|--|

|               |   |
|---------------|---|
| <b>UNIT-2</b> | <b>Ethics &amp; Internet:</b> Three Morally Significant Characteristics, Hacking & Hacker E Netiquette Intellectual property issues in cyberspace Introduction to intellectual property Protections via Trade Secrets, Trademarks, Patents, Etc.<br>Contracting to protect intellectual property, Protection options - Encryption / PGP, copyright on web content, Copyright on software, digital contracts, digital signatures.  |
| <b>UNIT-3</b> | <b>Data and Evidence Recovery-</b> Introduction to Deleted File Recovery, Formatted Partition Recovery, Data Recovery Tools, Data Recovery Procedures and Ethics, Complete timeline analysis of computer files based on file creation, file modification and file access, Recover Internet Usage Data, Recover Swap Files/Temporary Files/Cache Files, Introduction to Encase Forensic Edition, Forensic Tool Kit (FTK) etc, Use computer forensics software tools to cross-validate findings in computer evidence-related cases. |
| <b>UNIT-4</b> | <b>Cyber Security-</b> Introduction to Cyber Security, Hardware-Based Security, Software Based Firewalls, Security Standards, Assessing Threat Levels, Types of incidents, Stages of incident response Threats in cyberspace, Blended attacks, , incident prevention and detection, Forming an Incident Response Team, Reporting Cyber-crime, Operating System Attacks, Application Attacks, Reverse Engineering & Cracking Techniques and Financial Frauds.  |
| <b>UNIT-5</b> | <b>IT ACT:</b> Information Technology Act 2000 Scope, jurisdiction, offense and contraventions, powers of police, adjudication  |

### Course Description:

### Course Outcomes:

After successful completion the course, students will be able to:

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO 1</b>            | Understand the characteristics of machine learning strategies                          |
| <b>CO 2</b>            | Apply various supervised learning methods to real life problems                        |
| <b>CO 3</b>            | Apply probabilistic and unsupervised learning models for handling unknown pattern      |
| <b>CO 4</b>            | Identify and integrate more than one techniques to enhance the performance of learning |
| <b>CO 5</b>            | Learn how to define RL tasks and the core principles behind the RL                     |

### Detailed Syllabus:

|               |  |
|---------------|--|
| <b>Unit 1</b> | Overview of machine learning concepts and applications, Supervised, unsupervised, and reinforcement learning, Elements of a machine learning system  |
| <b>Unit 2</b> | Supervised Learning Decision Trees Classification and Regression Trees, Regression: Linear Regression, Multiple Linear Regression, Logistic Regression, Support vector machines, evaluation metrics for classification |
| <b>Unit 3</b> | Unsupervised Learning Introduction to clustering, Hierarchical & Partitioning methods,; Density based methods,K-means clustering, K-Mode Clustering,   |
| <b>Unit 4</b> | Ensemble Learning Model Combination Schemes, Bagging: Random Forest Trees, Boosting: Adaboost. Validation techniques, Random Sampling  |
| <b>Unit 5</b> | Learning Theory, Introduction to Reinforcement Learning, Feature reduction techniques Principal component analysis, Linear Discriminant analysis   |

**Special Instructions if any: Nil**

**PO1:** Apply knowledge of mathematics, science and algorithms in solving complex Computer engineering problems.

**PO2:** Generate solutions by conducting experiments and applying techniques to analyze and interpret data.

**PO3:** Design component, or processes to meet the needs within realistic constraints.

**PO4:** Identify, formulate, and solve Software Engineering, Networking and Data Mining problems.

**PO5:** Comprehend professional and ethical responsibility in the computing profession.

**PO6:** Express effective communication skills.

**PO7:** Participate in global, economic, environmental, and societal context.

**PO8:** Recognize the need for, and an ability to engage in life-long learning.

**PO9:** Knowledge of contemporary issues and emerging developments in the computing profession.

**PO10:** Utilize the techniques, skills and modern computer Engineering tools, Software and techniques necessary for Engineering practice.

**PO11:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.

**PO12:** Design research problems and conduct research in a computing environment.

|   |                    | <b>End Semester Exam</b>  | <b>60 Marks</b> |

**Prerequisites: Nil**

**Course Description:**

This course presents a conceptual and practical introduction to imperative and object-oriented programming, exemplified by Java. As well as providing grounding in the use of Java, the course will cover general principles of programming in object-oriented frameworks. This course introduces concepts like Exception handling, interfaces & multithreading which provides a real time programming approach in object-oriented programming.

**Course Outcomes:**

| <b>Course Outcomes</b> |  |
|------------------------|--|
| <b>CO1</b>             | Define the concept of OOP as well as wellasthepurposeandusage principles of inheritance, polymorphism, encapsulation, and method overloading.  |
| <b>CO2</b>             | Identify classes, objects, members of a class and the relationships among them needed for a specific problem.  |
| <b>CO3</b>             | UseOOPconceptslikeinheritance, Interface Package Real Time situations.   |
| <b>CO4</b>             | Identify Situations For Exceptions And multithreading incorporated in the program.   |
| <b>CO5</b>             | DevelopJavaapplicationprogramsusingsoundOOPpractices(e.g.,interfacesandAPIs)and properprogramstructuring(e.g.,by using access control identifies, multithreading,error exception handling) |

After Successful Completion The Course,students will be able to:

## Detailed Syllabus

|               |  |
|---------------|--|
| <b>Unit 1</b> | <p><b>C++ Basics &amp; Variables:</b><br/>           What is object-oriented programming? Why do we need object-oriented? Programming characteristics of object-oriented languages. C and C++, Output using cout. Directives. Input with cin. Type bool. The setw manipulator. Type conversion and casting.</p>  |
| <b>Unit 2</b> | <p><b>Functions &amp; Data Types:</b><br/>           Introduction of function, Why Do We Need Functions, Function Declaration, Types of function, Parameter Passing to Functions, Function Definition, Methods of Parameter Passing, Function Declaration, Function Prototype, Nested Function, Simple data types, integers, floating point types, characters, Booleans.</p>   |
| <b>Unit 3</b> | <p><b>Object &amp; Classes:</b><br/>           Making sense of core object concepts (Encapsulation, Abstraction, Polymorphism, Classes, Messages Association, Interfaces) Implementation of class in C++, C++ Objects as physical object, C++ object as data types constructor. Object as function arguments. The default copy constructor, returning object from function. Structures and classes. Classes objects and memory static class data. Const and classes.</p> |
| <b>Unit 4</b> | <p><b>Arrays and Strings:</b><br/>           Arrays of object, string, The standard C++ String class</p>   |
| <b>Unit 5</b> | <p><b>Inheritance:</b><br/>           Concept of inheritance, Derived class and based class, Derived class constructors, member function, inheritance in the English distance class, class hierarchies, inheritance and graphics shapes, public and private inheritance, aggregation : Classes within classes, inheritance and program development.</p>  |

### Mapping of Course outcomes with Program Outcomes and Program Specific Outcomes:

### 3- High 2–Medium 1–Low

#### Assessment:

**ISE I and ISE II:** In semester evaluations (ISE I and ISE II) of 15 marks, each will be based on Class Test I and Class Test II respectively.

**ISE III:** Teachers Assessment of 10 marks is based on of the/or combination of few of the following:

- 6) Quiz
- 7) Assignments
- 8) Classroom Question & answer
- 9) Powerpoint presentation Topic Which Is related but out of syllabus
- 10) Overall Approach Towards Learning, creativity.

#### Assessment Pattern:

| Assessment Pattern Level No. | Knowledge Level | ISE I | ISE II | ISE III | End Semester Examination |

**Course Outcomes:**After completion of this course, students will be able to:

|     | Course Outcomes   |
|-----|---|
| CO1 | Know the scope of SQL and use it to query, update and manage a database |
| CO2 | Use PL/SQL  |
| CO3 | Identify functions of a database administrator                          |
| CO4 | Demonstrate advanced SQL functions                                      |
| CO5 | Design and build a simple database management system.                   |

**List of the Experiments:**

The student shall perform a minimum of ten experiments of the following using Oracle databases.

| Sr. No.                   | Title of the Experiments  | Skill / Knowledge Level | CO      | Marks for ISE |
|---------------------------|---|-------------------------|---------|---------------|
| <b>Level: Basic (all)</b> |   |                         |         |               |
| 1                         | To execute all the Basic DDL (Data Definition Language) commands (i.e. Create, Alter, Drop, and Truncate) with example    | S1                      | CO1     | 04            |
| 2                         | To execute all the Basic DML (Data Manipulation Language) commands (i.e. Insert, Select, Update, and Delete) with example | S2                      | CO1,CO3 | 04            |

|                        |  |    |          |    |
|------------------------|--|----|----------|----|
| 3                      | To Execute the Database Functions (i.e. Numeric, Date, Group, Character, and count function) with examples.  | S2 | CO4      | 04 |
| 4                      | To Execute the join Commands (i.e. Cartesian product, natural join, Inner join, left outer join, right outer join, equi join, non-equi join, and full join). | S1 | CO4      | 04 |
| 5                      | Implement the Program for Arithmetic operations (like addition, Subtraction, Multiplication and Division) using PL/SQL (programming language in SQL).        | S2 | CO4      | 04 |
| <b>Level: Moderate</b> |  |    |          |    |
| 6                      | Implement the concept for cursors in PL/SQL and demonstrate competence for loop constructs   | S2 | CO1, CO2 | 06 |
| 7                      | To implement the program for updating the values using cursor.   | S2 | CO1, CO2 | 06 |
| <b>Level: Complex</b>  |  |    |          |    |
| 8                      | To implement the Concept of Views and Sql Sub-Queries.   | S2 | CO4      | 06 |
| 9                      | Mini-project   | S2 | CO5      | 06 |

**Assessment:**

**ISEI:** In-Semester Evaluation of 50 marks based on performance of students in practical hours, practical assignments completed, and timely submission.

**Assessment Table:**

|                                   |     |              |

**Prerequisites: Nil**

**Course Description:** Python is a language with a simple syntax, and a powerful set of libraries. It is an interpreted language, with a rich programming environment, including a robust debugger and profiler. While it is easy for beginners to learn, it is widely used in many scientific areas for data exploration. This course is an introduction to the Python programming language for students without prior programming experience.

**Course Outcomes:** After Completion Of This Course Students Will be able to:

| <b>Course Outcomes</b> |   |
|------------------------|---|
| <b>CO1</b>             | Understand installation procedure and system requirements for Python                        |
| <b>CO2</b>             | Apply DataTypes, Variables, Operators and other Conditional blocks in programs              |
| <b>CO3</b>             | Apply in build functions of Python and Create User Defined Functions                        |
| <b>CO4</b>             | Create a program using Strings, Tuples, List etc  |
| <b>CO5</b>             | Create and Edit Files using File Handling, Using Exception Handling, Implement OOP Concepts |

**Detailed Syllabus:**

**List of the Experiments:** Students will perform

| Sr. No.                | Title of the Experiments  | Skill / Knowledge Level | CO       | Marks for ISE |
|------------------------|---|-------------------------|----------|---------------|
