

Government College of Engineering, Aurangabad
Department of Electrical Engineering

NEP Compliant tentative B. Tech structure
& Curriculum of
S.Y. B. Tech. (Electrical) 2024-25 onwards as per NEP2020

PROGRAMME EDUCATIONAL OBJECTIVES (PEO's)

1. Our graduates will excel in professional careers in technology and management with appropriate consideration for safety, culture, energy optimization and environment.
2. Our graduates will excel in higher studies, research and competitive examinations.
3. Our graduates will become successful entrepreneurs.
4. Our graduates will practice good human values, professional ethics and social responsibilities

Program Outcomes

- 1. Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- 2. Problem Analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design systems components or processes that meet the specified needs with appropriate consideration for the public health and safety and the cultural, social and environmental consideration. To use modern engineering IT tools to solve and model electrical engineering problems.
- 4. Conduct investigations of complex problems:** Use research based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- 5. Modern tool usage:** Create, select and apply appropriate techniques, resources and modern engineering and IT tools including predictions and modeling to complex engineering activities with an understanding of the limitations
- 6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and consequent responsibility relevant to the professional engineering practice.
- 7. Environment and sustainability:** Understands the impact of professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
- 8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 9. Individual and team work:** Function effectively as an individual and as a member or leader in diverse teams, and multidisciplinary settings.
- 10. Communications:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentations, make effective presentations and give and receive clear instructions.
- 11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for and have preparation and ability to engage in independent and life-long learning in the broadest context of technological changes.

Program Specific Outcomes

1. Identify, formulate problems in power system domain and apply subject knowledge to provide solutions
2. Classify, make use of various electrical machines, power electronics circuits and electrical drives for engineering applications and investigate for suitability and troubleshooting
3. Analyze and apply concepts of electronics, control systems and instrumentation for engineering applications

Total Credits for the completion of B. Tech. in Electrical Engineering:

The total number of credits proposed for the four-year B. Tech Electrical Engineering with 1 Multidisciplinary minor (Compulsory) degree is **170** as per the structure given below:

Structure of B. Tech. in Electrical Engineering with multidisciplinary minor:

| Semester | | I | II | III | IV | V | VI | VII | VIII | Total Credits |
|--|---|-----------|-----------|-----------|-----------|-----------|-----------|-----------|-----------|---------------|
| Basic Science Course | BSC | 08 | 08 | | -- | -- | -- | -- | -- | 16 |
| Engineering Science Course | ESC | 07 | 07 | | -- | -- | -- | -- | -- | 14 |
| Program Core Course (PCC) | Program Courses | -- | 02 | 14 | 12 | 08 | 13 | 04 | | 53 |
| Program Elective Course (PEC) | Program Elective | -- | -- | -- | -- | 06 | 06 | 07 | - | 19 |
| Multidisciplinary Minor (MD M) | Multidisciplinary Courses | | - | 04 | 03 | 04 | 03 | | | 14 |
| Open Elective (OE) Other than a particular program | OE | -- | -- | 03 | 02 | 03 | -- | -- | -- | 08 |
| Vocational and Skill Enhancement Course (VSEC) | Skill Courses | 02 | 02 | -- | 02 | -- | 02 | -- | -- | 08 |
| Ability Enhancement Course (AEC -01, AEC-02) | Humanities Social Science and Management (HSSM) | | 02 | -- | 02 | -- | -- | -- | -- | 04 |
| Entrepreneurship/Economics/ Management Courses | | -- | | 02 | 02 | -- | -- | -- | -- | 04 |
| Indian Knowledge System (IKS) | | 02 | | | -- | -- | -- | -- | -- | 02 |
| Value Education Course (VEC) | | -- | -- | 02 | 02 | -- | -- | -- | -- | 04 |
| Research Methodology | Experiential Learning Courses | -- | -- | -- | -- | -- | -- | | 02 | 02 |
| Comm. Engg. Project (CEP)/Field Project (FP) | | -- | -- | 02 | -- | -- | -- | - | - | 02 |
| Project | | -- | -- | -- | -- | -- | -- | 04 | - | 04 |
| Internship/ OJT | | -- | -- | | | -- | -- | | 12 | 12 |
| Co-curricular Courses (CC) | Liberal Learning Courses | 02 | 02 | | -- | -- | -- | -- | - | 04 |
| Total Credits (Major) | | 21 | 23 | 27 | 25 | 21 | 24 | 15 | 14 | 170 |

Students can opt for any of the following as per the rules and regulations given by institute:

1. B. Tech with one Multidisciplinary Minor = Total 170 Credits
2. B Tech with two Multidisciplinary Minors = Total 184 Credits
3. B. Tech with one Multidisciplinary Minor and Honor = Total 188 Credits
4. B. Tech with one Multidisciplinary Minor and Honor by research = Total 188 credits

MULTIDISCIPLINARY MINOR (MD M) and OPEN ELECTIVE (OE) Other than particular Program

List of Multidisciplinary Minor Courses from other faculties: Total 14 Credits as per GR, Two courses of 4 credits and two courses of 3 credits. Open electives of 8 credits are offered, Two courses of 3 credits and 01 course of 02 credits.

| Specialization | Dramatics | Film Making | Fine Art | Music |
|--------------------------------------|-----------------------------|---------------------------------|---|---|
| Multi-disciplinary Minor - 01 | Dramatic Theory, Literature | Videography + Cinematography | Applied Art (Digital Art) | Theory of Indian Music |
| Multi-disciplinary Minor – 02 | Acting | Video Editing and Lighting | Painting (Generative Art) | Ancient and Modern Poetry |
| Multi-disciplinary Minor – 03 | Directing | Story telling Story Boarding | Sculpture (3D-Space) | The Evolution of music |
| Multi-disciplinary Minor – 04 | Playwriting | UI/UX and Animation | Visual Communication (Evolutionary Art) | Music and Film |
| Multi-disciplinary Minor – 05 | Applied Interactive Theatre | Art of Visual Communication | Graphics Art (Print & Printing Art) | Introduction to Electronic and Computer Music |
| Multi-disciplinary Minor - 06 | Technical Theatre | Film & TV Directing | Art Culture | Analysis of Tonal Music |

| Specialization | Management & Finance | Law | Social Science | Journalism |
|--------------------------------------|--|--|--|--|
| Multi-disciplinary Minor - 01 | Micro-economics | Constitutional Law | Indian Economics | Principles of Communication |
| Multi-disciplinary Minor – 02 | Corporate Social Responsibility | Human Rights & International Law | Introduction to Sociology | Fundamentals of Journalism |
| Multi-disciplinary Minor – 03 | Principles of Accounting | Environmental Law | Geo- Informatics | Cyber Journalism |
| Multi-disciplinary Minor – 04 | Business Intelligence | Civil Procedure Code (CPC) | Introduction to Political Sciences | Basics of Design & Graphics |
| Multi-disciplinary Minor – 05 | Marketing Research | Land Laws including ceiling and other local laws | Corporate sociology | Mass Communication: Concepts and Processes |
| Multi-disciplinary Minor - 06 | Corporate Governance and Business Ethics | Cyber Law | Modern India- Political, Economic & Social Ethos | IT and Online Journal:  |

**In addition to above courses following Groups are offered as Multidisciplinary Minor by
Electrical Engineering Department**

Multidisciplinary Minor-I (Electrical Mobility)

| Sr. No. | Course Code | Course Name | Pre-requisite | Credits L-T-P | Offered Semester | Suggested by dept |
|---------|-------------|--|---------------|---------------|------------------|-------------------|
| 1 | EEMDM2001 | Electric Machines for EV Applications | No | 3-0-0 | III | Electrical Dept |
| 2 | EEMDM2010 | Power Electronics & Electric Drives | No | 3-0-0 | IV | Electrical Dept |
| 3 | EEMDM2011 | Lab-Electric Machines & Power Electronics drives | No | 0-0-1 | IV | Electrical Dept |
| 4 | EEMDM3001 | Control & Instrumentation | No | 3-0-0 | V | Electrical Dept |
| 5 | EEMDM3010 | Energy storage systems | No | 3-0-0 | VI | Electrical Dept |
| 6 | EEMDM3011 | Lab-Control & Instrumentation, Energy Storage | No | 0-0-1 | VI | Electrical Dept |

Multidisciplinary Minor-II (Renewable Energy Systems)

| Sr. No. | Course Code | Course Name | Pre-requisite | Credits L-T-P | Offered Semester | Suggested by dept |
|---------|-------------|--|---------------|---------------|------------------|-------------------|
| 1 | EEMDM2002 | Renewable Energy Technology | No | 3-0-0 | III | Electrical Dept |
| 2 | EEMDM2012 | Grid Integration of Wind & Solar Systems | No | 3-0-0 | IV | Electrical Dept |
| 3 | EEMDM2013 | Lab RET | No | 0-0-1 | IV | Electrical Dept |
| 4 | EEMDM3002 | Energy Economics & Marketing | No | 3-0-0 | V | Electrical Dept |
| 5 | EEMDM3010 | Energy Storage Systems | No | 3-0-0 | VI | Electrical Dept |
| 6 | EEMDM3012 | Lab Energy Systems | No | 0-0-1 | VI | Electrical Dept |

**In addition to above courses following courses are offered as Open Elective Courses (OEC)
by Electrical Engineering Department
List of Open Elective courses offered**

| Sr. No. | Course Code | Course Name | Pre-requisite | Credits L-T-P | Offered Semester | Suggested by dept |
|---------|-------------|-----------------------------------|---------------|---------------|------------------|-------------------|
| 1 | EEOEC2001 | Music Engineering | No | 3-0-0 | III | Electrical Dept |
| 2 | EEOEC2010 | Basic Engineering Economics | No | 2-0-0 | IV | Electrical Dept |
| 3 | EEOEC3001 | Building Services and Maintenance | No | 3-0-0 | V | Electrical Dept |

HONORS

Student has to choose One Honor program out of the Two Honor groups provided below

A) Electrical Engg with Honors- (Electrical Power Engg)

| Sr. No. | Course Code | Course Name | Credits L-T-P | Offered Semester | Suggested by dept |
|---------|-------------|---|---------------|------------------|-------------------|
| 1 | EEHNC2010 | Electrical Power Distribution Systems | 3-1-0 | IV | Electrical Dept |
| 2 | EEHNC3001 | CAPSA | 3-1-0 | V | Electrical Dept |
| 3 | EEHNC3011 | FACTs Controller | 3-1-0 | VI | Electrical Dept |
| 4 | EEHNC4001 | Power Quality, EMI and EMC | 3-1-0 | VII | Electrical Dept |
| 5 | EEHNC4010 | Mini Project/ Power System Simulation Lab | 0-0-2 | | |

B) Electrical Engg with Honors- (Advanced Power Electronics and Drives)

| Sr. No. | Course Code | Course Name | Credits L-T-P | Offered Semester | Suggested by dept |
|---------|-------------|---|---------------|------------------|-------------------|
| 1 | EEHNC2020 | Electrical Machine Analysis and Modeling | 3-1-0 | IV | Electrical Dept |
| 2 | EEHNC3020 | PWM Techniques for Power Converters | 3-1-0 | V | Electrical Dept |
| 3 | EEHNC3021 | Advanced Power Electronics | 3-1-0 | VI | Electrical Dept |
| 4 | EEHNC4020 | Control of Electric Drives | 3-0-1 | VII | Electrical Dept |
| 5 | EEHNC4021 | Mini Project/ Power System Simulation Lab | 0-0-2 | | |

Teaching and Evaluation Scheme from year 2023-24
First Year B. Tech. Program in Electrical Engineering
Semester I

| Semester I Courses | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|--------------------|----------|-------------|---|-----------------|----------|-----------|---|-----------|-----------|------------|------------|------------|
| Sr No | Category | Course Code | Course Name | T H | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | BSC | MABSC1002 | Mathematics I [For EE and E&TC] | 3 | 1 | - | 4 | 15 | 15 | 10 | 60 | 100 |
| 2 | BSC | PHBSC1001 | Optics, Acoustics and Engineering Materials | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | ESC | MEESC1008 | Basics of Mechanical Engineering and Graphics | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | ESC | CSESC1005 | Programming for Problem Solving | 2 | - | - | 2 | 10 | 10 | - | 30 | 50 |
| 5 | BSC | PHBSC1003 | LAB PHYSICS | - | - | 2 | 1 | - | - | 25 | - | 25 |
| 6 | ESC | MEESC1009 | Basics of Mechanical Engineering and Graphics | - | - | 2 | 1 | - | - | 25 | - | 25 |
| 7 | ESC | CSESC1006 | Lab Programming for Problem Solving | - | - | 2 | 1 | - | - | 25 | - | 25 |
| 8 | AEC-01 | INAEC1001 | Communication Skills | 2 | - | - | 2 | 10 | 10 | - | 30 | 50 |
| 9 | VSEC-01 | ETVSE1002 | Engineering Exploration | - | - | 4 | 2 | - | - | 25 | 25 | 50 |
| 10 | CC-01 | INCCC1001 | Yoga | - | - | 4 | 2 | - | - | 50 | - | 50 |
| Total | | | | 13 | 1 | 14 | 21 | 65 | 65 | 180 | 265 | 575 |

Semester II

| Semester II Courses | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|---------------------|----------|--|---|-----------------|----------|-----------|---|-----------|-----------|------------|------------|------------|
| Sr. No | Category | Course Code | Course Name | TH | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | BSC | INCCC1001 | Mathematics II [For EE and E&TC] | 3 | 1 | - | 4 | 15 | 15 | 10 | 60 | 100 |
| 2 | BSC | INCCC1001 | Battery Science, Lubricants and Green Chemistry | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | ESC | INCCC1001 | Fundamentals of Electrical Engineering | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | ESC | INCCC1001 | Basics of Electronic Circuits | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 5 | BSC | INCCC1001 | Lab Chemistry | - | - | 2 | 1 | - | - | 25 | - | 25 |
| 6 | PCC | INCCC1001 | Electrical Engineering Practice | 1 | - | - | 1 | - | 15 | 10 | - | 25 |
| 7 | PCC | INCCC1001 | Lab-Electrical Engineering Practice | | | 2 | 1 | | | 25 | | 25 |
| 8 | ESC | INCCC1001 | Lab Basics of Electronics Circuits | - | - | 2 | 1 | - | - | 25 | - | 25 |
| 9 | VSEC-02 | EEVSE1001 | Electrical Workshop | | | 4 | 2 | - | - | 50 | | 50 |
| 10 | IKS-01 | EEIKS1001 | Vedic Mathematics | 2 | | | 2 | 10 | 10 | - | 30 | 50 |
| 11 | CC-02 | INCCC 1002 INCCC 1003 INCCC 1004 | NSS /Sports/ Club Activities | 2 | | | 2 | - | - | 50 | - | 50 |
| Total | | | | 17 | 1 | 10 | 23 | 70 | 85 | 225 | 270 | 650 |

Exit Course

Exit option : Award of UG Certificate in Major with 44 credits and an additional 8 credits from following Exit Courses

| Sr. No | Course Code | Course Title | Mode | Credits |
|--------|-------------|---|---|---------|
| 1 | EEEXC1001 | Electrification of building | Online/ Offline certification courses Work based vocational courses or internship or apprenticeship during summer vacatio | 4 |
| | | AND | | |
| 2 | EEEXC1002 | Electrical Panel Design and Implementation | | 4 |

**Second Year B. Tech. Program in Electrical Engineering
Semester III**

| Semester III Courses | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|----------------------|----------|-------------|--|-----------------|----------|-----------|---|------------|------------|------------|------------|------------|
| Sr No | Category | Course Code | Course Name | T H | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | PCC | EEPCC2000 | Mathematics for Electrical Engineering | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 2 | PCC | EEPCC 2001 | Network Analysis | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | PCC | EEPCC2002 | Electrical Machines- I | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | PCC | EEPCC 2004 | Lab Network Analysis | - | - | 2 | 1 | | | 25 | 25 | 50 |
| 5 | PCC | EEPCC 2005 | Lab Electrical Machines- I | | | 2 | 1 | | | 25 | 25 | 50 |
| 6 | PCC | EEPCC2003 | Electrical Measurement & Instrumentation | 2 | - | - | 2 | 10 | 10 | - | 30 | 50 |
| 7 | PCC | EEPCC2006 | Lab Electrical Measurement & Instrumentation | - | - | 2 | 1 | | - | 25 | 25 | 50 |
| 8 | MD M-1 | | | 4 | | | 4 | 15 | 15 | 10 | 60 | 100 |
| 9 | OE- I | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 10 | EEM | EEEEM2001 | Consumer Psychology | 2 | | | 2 | 10 | 10 | - | 30 | 50 |
| 11 | VEC-I | CEVEC0010 | Environmental Studies | 2 | | | 2 | 10 | 10 | - | 30 | 50 |
| 12 | CEP | EECEP2001 | Community Engg Project | | | 4 | 2 | | | 50 | | 50 |
| Total | | | | 22 | - | 10 | 27 | 105 | 105 | 175 | 465 | 850 |

Semester IV

| Semester IV Courses | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|---------------------|----------|-------------|--|-----------------|----------|-----------|---|------------|------------|------------|------------|------------|
| Sr. No. | Category | Course Code | Course Name | TH | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | PCC | EEPCC2011 | Electromagnetic Field | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |

| 8 | OE- II | EEOEC2012 | | 2 | - | - | 2 | 10 | 10 | | 30 | 50 |
| 9 | VSEC-I | EEVSE2010 | Lab Digital Circuit | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| 10 | VSE | EEVSE2011 | Lab Numerical Computational Techniques | 1 | | 2 | 1 | - | - | 25 | 25 | 50 |
| 11 | VEC | INVEC1001 | Universal Human Values | 2 | | | 2 | 10 | 10 | | 30 | 50 |
| 12 | EEM | EEEEM2010 | Electricity Market and Management | 2 | | | 2 | 10 | 10 | | 30 | 50 |
| Total | | | | 23 | - | 06 | 25 | 110 | 110 | 115 | 435 | 800 |

- **Bridge course of Two credits is mandatory for Direct second year admitted students in IV th semester**

Exit Course

| Exit option : Award of UG Diploma in Major with 88 credits and an additional 8 credits from following Exit Courses | | | | |
|--|-------------|--|--|---------|
| Sr. No | Course Code | Course Title | Mode | Credits |
| 1 | EEEXC2001 | Repairing and maintenance of Electrical Appliances | Online/ Offline certification courses Skill based courses, internship, mini projects etc. offered during summer vacation | 4 |
| | | And | | |
| 2 | EEEXC2002 | Industrial Electrical systems installation and maintenance | | 4 |

**Third Year B. Tech. Program in Electrical Engineering
Semester V**

| Semester V Course | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|-------------------|----------|-------------|---------------------|-----------------|----------|-----------|---|------------|------------|------------|------------|------------|
| Sr No | Category | Course Code | Course Name | TH | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | PCC | EEPCC3001 | Control Systems-I | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 2 | PCC | EEPCC3002 | Power System -II | 3 | | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | PEC-I | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | PEC-II | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 5 | MD-M-3 | | | 4 | - | - | 4 | 15 | 15 | 10 | 60 | 100 |
| 6 | OE-III | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 7 | PCC | EEPCC3003 | Lab Control Systems | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| 8 | PCC | EPCC3004 | Lab Power System-II | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| Total | | | | 22 | - | 04 | 21 | 105 | 105 | 120 | 470 | 800 |

❖ For B Tech with single minor and Honors, one theory course of 4 credits will be added in this semester.

Semester VI

| Semester VI Course | | | | Teaching Scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|--------------------|----------|-------------|------------------------------------|-----------------|----------|-----------|---|------------|------------|------------|------------|------------|
| Sr No | Category | Course Code | Course Name | TH | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | PCC | EEPCC3010 | Control Systems-II | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 2 | PCC | EEPCC3011 | Microcontroller & Applications | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| | PCC | EEPCC3012 | Power System Protection | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | PCC | EEPCC3013 | Power Electronics | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | PCC | EEPCC3014 | Lab-Power System Protection | | | 2 | 1 | | | 25 | 25 | 50 |
| 5 | PEC-III | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 6 | PEC-IV | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 7 | MD M-4 | | | 3 | | | 3 | 15 | 15 | 10 | 60 | 100 |
| 8 | VSEC | EEVEC3011 | Lab Microcontroller & Applications | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| 9 | VSEC | EEVEC3012 | Lab Power Electronics | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| Total | | | | 21 | - | 06 | 24 | 105 | 105 | 145 | 495 | 850 |

For B Tech with single minor and Honors, one theory course of 4 credits will be added in this semester.

Exit courses

| Exit option : Award of B. Vocational in Major with 132 credits and an additional 8 credits from following Exit Courses | | | | |
|--|-------------|-------------------------------|--|---------|
| Sr. No | Course Code | Course Title | Mode | Credits |
| 1 | EEEXC3001 | Installation of Transformer | Online/ Offline certification courses Skill based courses, internship, mini projects etc. offered during summer vacation | 4 |
| AND | | | | |
| 2 | EEEXC3002 | Industrial Electrical Systems | | 4 |

Semester VII

Teaching and Evaluation Scheme from year 2026-27

| Semester VII Course | | | | Teaching scheme | | | Continuous Evaluation in terms of Marks | | | | | |
|---------------------|---------------|-------------|---------------------|-----------------|----------|-----------|---|-----------|-----------|------------|------------|------------|
| Sr No | Category | Course Code | Course Name | TH | T | PR | Credits | ISE I | ISE II | ISE III | ESE | Total |
| 1 | PCC | EEPCC4001 | Electric Drives | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 2 | PEC-V | | | 3 | - | - | 3 | 15 | 15 | 10 | 60 | 100 |
| 3 | PEC-VI | | | 3 | | | 3 | 15 | 15 | 10 | 60 | 100 |
| 4 | PEC-VII (Lab) | | | - | | 2 | 1 | - | | 25 | 25 | 50 |
| 5 | PCC | EPCC4002 | Lab Electric Drives | - | - | 2 | 1 | - | - | 25 | 25 | 50 |
| 6 | Project | | | | - | 8 | 4 | - | - | 50 | 50 | 100 |
| Total | | | | 09 | - | 12 | 15 | 45 | 45 | 130 | 280 | 500 |

- ❖ For B Tech with single minor and Honors, one theory course of 4 credits and one mini project of 2 credits will be added in this semester.
- ❖ For B Tech with single minor and Honors with research project, 6 credits are added in this semester.

Semester VIII

(One semester long internship in industry **)

B Tech (Electrical with double minors) Total Credits- 170 +14= 184)

|---|--|

Course Objective:

This course intends to provide an overview of analytical techniques to solve ordinary and partial differential equations and introduce different Integral Transforms i.e. Laplace Transform, Fourier Transform and Z- Transform, which we apply to solve many Engineering problems.

Course Outcomes:

After completing the course, students will be able to:

| | |
|-----|---|
| CO1 | Define linear differential equations (LDE), Cauchy's and Legendre's differential equations, first order partial differential equations, Lagrange's equation, Laplace Transform, Fourier Transform and Z-Transform, region of convergence. |
| CO2 | Summarize the solution of LDE with constant and variable coefficients, solution of homogeneous and non-homogeneous PDE, properties of Laplace Transform, Fourier Transform and Z-Transform. |
| CO3 | Find Laplace Transform of derivative and integration, inverse Laplace Transform using properties, partial fraction method and convolution theorem, Fourier Transform of periodic functions, Z-transform of discrete functions, inverse Fourier Transform and inverse Z-transform. |
| CO4 | Solve linear differential equations with constant and variable coefficients, first order linear and non-linear partial differential equations, second order homogeneous and non homogeneous linear partial differential equations. |

Detailed syllabus:

| | |
|-----------------|---|
| Unit-I | Linear Differential Equations (LDE): Linear differential equations (LDE) with constant coefficients, method of variation of parameters, second order linear differential equations with variable coefficients, Cauchy’s and Legendre’s differential equations. |
| Unit-II | Partial Differential Equations (PDE): First order linear/nonlinear partial differential equation, Lagrange’s equation. Solution to homogeneous and non homogeneous linear partial differential equations of second and higher order by complementary function and particular integral method. |
| Unit-III | Laplace Transform : Definition of Laplace Transform, Properties of Laplace Transform, Laplace Transform of elementary functions, Laplace Transform of derivative of functions, Laplace Transform of integration of functions. Laplace Transform of periodic functions, inverse Laplace Transform using definition, properties and partial fraction, convolution theorem. |
| Unit-IV | Fourier Transform (FT): Fourier integral theorem, Fourier sine and cosine integrals, Fourier transform pair, Fourier sine and cosine transform pairs, properties of Fourier transform, Fourier transform of simple functions, convolution theorem. |
| Unit-V | Z Transform: Z transform of elementary functions, region of convergence, properties and theorems of Z transform, inverse of Z transform using convolution theorem, partial fraction method, inversion integral method. |

Course description: The electrical Network analysis is a set of techniques used for quantitative analysis of electrical networks. electrical circuit. This course introduces the transient analysis and steady-state analysis of electrical circuits to the students.

Prerequisites: Nil

Course Objectives:

The objectives of the course are to

1. Provide the student with a comprehensive understanding of the basic law of electric circuit & theories.
2. To make the students capable of analyzing any given electrical network.
3. To learn about the use of mathematics, Laplace Transform & differential equations for network analysis.
4. To make the students learn how to represent an electrical network in terms of different parameters.

Course Outcomes: After completing the course, students will able to:

| | |
|-----|--|
| CO1 | Solve Circuits using Topology and circuit reduction techniques. |
| CO2 | Analyze the AC circuit using different network theorems. |
| CO3 | Analyze the circuit for steady state and transient response in time domain |
| CO4 | Analyze and evaluate transient response, Steady state response, network functions in S-domain |
| CO5 | Express given Electrical Circuit in terms of A,B,C,D and Z,Y Parameter model and solve the circuits. |

Detailed Syllabus:

| | |
|---------------|--|
| Unit 1 | Basic Concepts: Electrical parameters, Voltage and current sources(Dependent and Independent), Classification of electrical elements, Dot convention for coupled circuits, Concept of duality and dual networks. Network Topology |
| Unit 2 | Network Theorems: (Application to networks with all types of sources.) Node, Mesh, Super mesh & Super node analysis, Superposition, Thevenin's and Norton, Reciprocity, Substitution theorems, Millman's Theorem, Maximum power theorem, Compensation Theorem |
| Unit 3 | Solution of Network Equations: Initial and final conditions in elements and in networks, steady state and transient solution to RL,RC,RLC circuits. Forced and free response, Time constants, Physical and mathematical analysis of circuit transients |
| Unit 4 | Applications of Laplace Transform to Electrical Circuits: Laplace Transformation, Laplace Transforms of Some Important Functions, Properties of Laplace Transform, Laplace Transform of Periodic Functions, Solution of differential equations and network equations using Laplace transform method, Inverse Laplace transform, Transformed networks with initial conditions analysis of electrical circuits with applications of step, impulse and ramp functions, shifted and singular functions, The convolution integral Laplace transform of various periodic and non-periodic waveforms. |

| | |
|---------------|--|
| Unit 5 | <p>Network Functions: Driving-Point Functions, Transfer Functions, Analysis of Ladder Networks, Analysis of Non-Ladder Networks, Poles and Zeros of Network Functions, Restrictions on Pole and Zero Locations for Driving-Point Functions, Restrictions on Pole and Zero Locations for Transfer Functions, Two-Port Networks-Z,Y and transmission parameters H parameters, Interrelations between these parameters, Transfer function Interconnection of Two-Port Networks</p> <p>Trigonometric Fourier Series: Waveform Symmetry, Exponential Fourier Series, Average and RMS Value of a Periodic Complex Wave, Application of Fourier series to periodic and non- sinusoidal waveforms.</p> |

EEPCC2002 : Electrical Machines-I

| Teaching Scheme | | Examination Scheme | |
|-----------------|--------------|--------------------|------------|
| Lectures | : 3 Hrs/Week | ISE I | : 15 Marks |
| Tutorial | : 0 Hr/Week | ISE II | : 15 Marks |
| Total Credits | : 3 | ISE III | : 10 Marks |
| | | End -Semester Exam | : 60 Marks |

Course Description:

Electrical Machines-I is a one-semester course compulsory to all second year engineering students of the Electrical Engineering Department. The course is aimed to introduce fundamentals of D.C. machines to undergraduate students. The goal of this course is to understand and apply basic principles of D C motor, D C Generator and Transformers with their applications.

Course Objectives:

The objectives of the course are to learn

1. The principles of D.C. machines.
2. Fundamental concepts of Single and three phase transformer
3. The details of construction, operation, Characteristics and applications of dc motor, dc generator and transformer
4. Basic knowledge to develop practical skills

Course Outcomes:

After completing the course, students will be able to

| | |
|------|---|
| CO1. | Understand fundamental principles, performance and applications of three phase and single phase transformer |
| CO2 | Understand fundamental principles, performance and applications of dc motor |
| CO3 | To solve engineering problems of dc motor, dc generator and transformer |
| CO4 | Identify type of Transformer and DC machine |
| CO5 | Evaluate the steady state parameters, basic operating characteristics and performance of transformers and DC Machine. |

Detailed Syllabus:

| | |
|------------------|--|
| Unit-I | Magnetic circuits: Review of magnetic circuits-MMF, Flux, reluctance, inductance, review of Ampere's law and Biot-Savart law, magnetic field produced by a bar magnet and a current carrying coil through air and iron, B-H curve of magnetic materials, flux linkages vs current characteristics of magnetic circuits, energy stored in magnetic circuits |
| Unit-II | Single Phase Transformer: Principle, construction and operation of single phase transformer equivalent circuit phasor diagram, voltage regulation losses and efficiency, open circuit and short circuit test, polarity test, back to back (Sumpner's) test, separation of hysteresis and eddy current losses |
| Unit -III | Three phase Transformer: Three phase transformer construction types of connections and their comparative features, parallel operation of single and three phase transformers, Auto transformers construction, principle, application and comparison with two winding transformer, harmonics in magnetizing current phase conversion Scott connection, three to six phase conversion, Tap changing transformers, no load and on load tap changing, three winding transformers, cooling of transformers, ICT |
| Unit-IV | DC Machines Construction of dc machine, Types of field excitation- separately excited shunt and series characteristics of dc generator, voltage build-up in a shunt generator, armature reaction critical field resistance and critical speed. Induced emf in an armature coil, lap and wave winding, commutation. DC motor principle and working, derivation of torque equation, speed torque characteristics of separately excited shunt and series motors. Modern starters, Speed control, losses and efficiency |
| Unit-V | Single Phase Induction Motors: Construction, Double field revolving theory, Equivalent circuit, Torque slip characteristics, Modern starting methods, speed control types and applications. |

EEPCC2003: Electrical Measurement and Instrumentation

| | |
|-----------------------|------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 2 Hrs/Week | ISE I : 10 Marks |
| Tutorial : NIL | ISE II : 10 Marks |
| Total Credits : 2 | ISE III : - |
| | End Semester Exam : 30 Marks |

Course Description: Electrical Measurement & Instrumentation is a one-semester course compulsory to all second year engineering students of the department which introduces analog and digital measurement of different electrical and mechanical quantities.

Course Objectives:

The objectives of the course are to

To impart knowledge of principles of measurement of electrical quantities.

To enable students to learn construction and operating principles of electrical instruments.

To enable students to learn static and dynamic characteristics of electrical instruments.

To analyze and minimize errors in measurement.

To impart knowledge of IS codes and be able to do the electrical testing.

Course Outcomes :

After completing the course, students will able to:

| | |
|-----|---|
| CO1 | Explain the working principle of different electrical measuring instruments. |
| CO2 | Analyze the bridges for the measurement of Resistance, Inductance and Capacitance. |
| CO3 | Explain construction and working of electrical measuring instruments and compute the errors in CTs and PTs. |
| CO4 | Explain working of measuring instruments for non electrical quantities. |
| CO5 | Compare the digital measuring equipment for measurement of various electrical parameters. |

Detailed Syllabus:

| | |
|------------------|--|
| Unit-I | Measurement of circuit parameters using bridges: Classification of resistance, low resistance, Ammeter voltmeter method, Kelvin's double bridge Medium resistance- Ammeter voltmeter method -Wheatstone's bridge, High resistance- loss of charge method- measurement of earth resistance. Measurement of self inductance-Maxwell's Inductance bridge Measurement of capacitance-Schering's bridge Measurement of frequency-Wien's bridge. Measurement of high ac/dc and impulse voltage and current. DC Hall effect sensors. |
| Unit -II | Measuring Instruments: Measurement standards-Errors-Types of Errors- Statistics of errors, Need for calibration. Essentials of indicating instruments - deflecting, damping, controlling torques. General features of indicating, recording & integrating instruments, Types of instruments, Construction, Principle of operation and torque equation of moving coil, moving iron, electro-dynamometer, Induction, and electrostatic type instruments. Shunts and multipliers – extension of range. Principle of operation of the thermoelectric, rectifier type instruments. Power factor meter, errors and their compensation, calibration & testing; Calibration of Ammeter, Voltmeter and Wattmeter using DC potentiometers. IS codes. |
| Unit -III | Instrumentation: Purpose of instrumentation, Classification of instrumentation system, Sensors and Transducers for physical parameters: Transducers classification & selection of transducers, Strain gauges, Inductive & Capacitive transducers, Piezoelectric and Hall-effect transducers, Thermistors, Thermocouples, Photo-diodes & Photo-transistors, Encoder type digital transducers, Signal conditioning and telemetry systems, Measurement of non-electrical quantities such as torque, pressure, vibration, temperature, force, humidity etc., Flow, Speed and Position Sensors. |
| Unit -IV | Digital Measurement of Electrical Quantities: Concept of digital measurement, Study of digital voltmeter, Frequency meter, Power Analyzer and Harmonics Analyzer, Electronic Multimeter, Data Acquisition Systems, Data transmission system, Signal generators and Function generators, CRO and DSO, Introduction to PMU. |

Laboratory Course Outcomes

As an outcome of completing the Laboratory course, students will able to:

| | |
|-----|--|
| CO1 | Apply various basic laws and theorems of electrical circuit |
| CO2 | Understand effects of Initial and final conditions on networks. |
| CO3 | Understand and examine behavior of the network for the applications of Step, Impulse and Ramp functions. |
| CO4 | Explain the fundamental principle Fourier transform of Waveform Analysis. |
| CO5 | Analysis of electrical networks using two port networks concept and Concepts of Poles and Zeros. |

List of Experiments(any eight or more by simulation or Hardware)

1. Network Theory
2. Verification of Superposition Theorem
3. Verification of Thevenin's Theorem
4. Verification of Maximum Power Transfer Theorem
5. Verification of Reciprocity Theorem
6. Study of Step Response of R-L Network
7. Study of Step Response of R-C Network
8. Study of Time Response of R-L-C Network
9. Waveform Analysis by Fourier Methods
10. Verification of Two Port Network

Course Description: Electrical Machines-I Lab (EE xx) is a one-semester course compulsory to all second year engineering students of the department.

Course Objective: On completion of this Course the student shall be able to

1. To prepare the students to have a basic knowledge of transformers.
2. To prepare the students to have a basic knowledge of D. C. motors.

Course Outcomes: At the end of the course student will have ability to

| | |
|-----|--|
| CO1 | Select range of apparatus based on the ratings of DC Machines and Transformers. |
| CO2 | Determine equivalent circuit parameters of transformer by open circuit and short circuit test |
| CO3 | Evaluate the performance and parameters of transformer by analyzing load test results |
| CO4 | Investigate the magnetization characteristics of dc generator and performance of dc motor at no load and full load |
| CO5 | Select and demonstrate various methods to control the speed of D.C. machines for wide speed range |

List of Experiments:

| Sr. No. | Details |
|---------|--|
| 1 | Determination of efficiency, regulation of single phase transformer using open circuit & short circuit test |
| 2 | Determination of constants of equivalent circuit using open circuit & short circuit test on single phase/ three phase Transformer. |
| 3 | Parallel operation of single phase/three phase Transformers |
| 4 | To determine Efficiency & regulation of single phase Transformer by direct loading. |
| 5 | To perform Sumpner's test on Transformers |
| 6 | To perform Scott: connection of single phase Transformers. |
| 7 | To verify voltage & current relationships for various Three phase Transformer winding connections |
| 8 | To plot Magnetization, external and internal characteristics of a DC generator |
| 9 | To control Speed of a DC shunt motor by: (i) armature voltage control (ii) field control method |
| 10 | To Study the performance of DC shunt motor by load test. |
| 11 | Separation of transformer core loss into eddy current loss and hysteresis loss. |
| 12 | To determine equivalent circuit parameters of single phase induction motor |
| 13 | Study of conventional and industrial starters for DC Motors |
| 14 | Verification and analysis of no load current waveform of single phase transformer |

Visit to industry related to any machine or transformer related plant

ISE I :

It consists of submitting a file for a minimum of eight experiments with neatly written records of the study, circuit diagrams, observations, and graphs with results. The term work will be assessed by the course coordinator

Practical Examination:

The Practical Examination will consist of performing the experiment and viva voce on the syllabus. The practical will be assessed by two examiners, one will be the course coordinator and other will be an examiner appointed by DSB.

Laboratory Course Outcomes:

As an outcome of completing the Laboratory course, students will able to:

| | |
|-----|---|
| CO1 | Select the suitable type and range of measuring instruments for experiments |
| CO2 | Demonstrate the fundamental principle for measurement of power & Measure reactive power in 3-phase circuit using single wattmeter |
| CO3 | Accurately determine the values of inductance and capacitance using a. c bridges |
| CO4 | Determine and analyze the CT and PT ratio error and phase angle error |
| CO5 | Calibrate various electrical measuring/recording instruments. |

List of Experiments:

| Sr. No. | Name of the Experiments |
|---------|--|
| | Any 6 experiments from 1-14 |
| 1 | Measurement of a batch of resistors and estimating statistical parameters. |
| 2 | Measurement of L using a bridge technique as well as LCR meter |
| 3 | Measurement of C using a bridge technique as well as LCR meter. |
| 4 | Measurement of Low Resistance using Kelvin's double bridge. |
| 5 | Measurement of High resistance and Insulation resistance using Megger. |
| 6 | Current Measurement using Shunt, CT, and Hall Sensor. |
| 7 | Calibration and Testing of A.C. single phase / three phase Energy meter |
| 8 | Measurement of Power in three-phase circuit using Instrument transformers / wattmeter |
| 9 | Measurement of % ratio error and phase angle of given C.T. by Silsbee's method. |
| 10 | Measurement of voltage, current and resistance using DC potentiometer |
| 11 | Measurement of parameters of a choke coil using 3 voltmeter / 3 ammeter methods. |
| 12 | Measurement of reactive power using single wattmeter in three-phase circuit. |
| 13 | Measurement of high ac voltage |
| 14 | Measurement of High impulse Voltage using Sphere Gap |
| | Any 4 experiments from 15-23 |
| 15 | Measurement of different electrical quantities & harmonics using a power analyzer. |
| 16 | Measurement of voltage, frequency & phase with the help of CRO |
| 17 | Usage of DSO for steady state periodic waveforms produced by a function generator. Selection of trigger source and trigger level, selection of time-scale and voltage scale. Bandwidth of measurement and sampling rate. |
| 18 | Download one-cycle data of a periodic waveform from a DSO and use values to compute the RMS values using a C program. |
| 19 | Usage of DSO to capture transients like a step change in R-L-C circuit. |
| 20 | Measurement of Displacement with the help LVDT |
| 21 | Measurement of different ranges of temperatures using i) RTD ii) Thermocouple |
| 22 | Measurement of load with the help of strain gauges |
| 23 | Experimental set up for measurement of any non electrical quantities |

Course description: - This course Human has basic needs that they fulfill by making transactions in the market. Transactions mostly in the form of monetary exchange for goods and services are very basic for the survival of the human race. The present course is designed to study how consumers behave on the market and what the consequences of various behavior patterns. Additionally, the present course also looks at various psychological factors that shape the behavior and actions of the consumer in the global market

Course Outcomes: After completion of this course students will be able to

| | |
|-----|--|
| CO1 | Identify the key terms, concepts, and theories of consumer behavior |
| CO2 | Differentiate the principal theories of consumer behavior; critically assess strengths, limitations and applications |
| CO3 | Apply consumer behavior concepts to real world marketing problems |

Detailed Syllabus:

| | |
|-----------------|--|
| UNIT-I | Introduction to Consumer Psychology : Consumer behavior, Marketing and customer orientation, Needs and wants, Consumer decision-making process and steps, Consumer behavior model (Stimulus Response), Individual differences, Cognitive Factors (e.g., attention, learning and memory, self-control, and emotions) . Various models with descriptions. |
| UNIT-II | Consumer Decision Making Process: Need recognition, Information Search, Alternate Evaluation and Choice Consumption and Post-Purchase Behaviour. Heuristics in decision making, Consumer rationality, Factors influencing Consumer Decision Making, Cultural differences, Technology Influence, Marginal Utility. |
| UNIT-III | The Individual Consumer, Consumer perceptions, Memory and Learning, Mood, Emotion and Involvement, Consumer Attitude, Positioning, Marketing communications, Customer Relationship Management, Influencers. |

TEXT BOOKS:

1. Henry Assael, Consumer Behavior and Marketing Action, Cengage Learning
2. Jay Lindquist, Consumer Behavior, Cengage Learning
3. Leon Schiffman, Consumer Behavior, Pearson Press
4. Zubin Sethna, Consumer Behavior

Pre-requisites: Nil

Pre-requisites: Nil

Course Objectives:

1. To become aware about the various types of pollution, its sources, effects and control measures
2. To become aware about present environmental issues
3. To become aware of the importance of natural resources and environmental legislation
4. To become aware about environmental biotechnology and bio monitoring
5. To become aware of the biodiversity, conservation methods and factors for the loss of biodiversity

Unit wise Course Outcomes expected:

After completion of this course students will be able to-

CO1. Learn about the basics of environment

CO2. Understand the harmful effects of human activities on environment and their solutions

CO3. Understand the biodiversity, conservation methods and factors for the loss of biodiversity

CO4. Understand the concept of climate change, global warming, acid rain, various disasters and its mitigation measures

Detailed syllabus:

UNIT-I

A) Understanding Environment

- Environment: concept and importance
- Components of environment: Physical, Biological and Social
- Ecosystem Concept, Structure and Function
 - Producers, Consumers and Decomposers
 - Food chain, Food web and Ecological pyramids
 - Energy flow in an Ecosystem.
- Ecosystem services Ecological, economic, social, aesthetic and informational

B) Natural Resources

- Land resources: global land use patterns, concept land degradation and desertification
- Forest resources: Use and consequences of over-exploitation
- Water resources: Use and consequences of over-utilization, concept of water harvesting and watershed management, water conflicts
- Energy resources Renewable and non-renewable energy sources, growing energy needs and alternate energy sources

UNIT-II

A) Biodiversity and its conservation

- Biodiversity definition, levels (genetic, species and ecosystem) and values
- Threats to biodiversity :habitat loss, poaching of wildlife, biological invasions
- Concept of endemism and hot spots of biodiversity
- Conservation of biodiversity: In-situ and Ex-situ concepts

B) Environmental Pollution

- Causes, effects and control measures of Air, water, soil, noise, thermal, nuclear;
- Solid waste management
- Liquid waste management

UNIT-III

Environmental issues, policies and practices

- Global environmental issues: Increase in greenhouse gasses, climate change, Acid rain and stratospheric ozone layer depletion
- Salient features of Environment Protection Act, 1986
- Environmental education: Formal and Informal education
- Environmental Movements (Chipko Movement, Silent valley) and Environmental ethics

Pre-requisites- Nil

Course description: - This course examines electric and magnetic quasi static forms of Maxwell's equations applied to dielectric, conduction, and magnetization boundary value problems.

Course objectives: -

The objectives of the course are to learn

1. Have an ability to determine and describe static and dynamic electric and magnetic fields for technologically important structures: the coil, charge distributions, the dipole, the coaxial cable, dielectric and conducting spheres.
2. Understand the coupling between electric and magnetic fields through Maxwell's equations.
3. Knowledge of, physical interpretation, and ability to apply Maxwell's equations
4. Determine field waves, potential waves, and energy and charge conservation conditions.

Course Outcome:

After completing the course students will able to,

| | |
|-----|--|
| CO1 | Apply vector calculus to understand the behavior of static electric fields in standard configurations. |
| CO2 | Apply vector calculus to understand the behavior of static magnetic fields in dielectrics. |
| CO3 | Apply Maxwell's equation to dielectrics, conductors. |
| CO4 | Evaluate displacement current and motion of particles and conductors in time varying fields. |
| CO5 | Describe and analyze electromagnetic wave propagation in free-space ,dielectric. |

Detailed Syllabus:

| | |
|-----------------|--|
| UNIT-I | Static Electric Field: Coulomb's law, Electric field intensity due to different charge distribution, Electric flux density, Gauss' law, Divergence and Divergence theorem, Maxwell's first equation Potential and potential difference, Potential field of system of charges, Potential gradient, Dipole, The energy density in electric field. Poisson and Laplace Equation, Uniqueness Theorem |
| UNIT-II | Static Electric Field in Dielectrics: Continuity of current, Conductor properties and boundary conditions Nature of dielectrics, Boundary conditions for perfect dielectric material polarization and its effect in dielectric. |
| UNIT-III | Steady Magnetic Field: Biot-Savart law, Ampere's circuital law Curl, Stokes' theorem, Magnetic flux and magnetic flux density, Nature of magnetic material, Magnetic field and magnetization, Boundary conditions in magnetic field |
| UNIT-IV | Time Varying Field: Faraday's law, displacement current, Maxwell's Equations in point form and integral form |
| UNIT-V | Uniform Plane Wave: Wave propagation in free space, in dielectrics, Pointing vector and power consideration, Wave propagation in good conductor: Skin effect Reflection of uniform plane waves at normal incidence, Standing wave ratio. |

1-Low 2- Medium 3- High**Teaching Strategies:**

The teaching strategy is planned through the lectures, tutorials and team based home works. Exercises are assigned weekly to stimulate the students to actively use and revise the learned concepts which also help the students to express their way of solving the problems fluently in written form. Most critical concepts and mistakes are emphasized.

ISE III Assessment: Teacher's Assessment of 10 marks is based on one of the /or combination of the few of the following.

- 1) Home Assignments , 2) Develop working models, 3) Surprise written Test with multiple choice question

Sample Assessment table:

EEPCC2012: Electrical Machines-II

| | |
|-------------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 03 Hrs./Week | ISE : 15 Marks |
| Tutorial : 00 | ISE II : 15 Marks |
| Total Credits : 03 | ISE III : 10 Marks |
| | End -Semester Exam : 60 Marks |

Course Description:

Electrical Machines-II is a one-semester course compulsory to all second year engineering students. The Electrical Engineering Department Course is aimed to introduce fundamentals of A.C. machines to undergraduate students. The goal of this course is to understand and apply the basic principle of induction motor, synchronous motor, alternator and special purpose machines with their applications.

Course Objectives:

The objectives of the course are to learn

1. The principles A.C. machines.
2. Fundamental concepts of induction motor, synchronous motor and alternator.
3. The details of construction, operation, Characteristics and applications induction motor, synchronous motor and alternator
4. Fundamental concepts special purpose machines.
5. Basic knowledge to develop practical skills

Course Outcomes:

After completing the course, students will able to

| | |
|------|---|
| CO1. | Understand fundamental principles, performance and applications of three phase and single phase induction motor |
| CO2 | Understand fundamental principles, performance and applications of synchronous motor and Alternator |
| CO3 | To solve engineering problems of induction motor, synchronous motor and alternator |
| CO4 | To find regulation of synchronous alternators by various methods & to understand the parallel operation and synchronization of synchronous alternators. |
| CO5 | Understand the operation principles and identify the suitable applications of PMDC, PMSM, BLDC, SR motors and Linear Induction motors. |

Detailed Syllabus:

| | |
|-----------------|--|
| Unit-I | Three Phase Induction Motors: Construction, Types, Rotating magnetic field, Principle of operation, Torque equation, Torque slip characteristics, Losses & efficiency, Phasor diagram & equivalent circuit, No load test, Block rotor test, Circle diagram, Speed control & Starting of Induction Motors, EFFECT of Harmonics on I.M. Introduction to Double Cage Induction Motor, Induction Generator and Starters used in industries |
| Unit-II | Synchronous Motor: Principle of operation, Phasor diagram, Methods of starting, Operation at constant power & fixed excitation, Equivalent circuit, Power developed, Effect of excitation, Hunting and methods of suppression, Effect of harmonics, Synchronous condenser |
| Unit-III | Synchronous Generator: Construction, Types, Applications, Winding factors, EMF equation, Armature reaction, Phasor diagram, Load characteristics, Voltage regulation by synchronous impedance method, MMF method, Zero power factor method, |
| Unit-IV | Parallel operation of Synchronous Generators: Two reaction theory, Slip test. Parallel operation of Synchronous Generators, Methods of synchronization, Synchronization power Synchronizing torque, Operation of Synchronous Generator on infinite bus bar, Effect of load on synchronization power, Effect of unequal voltages |

| | |
|---------------|--|
| Unit-V | Special Purpose Machines: Construction and principle of operation of Permanent magnet DC motors, Brushless DC motors, Permanent Magnet Synchronous Motors, Switched Reluctance Motors, Linear Induction motors and their Applications, |
|---------------|--|

EEPCC2013: Power System-I

| | |
|---|---|
| Teaching Scheme Lectures : 3 Hrs./Week Total Credits : 3 | Examination Scheme ISE I : 15 Marks ISE II : 15 Marks ISE III : 10 Marks End -Semester Exam : 60 Marks |
|---|---|

Course Description: This is a one-semester course compulsory to all second year Electrical Engineering students. It is the fundamental course related to Power System Engineering.

Course Objectives: The objectives of the course are to

1. Introduce Electrical Power System
2. Introduce operation of various power plants, transmission network and distribution network
3. Develop an understanding of the environmental aspects of power generation
4. Develop professional skills required to design electrical power transmission system
5. Provide fundamental knowledge required for modeling and analyzing transmission networks

After completion of this course students will be able to

| | |
|-----|--|
| CO1 | Demonstrate working of various power plants |
| CO2 | Explain merits and demerits of high transmission voltage; Compare the conductor costs for various transmission systems |
| CO3 | Illustrate constructional and other aspect related to overhead conductors and underground cables |
| CO4 | Compare various distribution systems, calculate voltages etc. related to distribution systems and describe various aspects related to substation |
| CO5 | Describe fundamentals related to corona and power factor improvement and its impact on power system |

Detailed Syllabus

| | |
|-----------------|--|
| Unit-I | Introduction: Typical Layout of an Electrical Power System, Present Power Scenario in India. Generation of Electric Power: Conventional Sources (Qualitative): Hydro station, Steam Power Plant, Nuclear Power Plant and Gas Turbine Plant. Renewable energy Sources (Qualitative): Wind Energy, Fuel Cells, and Solar Energy. |
| Unit-II | Economics of Generation: Introduction, definitions of connected load, maximum demand, demand factor, load factor, diversity factor, Load duration curve, number and size of generator units. Base load and peak load plants. Cost of electrical energy-fixed cost, running cost, Tariff on charge to customer. AC Distribution: Introduction, AC distribution, Single phase, 3-phase, 3 phase 4 wire system, bus bar arrangement, Selection of site and layout of substation. |
| Unit-III | Overhead Line Insulators: Introduction, types of insulators, Potential distribution over a string of suspension insulators, Methods of equalizing the potential, testing of insulators. Insulated Cables: Introduction, insulation, insulating materials, Extra high voltage cables, grading of cables, insulation resistance of a cable, Capacitance of a single core and three core cables, Overhead lines versus underground cables, types of cables. |
| Unit-IV | Transmission line Constants and Sag calculation: The centenary curve, Sag tension calculations, Supports at different levels, Stringing Chart Line Constants: Line conductors, resistance of line, skin effect, proximity effect, inductance and capacitance of single phase and three phase lines with symmetrical and unsymmetrical spacing, GMD and GMR, Composite conductors-transposition, bundled conductors, and effect of earth on capacitance. |

| | |
|---------------|---|
| Unit-V | <p>Corona: Introduction, disruptive critical voltage, corona loss, Factors affecting corona loss and methods of reducing corona loss, Disadvantages of corona, interference between power and Communication lines. Related numerical problems</p> <p>Power Factor Improvement: Introduction, Advantages of Power factor Improvement, methods of improving power factor.</p> |
|---------------|---|

EEPCC2014: Digital Circuits

| | |
|------------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 2 Hrs./Week | ISE 1 : 10 Marks |
| Total Credits : 2 | ISE II : 10 Marks |
| | End -Semester Exam : 30 Marks |

Course Description: Digital Circuits is a one-semester course compulsory to all third year engineering students of the department.

Course Objectives:

The objectives of the course are to-

1. Provide the knowledge to understand common forms of number representation, logic gates and families, binary codes and Boolean algebra and to enable student to understand the logical operation of simple digital circuits
2. Enable student to construct combinational logic circuits
3. Design and implement counter circuits
4. Design and implement shift registers, multiplexers and de-multiplexers
5. Explain A/D converters and D/A converters

Course Outcomes: After completion of this course students will be able to

| | |
|-------------|---|
| CO1. | Explain digital codes, logical operations and number systems |
| CO2. | Design combinational logic circuits and also to perform lab work |
| CO3. | Facilitate the construction of sequential logic circuits like flip-flops, registers, counters |

Detailed Syllabus

| | |
|-----------------|--|
| UNIT-I | Fundamentals of Digital Systems and logic families Digital signals, digital circuits, AND, OR, NOT, NAND, NOR and Exclusive-OR operations, Boolean algebra, examples of IC gates, number systems-binary, signed binary, octal hexadecimal number, binary arithmetic, one's and two's complements arithmetic, codes, error detecting and correcting codes, characteristics of digital ICs, digital logic families, TTL, Schottky TTL and CMOS logic, interfacing CMOS and TTL. |
| UNIT-II | Combinational Logic Circuits Standard representation for logic functions, K-map representation, simplification of logic functions using K-map, minimization of logical functions. Don't care conditions, SOP and POS form Multiplexer, De-Multiplexer/Decoders, Adders, Subtractors, BCD arithmetic, carry look ahead adder, serial adder IC 7483, excess-3 adder, BCD to seven segment decoder, IC 7447., ALU, elementary ALU design, popular MSI chips, digital comparator, parity checker/generator, code converters, priority encoders, decoders/drivers for display devices, Q-M method of function realization |
| UNIT-III | Sequential circuits and systems A one-bit memory, the circuit properties of bi-stable latch, the clocked SR flip flop, J- K, T and D-types flip-flops, applications of flip-flops, shift-registers, applications of shift registers, serial to parallel converter, parallel to serial converter, ring counter, sequence generator, ripple(Asynchronous) counters, synchronous counters, counters design using flip flops, special counter IC's, asynchronous sequential counters, applications of counters |

EEPCC2015 :Lab- Electrical Machines-II

| | |
|---|--|
| Teaching Scheme Practical: 2 Hrs./Week Credit : 01 | Examination Scheme ISE I : 25 Marks Practical Examination & Viva Voce :25 Marks |
|---|--|

Course Objectives:

On completion of this course the student shall be able to

1. To prepare the students to have a basic knowledge of induction motor
2. To prepare the students to have a basic knowledge of synchronous machines

Course Outcomes:

At the end of the course student will have ability to

| | |
|-----|--|
| CO1 | Have knowledge of various parts of induction motor, synchronous machine |
| CO2 | To conduct experiments on induction motor, synchronous motor and alternator. |
| CO3 | To evaluate the induction motor constants |
| CO4 | To perform various tests on induction motor |
| CO5 | To evaluate regulation of alternator by various methods |

List of Experiments:

Term work shall consist of a record of minimum eight experiments performed from the following list.

| Sr. No. | Details |
|---------|---|
| 1 | Effect of variation of applied voltage on the performance of Induction motor |
| 2 | Perform No load test and block rotor test on 3-phase Induction motor & Plot Circle diagram of 3-phase Induction motor |
| 2 | Determine of equivalent circuit parameters of single phase Induction Motors |
| 3 | Determine parameters of equivalent circuit of 3-phase Induction motor |
| 4 | Speed Control of slip ring 3-phase Induction motor using cascade connection |
| 5 | Perform Load Test on three phase Induction motor |
| 6 | Determine regulation of a three phase Synchronous Generator by synchronous impedance method |
| 7 | Determine regulation of a three phase Synchronous Generator by MMF method |
| 8 | Determine regulation of a three phase Synchronous Generator by ZPF method |
| 9 | Determine regulation of a three phase Synchronous Generator by direct loading |
| 10 | Determine direct and quadrature axis synchronous reactance by using slip test |
| 11 | Plot V and inverted V curves of synchronous motor |
| 12 | Study of induction motor starters |
| 13 | Study of ISI- standards for Energy efficient motors |
| 14 | Synchronizing of alternators: Lamp Methods and use of Synchroscope |

Term Work:

The term work will consist of submitting a file for minimum eight experiments with neatly written records of the study, circuit diagrams, observations, and graphs with results. any another experiment can be added by course coordinator except above list of experiment The term work will be assessed by the course coordinator

Practical Examination:

The Practical Examination will comprise of performing the experiment and viva voce on the syllabus The practical will be assessed by two examiners, one will be the course coordinator and other will be an examiner appointed by DSB.

Mapping of Course Outcome with Program Outcomes:

| Course outcome | PO 01 | PO 02 | PO 03 | PO 04 | PO 05 | PO0 6 | PO 07 | PO0 8 | PO0 9 | PO 10 | PO 11 | PO 12 | PS O 1 | PS O 2 | P S O 3 |

| EEVSE2010 :Lab- Digital Circuits | |
|---|--|
| Teaching Scheme Practical: 2 Hrs./Week Credit : 01 | Examination Scheme ISE I : 25 Marks Practical Examination & Viva Voce :25 Marks |

Course Objectives:

The objectives of the course are to-

1. To expose the students to a variety of practical circuits using various digital ICs.
2. To provide hand-on experience in designing and implementing digital/logic circuits.

Course Outcomes:

After completion of this course students will be able to

| | |
|-----|--|
| CO1 | To verify truth-table of various logic gates, Boolean algebra |
| CO2 | Design and implement basic combinational and sequential logic circuits |
| CO3 | Develop technical writing skills important for effective communication |
| CO4 | Write assembly language programs and implement on 8085 microprocessor |
| CO5 | Write assembly language programs and implement on 8085 processor |

List of the Experiments:

The student shall perform minimum eight experiments of the following:

| Sr. No. | Name of the Experiments |
|---------|---|
| 1 | To verify truth table and identify IC numbers of basic logic gates |
| 2 | To build basic logic gates using universal gates |
| 3 | Verification of De Morgan's theorem |
| 4,5 | Design and implementation of combinational logic circuits based on examples such as to find the majority of one's, to find numbers exactly divisible by 3 or 4 etc. |
| 6 | To design arithmetic circuits such as half and full adder, half and full subtractor |
| 7,8 | To verify truth table of different flip-flop ICs |
| 9,10 | Design of mod-2, mod-5, mod-7/mod- 8/mod-9, mod-10 and reverse mod-10 counter using IC 7490 |
| 11,12 | Design of mod n synchronous counter |

| Teaching Scheme Theory: 2 Hrs./Week Credit : 02 | Examination Scheme ISE I : 10 Marks ISE II : 10 Marks ESE : 30 Marks |

Course Outcomes (COs):

At the end of the course, the student will be able to

| | |
|------------|--|
| CO1 | Understand the nature and objective of Technical Communication relevant for the workplace as Engineers. |
| CO2 | Utilize the technical writing for the purposes of Technical Communication and its exposure in various dimensions |
| CO3 | Imbibe inputs by presentation skills to enhance confidence in the face of a diverse audience. |
| CO4 | Evaluate their efficacy as fluent & efficient communicators by learning the voice-dynamics. |

Detailed Syllabus:

| | |
|-----------------|---|
| Unit I | Fundamentals of Technical Communication: Technical Communication: Features; Distinction between General and Technical Communication; Language as a tool of Communication; Dimensions of Communication: Reading & comprehension; Technical writing: sentences; Paragraph; Technical style: Definition, types & Methods; The flow of Communication: Downward; upward, Lateral or Horizontal; Barriers to Communication. |
| Unit II | Forms of Technical Communication: 7 Cs of effective business writing: concreteness, completeness, clarity, conciseness, courtesy, correctness, consideration; Technical Report: Definition & importance; Thesis/Project writing: structure & importance; C.V./Resume writing; Technical Proposal: Types, Structure & Draft. Seminar & Conference paper writing. |
| Unit III | Technical Presentation: Strategies & Techniques Presentation: Forms; interpersonal Communication; Classroom presentation; style; method; Individual conferencing: essentials: Public Speaking: method; Techniques: Clarity of substance; emotion; Humour; Modes of Presentation; Overcoming Stage Fear: Confident speaking; Audience Analysis & retention of audience interest |

| | |
|----------------|--|
| Unit IV | Technical Communication Skills and Kinesics & Voice Dynamics: Interview skills; Group Discussion: Objective & Method; Seminar/Conferences Presentation skills: Focus; Content; Style; Critical thinking; Nuances: Exposition narration & Description; Socio-linguistic competence: Strategic competence: Solution of communication problems with verbal and non verbal means. Definitions; importance; Features of Body Language; Voice Modulation: Quality, Pitch; Rhythm; intonation; Pronunciation; Articulation; stress & accent; Linguistic features of voice control: Vowel & Consonant Sounds. |
|----------------|--|

EEVSE2011: Numerical Computational Techniques(Audit Course)

| | |
|-----------------------------------|--------------------|
| Teaching Scheme | Examination Scheme |
| Theory : 1Hrs./Week(Audit course) | ISE 1 : 00 Marks |
| Total Credits :0 | ISE III : 00 Marks |
| | Total : 00 Marks |

Pre-Requisites:

MA1001: Engineering Mathematics- I, MA1002:Engineering Mathematics- II

MA2001: Engineering Mathematics-III, EE2004:Computer Programming

Course Description: Numerical Computational Techniques is a compulsory course to second year electrical engineering students of the department in the Semester –IV.

Course Objective:

This course strives to enable students

1. To provide the necessary basic concepts of a few numerical methods and give procedures for solving numerically different kinds of problems occurring in engineering and technology
2. To emphasize the need of computational techniques and analyze errors involved in the computation.
3. To provide an overview of numerical techniques to solve ordinary and partial differential equations, which we apply to solve many engineering problems of electrical Engineering.
4. To apply various numerical methods to obtain solutions of different types of equations such as transcendental, simultaneous, and also for interpolation, integration and differentiation.

Course Outcomes Expected:

After completion of this course students will be able to

| | |
|-----|---|
| CO1 | To demonstrate different types of computational techniques to find the roots of the equations |
| CO2 | Apply appropriate numerical method for solution of Transcendental and polynomial equation |
| CO3 | Apply and compare various numerical methods to solve first and second order ODE |
| CO4 | Apply different numerical methods for interpolation, numerical differentiation and integration. |
| CO5 | To demonstrate the applications of numerical computational techniques to engineering problems drawn from industry and other engineering fields. |

Detailed Syllabus

| | |
|-----------------|---|
| Unit-I | Nonlinear Equations: Bisection Method, Rule of False Position, The Secant Method, Newton–Raphson Method Linear Equations-Matrices-Substitution methods, Gauss elimination method, Gauss Jordan Method, triangularization method, Gauss Seidel iterative method |
| Unit-II | Curve Fitting: Linear Interpolation, Polynomial Interpolation, Least Squares Approximation |
| Unit-III | Numerical Differentiation: Method based on interpolation and finite difference Ordinary Differential Equations: Euler’s Method, Runge–Kutta Methods, Boundary Value Problems |
| Unit-IV | Numerical Integration: The Trapezium Rule, Quadrature Rules, Simpson’s Rule |
| Unit -V | Optimization : Introduction to Optimization, Unconstrained Optimization: Golden Search Method, Steepest Descent Method, Newton Method, evolutionary optimization method(any one), Lagrange Multiplier Method |

| Teaching Scheme | | Examination Scheme | |
| Practical | : 2Hrs./Week | ISE 1 | : 25 Marks |
| Total Credits | :1 | ESE | : 25 Marks |
| | | Total | 50 Marks |

Laboratory Course Outcomes

As an outcome of completing the Laboratory course, students will able to:

| | |
|-----|--|
| CO1 | Grasp the basic elements of numerical methods |
| CO2 | Solve linear & nonlinear algebraic equations and curve fitting |
| CO3 | Understand the basics of approximation, integration and differentiation. |
| CO4 | Apply the numerical solution of differential equation |
| CO5 | Apply the numerical solution of optimization |

At least two programs(two different methods) on each of the following numerical methods by using Matlab/ C/C++/ Python or any other language

- Nonlinear Equations
- Linear Equations
- Curve Fitting
- Numerical Differentiation
- Numerical Integration
- Ordinary Differential Equations
- Optimization

INVEC1001: Universal Human Values- II Understanding Harmony

| | |
|------------------------|----------------------------|
| Teaching Scheme | Examination Scheme |
| Tutorial : 2 Hrs./Week | ISE 1 : 10 Marks |
| Total Credits :2 | ISE II : 10 Marks |
| | ESE Exam Online : 30 Marks |
| | Total 50 Marks |

Prerequisites: Nil

Course description:

The objective of the course is fourfold:

1. Development of a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.
2. Understanding (or developing clarity) of the harmony in the human being, family, society and nature/existence
3. Strengthening of self-reflection.
4. Development of commitment and courage to act.

Course Outcomes:

After completing the course, students will able to:

Course Outcomes

By the end of the course, students are expected to become more aware of themselves, and their surroundings (family, society, nature); they would become more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind. They would have better critical ability. They would also become sensitive to their commitment towards what they have understood (human values, human relationship and human society). It is hoped that they would be able to apply what they have learnt to their own self in different day-to- day settings in real life, at least a beginning would be made in this direction.

This is only an introductory foundational input. It would be desirable to follow it up by

- a) faculty-student or mentor-mentee programs throughout their time with the institution
- b) Higher level courses on human values in every aspect of living. E. g. as a professional

Detailed Syllabus:

| | |
|----------------------|--|
| <p>Unit 1</p> | <p>Course Introduction - Need, Basic Guidelines, Content and Process for Value Education Purpose and motivation for the course, recapitulation from Universal Human Values-I Self-Exploration–what is it? - Its content and process; ‘Natural Acceptance’ and Experiential Validation- as the process for self-exploration. Continuous Happiness and Prosperity- A look at basic Human Aspirations. Right understanding, Relationship and Physical Facility- the basic requirements for fulfillment of aspirations of every human being with their correct priority. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario. Method to fulfill the above human aspirations: understanding and living in harmony at various levels. Home Work : Include practice sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co-existence) rather than as arbitrariness in choice based on liking-disliking</p> |
| <p>Unit 2</p> | <p>Understanding Harmony in the Human Being - Harmony in Myself! Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’. Understanding the needs of Self (‘I’) and ‘Body’ - happiness and physical facility. Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer). Understanding the characteristics and activities of ‘I’ and harmony in ‘I’. Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail. Programs to ensure Sanyam and Health. Home Work : Include practice sessions to discuss the role others have played in making material goods available to me. Identifying from one’s own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease</p> |
| <p>Unit 3</p> | <p>Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship 1 Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfillment to ensure mutual happiness; Trust and Respect as the foundational values of relationship. Understanding the meaning of Trust; Difference between intention and competence. Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship. Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals. Visualizing a universal harmonious order in society- Undivided Society, Universal Order- from family to world family. Home Work : Include practice sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss scenarios. Elicit examples from students’ lives.</p> |
| <p>Unit 4</p> | <p>Understanding Harmony in the Nature and Existence - Whole existence as Coexistence Understanding the harmony in Nature. Interconnectedness and mutual fulfillment among the four orders of nature recyclability and self regulation in nature. Understanding Existence as Co-existence of mutually interacting units in all pervasive space. Holistic perception of harmony at all levels of existence. Home Work : Include practice sessions to discuss human being as cause of imbalance in nature (film “Home” can be used), pollution, depletion of resources and role of technology etc</p> |

| | |
|---------------|---|
| Unit 5 | <p>Implications of the above Holistic Understanding of Harmony on Professional Ethics Natural acceptance of human values. Definitiveness of Ethical Human Conduct. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order. Competence in professional ethics:</p> <p>a. Ability to utilize the professional competence for augmenting universal human order b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems, c. Ability to identify and develop appropriate technologies and management patterns for above production systems.</p> <p>Some Case Studies can be given as home work Case studies of typical holistic technologies, management models and production systems Strategy for transition from the present state to Universal Human Order:</p> <p>a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers b. At the level of society: as mutually enriching institutions and organizations</p> <p>Sum up.</p> <p>Home Work: Include practice Exercises and Case Studies will be taken up in Practice Sessions eg. To discuss the conduct as an engineer or scientist etc.</p> |
|---------------|---|

MODE OF CONDUCT

Lectures hours are to be used for interactive discussion, placing the proposals about the topics at hand and motivating students to reflect, explore and verify them.. While analyzing and discussing the topic, the faculty mentor's role is in pointing to essential elements to help in sorting them out from the surface elements. In other words, help the students explore the important or critical elements. Such observations and their analyses are shared and discussed with other students and faculty mentor, in a group sitting. Tutorials (experiments or practical) are important for the course. The difference is that the laboratory is everyday life, and practical are how you behave and work in real life. Depending on the nature of topics, worksheets, home assignment and/or activity are included. The practice sessions (tutorials) would also provide support to a student in performing actions commensurate to his/her beliefs. It is intended that this would lead to development of commitment, namely behaving and working based on

basic human values. It is recommended that this content be placed before the student as it is, in the form of a basic foundation course, without including anything else or excluding any part of this content. Additional content may be offered in separate, higher courses.

This course is to be taught by faculty from every teaching department, including HSS faculty.

Teacher preparation with a minimum exposure to at least one 8-day FDP on Universal Human Values is deemed essential.

EEEEEM2010: Electricity Market and Management

| | |
|----------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Theory : 2 Hrs./Week | ISE I : 10 Marks |
| Total Credits :2 | ISE II : 10 Marks |
| | End -Semester Exam : 30 Marks |
| | Total 50 Marks |

Course Objectives: • To impart understanding of trading, auctions and strategic behavior of players in power market.

| | |
|-----------------|---|
| Unit I | Basic electricity framework in India Generation, Transmission, Distribution, National grid, interstate and intrastate transmission network, key stakeholders at national and state level, role and responsibilities of key stakeholders. |
| Unit II | National level Energy Policies / Missions National Energy Plan, National Electricity Policy, Tariff Policy, Energy storage policy, Key provisions of Electricity Act 2003 and Regulations, Provisions related to energy management like role and responsibilities of key stakeholders, electricity grid code,. |
| Unit III | Electricity Pricing framework in India Various provisions of Electricity Act 2003 which governs the electricity pricing, various methodologies for computation of electricity price for conventional generation and renewable energy technologies. |
| Unit IV | System operation and Electricity Market System operation in India at national /regional/state level, real time load-generation balance, electricity scheduling and dispatch process, real time deviation management regulations, Reserve requirement, types of reserves, Ancillary services framework, Security constraint Economic Despatch (SCED) and Security Constraint Unit Commitment (SCUC), Electricity Market in India, Electricity Exchanges, types of electricity markets, Day ahead market (DAM), Real Time Market (RTM), Capacity Market, Market Clearing Price, Area clearing pricing |

Course Description:

Electrical Machines-II is a one-semester course compulsory to all second year engineering students. The Electrical Engineering Department Course is aimed to introduce fundamentals of A.C. machines to undergraduate students. The goal of this course is to understand and apply the basic principle of induction motor, synchronous motor, alternator and special purpose machines with their applications.

Course Objectives:

The objectives of the course are to learn

1. The principles A.C. machines.
2. Fundamental concepts of induction motor, synchronous motor and alternator.
3. The details of construction, operation, Characteristics and applications induction motor, synchronous motor and alternator
4. Fundamental concepts special purpose machines.
5. Basic knowledge to develop practical skills

Course Outcomes:

After completing the course, students will able to

| | |
|------|--|
| CO1. | Understand basic principles of electric motor |
| CO2 | Understand basic terminologies related to electric vehicle drives |
| CO3 | Understand fundamental principles, performance and applications of three phase induction motor |
| CO4 | Understand the operation principles and identify the suitable applications of PMDC, PMSM, BLDC |
| CO5 | Understand the operation principles and identify the suitable applications of SRM motors |

Detailed Syllabus:

| | |
|-----------------|---|
| Unit-I | Electric motors Types of Motors, Selection and sizing of Motor, RPM and Torque calculation of motor Controllers Component sizing, Physical locations, Electrical connection of motor. |
| Unit-II | Electric Vehicle and HEV Drives Configurations of Electric Vehicles and HEV, Performance of Electric Vehicles and Hybrid EV, Traction Motor Characteristics, Tractive Effort and Transmission Requirement, Vehicle Performance, Tractive Effort in Normal Driving, Energy Consumption. |
| Unit-III | Three Phase Induction Motors: Construction, Types, Rotating magnetic field, Principle of operation, Starting of Induction Motors, Torque equation, Torque slip characteristics, Losses & efficiency, No load test, Block rotor test, Speed control &, Induction Generator and Starters used in industries |
| Unit-IV | Special Purpose Machines: Construction and principle of operation of Permanent magnet DC motors, Brushless DC motors, Permanent Magnet Synchronous Motors, |
| Unit-V | Switched Reluctance Motors Construction and principle of operation of Switched Reluctance Motors. and their Applications for EV |

Course Objectives

The objective of the course is to study about the motor & device characteristics & parameters, to know the various electric drive concepts and to gain knowledge of DC/AC drive mechanism. Also, students may understand about drives for special electrical machines.

After completing the course, students will able to:

| | |
|------------|---|
| CO1 | Describe structure, characteristics, and applications of power semiconductor devices |
| CO2 | Explain and analyze single and three phase AC-DC converters with different types of load and their control techniques |
| CO3 | Explain and analyze types, operation and control techniques of DC-DC converters |
| CO4 | Explain and analyze induction motor drives and its control |
| CO5 | Discuss and identify industrial applications of electrical drive |

Detailed Syllabus

| Unit | Contents |
|----------|--|
| 1 | Characteristics of Switching Devices Structure, Principle of operation, and V/I characteristics of power semiconductor devices such as GTO, SiC, Power Transistor, Power MOSFET, IGBT. |
| 2 | AC-DC Converters Principle & operation of single phase half wave and full wave converters with different types of load, Three phase half and full wave converters, Performance parameters, Use of freewheeling diode |
| 3 | DC-DC Converters Principle of operation of chopper, Basic principles of step-down and step-up operation, various control techniques, chopper classification, Various commutation methods, voltage, current, load commutated chopper, Buck, Boost, Buck-Boost converters. |
| 4 | Induction Motor Drives: Performance of 3-phase induction motor drives, Starting, Braking-Regenerative, Dynamic and Plugging, Speed control methods |
| 5 | Industrial Applications: Solar powered drives, Battery powered vehicles, Important features of Traction drive, Traction motors, Traction drives, Semiconductor converter controlled traction drives, EV applications. |

| | |
|---|--|
| Teaching Scheme Practical: 2 Hrs./Week Credit : 01 | Examination Scheme ISE I : 25 Marks Practical Examination & Viva Voce :25 Marks |
|---|--|

Course Objectives:

On completion of this course the student shall be able to

1. To prepare the students to have a basic knowledge of induction motor
2. To prepare the students to have a basic knowledge of BLDC, SRM

Course Outcomes:

At the end of the course student will have ability to

| | |
|-----|---|
| CO1 | Have knowledge of various parts of induction motor, |
| CO2 | To conduct experiments on induction motor, and evaluate the induction motor constants |
| CO3 | To perform simulation based experiments on SRM, BLDC |
| CO4 | To study characteristics of SCR, IGBT |
| CO5 | To perform experiments on single phase converters |

List of Experiments:

Term work shall consist of a record of minimum six experiments performed from the following list.

| Sr. No. | Details |
|---------|--|
| 1 | Effect of variation of applied voltage on the performance of Induction motor |
| 2 | Perform No load test and block rotor test to calculate efficiency of 3-phase Induction |
| 2 | Determine parameters of equivalent circuit of 3-phase Induction motor |
| 3 | Speed Control of slip ring 3-phase Induction motor using cascade connection |
| 4 | Perform Load Test on three phase Induction motor |
| 5 | Study of induction motor starters |
| 6 | Study of ISI- standards for Energy efficient motors |
| 7 | Simulation based experiments of BLDC |
| 8 | Simulation based experiments of SRM |
| 9 | Plot Static V-I Characteristics of SCR, IGBT, MOSFET |
| 10 | Draw waveforms of load voltages using Forced Commutation methods of SCR. |
| 11 | Draw waveforms of load voltages for single phase half wave and full wave Converter with R, RL loads. |
| 12 | Draw waveforms of load voltages for single phase half and fully controlled converter with R, RL loads. |
| 13 | To study characteristics of Buck converter |
| 14 | To study characteristics of Boost converter |
| 15 | To study characteristics of Buck- boost converter |

Term Work:

The term work will consist of submitting a file for minimum six experiments with neatly written records of the study, circuit diagrams, observations, and graphs with results. any another experiment can be added by course coordinator except above list of experiment The term work will be assessed by the course coordinator

Practical Examination:

The Practical Examination will comprise of performing the experiment and viva voce on the syllabus The practical will be assessed by two examiners, one will be the course coordinator and other will be an examiner appointed by DSB.

Mapping Of Course Outcome with Program Outcomes:

| | |
|--|--|
| Teaching Scheme Theory : 3Hrs./Week Practical : 0 Hrs/Week Total Credits : 3 | Examination Scheme ISE I : 15 Marks ISE II : 15 Marks ISE III : 10 Marks End -Semester Exam : 60 Marks Total : 100 Marks |
|--|--|

Pre-requisites: Nil

Course Description: - Provides the student with basic knowledge of industrial automation. This course introduces the basic concept of process control, building blocks of automation, and various control configurations.

Course Objectives: -The objectives of the course are to

1. Describe various measurement systems using sensors
2. Explain various process control configuration
3. Illustrate various controllers used in industry
4. Explain PLC, SCADA, PDC systems
5. Describe and Illustrate valves used in Industry

Unit wise Course Outcomes expected: Students will be able to

| |
|---|
| CO1. Use of various sensors for measurement of physical parameters |
| CO2. Understand terminology used in process control |
| CO3. Use controller such as P, PI, PID |
| CO4. Understand the principle and operation of PLC |
| CO5. Differentiate various actuators |

Detail syllabus:

| | |
|-----------------|---|
| UNIT-I | Sensors for physical quantity measurement : Introduction to sensors and measurement systems, Temperature measurement, Pressure and Force measurements , Displacement and speed measurement, Flow measurement techniques, Measurement of level, humidity, pH etc., Signal Conditioning and Processing |
| UNIT-II | Introduction to Process Control: Requirements of Process Control, Classification of Process Variables, Open-loop Vs Closed Loop control, Feedback and Feed forward Control Configuration, Cascade, Feed forward, and Ratio Control, multi loop Cascade Control, Feed forward Control, Feed forward-Feedback control configuration, Ratio Controller |
| UNIT-III | Type of Controllers: Introduction, PID control, Classification of Controllers, Controller Terms, Introduction, Transfer functions of closed loop, Proportional controller in closed loop, Integral controller in closed loop, Proportional-integral controller in closed loop, Proportional derivative controller in closed loop, Proportional-integral-derivative controller in closed loop, |
| UNIT-IV | Programmable Logic Controllers Introduction, Classification of PLCs Basic parts of a PLC, Operation of a PLC, Basic symbols used in PLC realization, Difference between PLC and Hardwired systems, difference between PLC and computer, Relay logic to ladder logic, Ladder commands, Examples of PLC ladder diagram realization, |
| UNIT-V | Actuators Introduction various automation devices used in industry, Control of Machine tools, Electric Drives, Energy Saving with Adjustable Speed Drives. |

The course aims to identify suitable energy storage systems for Electric Vehicles, compare different energy storage systems and explain use of Energy management systems for Energy Storage systems.

Course Outcomes: Students will be able to:

1. Identify suitable energy storage systems for Electric Vehicles.
2. Compare different energy storage systems.
3. Explain use of Energy management systems for Energy Storage systems.

Detailed syllabus

| | |
|---------------|--|
| Unit 1 | Fundamentals Introduction to Electrochemical battery, battery capacity, Battery Parameters and Comparisons, Battery Pack Discharge Curves and Aging, Battery Models, SOC, SOD, SOH, DOD, Battery technologies used in recent EVs, Lead acid battery, Nickel based battery, Lithium-ion battery, comparison of Battery types. |
| Unit 2 | Fuel Cells Electrical characteristics of fuel cells, Overview of key Fuel cell technologies, fuel cell types, electrode materials, electrolytes and other components, working principles, Hydrogen generation and storage, limitations, recent progress in Fuel cell technologies, safety issues vs cost aspects, life cycle analysis. |
| Unit 3 | Ultra-capacitors Features, basic working principle, fundamentals of Electrochemical super-capacitors, Electrodes, and electrolyte interfaces and capacitances, charge discharge characteristics, Energy/power density, Design, fabrication, Ultra-capacitor technologies, graphene based Ultracapacitors, Introduction to Flywheel, Hybridization of different energy storage devices. |
| Unit 4 | EV Charging: Basic Requirements for Charging System, Charger topologies, Grid Voltages, Frequencies, and Wiring, Charger Functions, Real Power, Apparent Power, and Power Factor, Charging Standards, Wireless Charging, Converters in EV charging |
| Unit 5 | Battery and Energy Management Systems Battery Management Systems: Background of Battery Management Systems, Typical Structure of BMSs. Energy management strategies, Optimization techniques used in Hybrid and Electric vehicles for Energy storages, classification of Energy Management strategies, comparison and implementation issues of Energy management strategies. |

Laboratory Course Outcomes:

As an outcome of completing the Laboratory course, students will able to:

| | |
|------------|---|
| CO1 | To study characteristics of sensors |
| CO2 | To study signal conditioning of sensors |
| CO3 | Differentiate various control systems,and control system components |
| CO4 | Describe various types of control systems |
| CO5 | Explain operation of industrial controllers |

List of Experiments:

Term-work shall consist of minimum 10 experiments from the following:

| Sr. No. | Details |
|---------|--|
| 1 | To study the performance characteristics of various physical sensors |
| 2 | To study signal conditioning of sensors |
| 3 | To study characteristics of synchro transmitter and synchro receiver |
| 4 | To study the speed torque characteristics of a DC servo motor |
| 5 | To study the speed torque characteristics of a AC servo motor |
| 6 | To study responses(Step and Impulse) of system |
| 7 | To study responses of PLPD and PID for temperature controller |
| 8 | To study temperature controller |
| 9 | To study the time response of a variety of simulated linear systems and to correlate the studies with theoretical results. |
| 10 | To study PLC architecture |
| 11 | To study any one industrial controller |

| | |
|---|---|
| Teaching Scheme Lectures : 03 Hrs./Week Total Credits : 03 | Examination Scheme ISE : 15 Marks ISE II : 15 Marks ISE III : 10 Marks End -Semester Exam : 60 Marks |
|---|---|

Course Description:

In this curriculum, students will be explored in Renewable Energy Technologies such as Wind energy, Solar energy. They will be introduced to concepts of fuel cells and biomass energy.

Course Objectives:

The objectives of the course are to learn

1. Different types of energy sources
2. Various solar PV technologies and its characteristics
3. Various solar thermal technologies and its applications
4. Wind energy technologies and its operations
5. Grid integration of wind energy systems and its associated issues

Course Outcomes:

After completing the course, students will able to

| | |
|-------------|---|
| CO1. | Elaborate different types of energy sources |
| CO2 | Explain various solar PV technologies and its characteristics and solve numerical on it |
| CO3 | Describe various solar thermal technologies and its uses in various applications |
| CO4 | Discuss wind energy technologies and explain its operations |
| CO5 | Explain grid integration of wind energy systems and its associated issues |

Detailed Syllabus:

| | |
|-----------------|--|
| UNIT-I | Basics of Energy: Energy and Power, Hubert peak, Energy Scenario in India, Environmental impact of fossil fuels, Different types of energy sources - solar, wind, tidal, geothermal, wave energy, Introduction to fuel cells and Biomass |
| UNIT-II | Solar PV Technology: Amorphous mono-crystalline, poly-crystalline, V-I characteristics, Shading impact, PV module, Array, Maximum Power Point Tracking, Grid connected and standalone systems |
| UNIT-III | Solar Thermal Technology: Solar Spectrum, Solar Geometry, Sun Earth angles, Solar radiation at given locations, Flat plate collector, Parabolic trough, Central receiver, parabolic dish, Fresnel, solar pond, solar still |
| UNIT-IV | Wind Energy Technology: History of wind power, types of wind turbines, power in the wind, Betz limit, Tip speed ratio, stall and pitch control, wind speed statistics, probability distribution, wind generator topologies, voltage and reactive power control, power quality standard for wind turbines |
| UNIT-V | Grid Integration of Wind Energy: Wind farms, real and reactive power regulation, voltage and frequency operating limits, wind farm behavior during grid disturbances, power system interconnection, Economic aspects |

| Total Credits | : 03 | ISE II | : 15 Marks |
| | | ISE III | : 10 Marks |
| | | End -Semester Exam | : 60 Marks |

Course Objective:

The objectives of the course are to introduce and learn

1. Different types of renewable energy sources
2. Various solar PV technologies and its characteristics
3. Various solar thermal technologies and its applications
4. Wind energy technologies and its operations
5. Grid integration of wind energy systems and its associated issues

Course Outcomes: After completing the course, students will be able to:

| | |
|-----|--|
| CO1 | Understand different renewable energy sources and storage devices |
| CO2 | Explain various solar PV technologies and its characteristics |
| CO3 | Describe various solar thermal technologies and its uses in various applications |
| CO4 | Discuss wind energy technologies and explain its operations |
| CO5 | Analyze and simulate control strategies for grid connected and off-grid systems |

Detailed Syllabus:

| | |
|---------------|---|
| Unit 1 | Introduction: Electric grid, Utility ideal features, Energy Scenario in India, Environmental impact of fossil fuels, Different types of energy sources - solar, wind, tidal, geothermal, wave energy |
| Unit 2 | Dynamic Energy Conversion Technologies: Introduction, types of conventional and nonconventional dynamic generation technologies, principle of operation and analysis of hydro and wind based generation technologies, types of wind turbines, power in the wind, Betz limit, Tip speed ratio, stall and pitch control, wind speed statistics, probability distribution, wind generator topologies, voltage and reactive power control, power quality standard for wind turbines |
| Unit 3 | Static Energy Conversion Technologies: Principle of operation and analysis of fuel cell, photovoltaic systems and generation technologies; MPPT techniques and its classifications, principle of operation and partial shading effects; Storage Technologies -batteries, flywheels, ultra & super capacitors . Design of stand-alone systems, Amorphous mono-crystalline, poly-crystalline & Thin film solar cell, Introduction to organic Solar PV Cell |
| Unit 4 | Solar Thermal Technology: Solar Spectrum, Solar Geometry, Sun Earth angles, Solar radiation at given locations, Flat plate collector, Parabolic trough, Central receiver, parabolic dish, Fresnel, solar pond & solar still |
| Unit 5 | Grid Integration of Energy Introduction & importance, sizing, Grid connected Photovoltaic systems classifications, operation, merits & demerits; operation & control of hybrid energy systems, Solar Photovoltaic applications. IEEE & IEC standards for renewable, energy grid integrations. |

EEMDM2013: Lab Renewable Energy Technology

| Teaching Scheme | Examination Scheme |
|-------------------------|---------------------------|
| Practical : 02 Hrs/Week | Term Work : 25 Marks |
| Credits : 01 | Total : 25 Marks |

Term Work shall consist of a record of minimum twelve experiments/assignments using engineering computation software such as MATLAB, PSCAD, ETAP with moderate to high complexity.

Following is the list of experiments is just a guideline (Hardware and Software base)

1. Plot I-V and P-V characteristics of single Solar PV Module with radiation and temperature changing effects
2. Plot I-V and P-V characteristics with series and parallel combination of Solar PV modules.
3. Study effect of shading on output power of Solar PV Module
4. Measure output power of solar PV system with effect of tilt angle
5. Plot charging and discharging characteristics of battery
6. Measure performance parameters of DC load system with and without battery (with variable rated capacity system) in Solar PV stand-alone system.
7. Measure performance parameters of AC load system with and without battery in Solar stand-alone PV system.
8. Measure performance parameters of Combine AC and DC load system with and without battery in Solar stand-alone PV system.
9. Study of biomass plant
10. Identify and measure the parameters of a solar PV Module at Specific location
11. Measure the spectral response of a solar cell and Calculate quantum efficiency
12. Study solar resource assessment station and record associated parameters
13. Simulate characteristics of fuel cell using electrical software
14. Simulate operation of wind turbine and measure associated parameters using electrical software
15. Study of Tri-brid system

|-------------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 03 Hrs./Week | ISE : 15 Marks |
| Total Credits : 03 | ISE II : 15 Marks |
| | ISE III : 10 Marks |
| | End -Semester Exam : 60 Marks |

Detailed syllabus

| | |
|-----------------|---|
| Unit I | Introduction Introduction to Energy Economics Energy and Multidimensional Interactions, Energy Basics, How Energy is Defined, Introduction to Energy System, Energy Information, Energy Accounting Framework: Components of Energy Account, Commodity Accounts and Overall Energy Balance, Units, Conversion Factors and Aggregation of Energy Flow. Energy Resources and Energy Commodities; Properties of Energy Resources and Energy Commodities; Law Of Thermodynamics; Energy, economy and environment interactions, role of energy in development and growth |
| Unit II | Global Demand for Energy Causes and Impact of increase in Demand for Energy; World Energy Consumption Energy Consumption by End-use Sector (Buildings Sector, Industrial Sector, Transportation Sector), Global Variations in Energy Use; Understanding and analyzing energy demand: evolution of demand analysis, overview of energy demand decision, economic foundation of energy demand, consumer demand for energy: utility maximization problem, demand models |
| Unit III | Energy Supply Analysis Classify energy on the basis of sources, renewable or nonrenewable; worldwide energy supply by country; sources of energy supply, Fossil fuels (coal, oil, natural gas), economic theory of depletable resources, Trend and patterns of energy production; Social, Economic and Environmental Effects of Energy Production; Life Cycle of Energy Sources. Fossil fuel Supply Models, Supply Forecasting, Economics of Fossil fuel supply, Electricity, oil and gas, coal, strategies for modeling exhaustible resources, economics of energy generation such as power, coal, oil and gas, estimation of supply functions and cost functions. |
| Unit IV | Cost versus Return of Investment Basic pricing model, Pricing Structure of different Energy sources such as short run and long run, peak and off peak, single part and two-part tariffs, Regulated vs market price, Average and Marginal cost pricing, ToD pricing, seasonal, and block pricing. |
| Unit V | Energy taxes and subsidies: Principles of optimal indirect taxation, equity considerations, issues related to numerical determination of a burden, Tax and subsidy structure in Indian Context, Energy pricing in Indian Context (Coal, Gas and Electricity), Different Energy Markets. Case Studies of ONGC, NTPC, GAIL,.HINDALCO(Private thermal power plants) |

This course is a study of the physical production, transmission, and perception of sound. The focus is on the characteristics of sounds which we interpret as music. To understand what distinguishes music from other sounds, we will have to learn the basic relationships which govern all vibrations and waves. In this course these ideas will be applied to the major families of musical instruments, including the voice. We will also consider how music is affected by the environment (acoustics) and how sound is physically and physiologically registered and psychologically perceived.

Detailed Syllabus

| | |
|-----------------|---|
| Unit I | Vibrations waves and Sound Draw a diagram of a wave labeled with amplitude and wavelength, difference between transverse and longitudinal waves, the wave equation ($v = f \lambda$), and the relationship between period and frequency, draw a diagram of a standing wave labeled with node and antinode, State that standing waves arise due to the superposition of a wave with its reflection, difference between time domain and frequency domain. |
| Unit II | Sound and Music Sound wave characteristics, schematic diagram of the human ear and explain the functions of the different parts, the range of human hearing, propagation of sound waves by the musical instruments,, the relationship between measured wave quantities and perceived sound (loudness/amplitude, pitch/fundamental frequency, timbre/spectrum+envelope). Hearing. Sound Pressure, Power, and Loudness., Pitch and Timbre, Combination Tones and Harmony, Musical Scales and Temperament., basis of musical scales, just intonation & quot; and & quot; just interval & quot;, the pythagorean scale, and the pythagorean comma, temperament, the difference between a diatonic and chromatic scale, the advantages and disadvantages of the 12-EDO scale. |
| Unit III | Musical Instruments Explain timbre in terms of spectrum and envelope, For each class of instrument (stringed, wind, brass, voice and percussion), Draw a diagram illustrating the means of sound production, Describe the way in which sound is produced, Discuss the differences between instruments in the class, (eg single vs double reeded, bowed vs plucked) , Measure and discuss the dynamic range and timbre of instruments using smart phone app and computer software, Explain how sound is generated in an electric guitar, Give examples of the methods of generating sounds in electronic instruments, Discuss the differences between acoustic and electronics instruments |
| Unit IV | Architectural Acoustics State and use the formula giving the decibel difference between two sounds of a given intensity ratio, and define the Sound Pressure Level of a sound, Measure the SPL of a range of sounds using a meter, smartphone app or computer, Define the reverberation time of a room, Discuss the acoustical properties desirable in buildings (eg Concert halls, Opera houses, lecture rooms), Measure the reverberation time for a room by using a smartphone app, or meter. |

| | |
|---------------|---|
| Unit V | <p>Recording and Measurement</p> <p>Draw a diagram of a loudspeaker and explain how it works, Explain the difference between analogue and digital recording, Draw a diagram illustrating the conversion of an analogue to digital signal, Discuss the advantages and disadvantages of digital and analogue recording, Discuss the relative environmental impact of listening to a track on vinyl and in lossless digital format.</p> <p>Demonstrate the use of audio measurement software tools on Android and Computer, Discuss the difference between systematic and statistical errors in measurement, Write a report of a workshop project</p> |
|---------------|---|

EEOEC2010:Basic Engineering Economics

| | |
|-------------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 02 Hrs./Week | ISE : 10 Marks |
| Total Credits : 02 | ISE II : 10 Marks |
| | End -Semester Exam : 30 Marks |
| | Total marks :50 marks |

Detailed syllabus

| | |
|-----------------|--|
| Unit I | Basic Concepts of Economics: Definitions, Overview of Micro and Macro Economics, Explanation of theories of demand, supply and market equilibrium and Economics Basics – Cost, efficiency and scarcity, Opportunity Cost |
| Unit II | Micro-Economics Differences and Comparison, Theories of Utility and Consumers Choice, Competition and Market Structures, Markets and Prices, Market Failures, Income Distribution and Role of Government Macro Economics Aggregate Demand and Supply, Economic Growth and Business Cycles, The role of the Nation in economic activity, New Economic Policy in India, Fiscal Policy, GDP and Inflation, Consumption, savings and investments, Commercial and Central banking |
| Unit III | Industrial Economics Behavior of firms: Strategies with regard to entry, pricing, advertising, and R & D and innovation. The development of Firms and Market and Industrial Structure: Stochastic models of firm growth, and market structure, inter-industry differences in growth rate variance, economies of scale, technical change, mergers and market concentration. Development of Competitive capabilities: Role of Technology and Skills, FDI and Technology Transfer, Technological Spillovers, Globalization and Technology Intermediation. |

EEOEC3001 : Smart Building Services

| | |
|-------------------------|-------------------------------|
| Teaching Scheme | Examination Scheme |
| Lectures : 03 Hrs./Week | ISE : 15 Marks |
| Total Credits : 03 | ISE II : 15 Marks |
| | ISE III : 10 Marks |
| | End -Semester Exam : 60 Marks |

Course Description:

The course is prepared to provide detailed understanding of smart building services in industry.

| | |
|-----------------|--|
| Unit I | Fire fighting System: Introduction to Fire System, fire EXTINGUISHER as per NPFA 10 & NBC, sprinkler system NPFA 13 & NBC, standpipe system NPFA 14 & NBC, fire pump & fire tank NFPA 20 & NBC, fire pump & fire tank NFPA 7 |
| Unit II | Heating Ventilation and Air conditioning system: Introduction of HVAC, Fundamentals of Heat Transfer, Air-Conditioning System and Equipment, Refrigerants, Cooling Load Calculation, Heating System and Heating Load Calculation, Air Distribution System, Ducting and Air Terminals, Fans, Water Distribution System-Pipes and Valves, Pumps, Cooling Tower, Heat Exchanger, VRV/VRF System, Ventilation System |
| Unit III | Plumbing System: Introduction to Plumbing, Plumbing Hydraulics, Sanitary Fixtures, Plumbing System, Formula for flow through pipes, Cold and Gray Water Supply System, Pump, Hot Water Supply System, Garden Water Supply System and Fountain System External Water Supply for Building's, Drainage System, External Foul Water Drainage, Storm Water Drainage in Building, Mix Topics |
| Unit IV | Electrical System: Introduction to Electrical System, Lighting Design, Calculation and Luminaries Selection, Power Services, Cables, Cables Trays, Conduit and Trunking, Short Circuit, Switch Gears, Panel Boards, Transformer, Capacitor Bank, Bus Bar, Single Line diagram, Earthing |
| Unit V | Building Security Systems Security appliances, alarm, Cameras, Barriers, Bolards, Turnstile gates, X-Ray Scanner etc and their communication |
