

**Government College of Engineering
Chhatrapati Sambhajinagar**
(An Autonomous Institute of Government of Maharashtra)
Station Road, Osmanpura, Chhatrapati Sambhajinagar – 431005 (M.S.)
Phone – (0240) 2366101, 2366111, Fax (0240) 2332835

**Curriculum for M. Tech. in Production Engineering
(NEP Compliant)**

(With Effect from Academic Year 2026-27)

Vision of the Institute

- In pursuit of global competitiveness, the institute is committed to excel in engineering education and research with concern for environment and society.

Mission of the Institute

- Provide conducive environment for academic excellence in engineering education.
- Enhance research and development along with promotion to sponsored projects and industrial consultancy.
- Foster development of students by creating awareness for needs of society, sustainable development and human values.

Vision of the Mechanical Engineering Department

- To develop excellence in Mechanical Engineering.

Mission of the Mechanical Engineering Department

- Impart sound knowledge and technical skills through conducive ambiance with right attitude towards society and environment.
- Enhance research facilities, collaboration with industry and provide testing and consultancy services.
- Nurture entrepreneurial qualities, creativity and provide motivation for higher education.
- Inculcate self-learning, team work and adoptability to change.

Program Outcomes

PO1: An ability to independently carry out research investigation and development work to solve practical problems.

PO2: An ability to write and present a substantial technical report/document.

PO3: Students should be able to demonstrate a degree of mastery over the area as per the specialization of the program. The mastery should be at a level higher than the requirements in the appropriate bachelor program.

PO4: Ability to enhance experiential learning through project-based activities.

PO5: Formulate and solve production related problems by applying advanced methods.

GENERAL COURSE STRUCTURE & THEME

A. Definition of Credit:

1 Hr. Lecture (L) per week	1 Credit
1 Hr. Tutorial (T) per week	1 Credit
1 Hr. Practical (P) per week	0.5 Credit
2 Hours Practical (P) per week	1 Credit

B. Range of Credits: M.Tech. in Production: The total number of credits proposed for the two-year full time M.Tech. in Production Engineering is kept as **62**.

**C. Semester wise Credit Distribution Structure for Two-Year Full-Time PG
Program in Production Engineering:**

Semester		I	II	III	IV	Total Credits
Programme Core Course (PCC)	Program Courses	12	08	-	-	20
Programme Elective Course (PEC)		04	06	-	-	10
Open Elective (OE) Other than a particular program	Multidisciplinary Courses	-	02		-	02
Vocational and Skill Enhancement Course (VSEC)	Skill Courses		02	-	-	02
Ability Enhancement Course (AEC)	Humanities Social Science and Management (HSSM)	-	02	-	-	02
Entrepreneurship/Economics/ Management Courses		-	-	02	-	02
Indian Knowledge System (IKS)		-	-	02	-	02
Research Methodology	Experiential Learning Courses	02	-	-	-	02
Project		-	08	12	-	20
Co-curricular Courses (CC)	Liberal Learning Courses	-	-	-	-	Audit
Total Credits (Major)		18	28	16	0	62

D. Category-wise Courses

1. VOCATIONAL AND SKILL ENHANCEMENT COURSE (VSEC)

S. No	Category	Course Title	Semester	Hours per week			Total Credits
				Lecture	Tutorial	Practical	
1	VSEC	Mini Project – I	II	0	0	4	02
Total Credits							02

2. HUMANITIES & SOCIAL SCIENCES COURSES [HSSM]

S. No	Category	Course Title	Semester	Hours per week			Total Credits
				Lecture	Tutorial	Practical	
1	Ability Enhancement Course (AEC)	Seminar	II	0	0	2	02
2	Entrepreneurship/Economics/ Management Courses	Economics / Management Courses	III	2	0	0	02
3	Indian Knowledge System (IKS)		III	2	0	0	02
Total Credits							06

3. EXPERIENTIAL LEARNING COURSES (ELC)

S. No	Category	Course Title	Semester	Hours per week			Total Credits
				Lecture	Tutorial	Practical	
1	Research Methodology	Research Methodology	I	2	0	0	02
2	Project	Dissertation - I	II	0	0	4	02
3	Project	Dissertation - II	III	0	0	16	08
4	INT	Internship/ On Job Training	IV	0	0	20	10
Total Credits							22

4. LIBERAL LEARNING COURSES (CO-CURRICULAR COURSES (CC))

S. No	Category	Course Title	Semester	Hours per week			Total Credits
				Lecture	Tutorial	Practical	
1	CC	Stress Management through Yoga	I	0	0	2	Audit
Total Credits							-

5. OPEN ELECTIVE (OE) OTHER THAN A PARTICULAR PROGRAM

One courses of 2 credits

Following courses are offered as Open Electives (OE) by Mechanical Engineering Department

S. No	Category	Course Title	Semester	Hours per week			Total Credits
				Lecture	Tutorial	Practic al	
1	OE	Additive Manufacturing	II	2	0	0	02
Total Credits							02

Total				0	0	20	10	50	100	150	300

MEPCC5101: Advanced Manufacturing Techniques		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Recognize the fundamental concepts of casting design in practice.
CO2	Understand Rapid Prototyping Process for industrial applications
CO3	Apply knowledge of advanced chip less manufacturing process to manufacturing various products.
CO4	Enhance and develop professional skill of metal coating to improve life of product.
CO5	Apply knowledge of micro machining, nano-machining, micro and nano finishing and micro joining processes to manufacture MEMS components.

Detailed Syllabus:

Unit 1	Casting Process: Sand casting process, orientation of the part in the mould, design of mould cavity, selection of parting line, design of patterns and cores, design of feeding system, solidification of castings. Heat transfer in the solidification process, Riser design and location. Design for casting
Unit 2	Rapid Prototyping: Introduction to RPT: Design and tooling, Classification, Stereo lithography systems Direct Metal Laser Sintering (DMLS), Fusion Deposition modeling, Laminated Object manufacturing, Solid Ground Curing, 3D printers, Laser Engineering Net Shaping (LENS), Ballistic Particle manufacturing (BPM), Introduction to Rapid Tooling, Advantages, disadvantages and applications of RPT.
Unit 3	Advanced Chip less Metal Removal Processes: working principle, effect of process variable, performance analysis and applications of following processes. Abrasive Flow Finishing (AFF), Magnetic Abrasive Finishing (MAF), Abrasive Water Jet Machining (AWJM), Laser Beam Machining (LBM), Plasma Arc Machining (PAM), Electron Beam Machining (EBM), Electric Discharge Machining: Die sinking and Wire Cut EDM.
Unit 4	Metallic Coating: Importance, Principle, application of - Chemical vapor deposition, Physical vapor deposition, Thermal spray coating, Electroplating, Electroless Coating.

Unit 5	Micro and Nano Machining Processes: Introduction, Micro-turning, Micro-drilling, Micro-milling, Micro and nano-grinding, Nano-grinding tools, Laser Micromachining-Laser microfabrication, Laser nanofabrication. Micro and Nano Finishing Processes: Need for Nano finishing, Magnetic abrasive Finishing, Magnetorheological Finish, Elastic Emission Finishing, Magnetic Float Polishing, Ion Beam finishing. Micro Joining Challenges, Micro Resistance welding, Ultrasonic welding, Micro TIG, Applications

1 – Low, 2 – Medium, 3 – High

MEPCC5102: Lab - Advanced Manufacturing Techniques – I		
Teaching Scheme	Examination Scheme	
Practical: 02 Hrs. / Week	ISE II	25 Marks
Credit: 01		

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Apply the fundamental concepts of casting design in practice.
CO2	Understand the effect various machining parameters on metal deposition rate and surface roughness in 3 D printing.
CO3	Identify the effect of machining parameters on Metal Removal Rate and Surface Roughness in CNC Wire Cut, CNC Die Sinking EDM and Laser Cutting.
CO4	Characterization of coating parameters by scratch tester.
CO5	Understand the use of micro and nano-machining set up, micro and nano-finishing set up and micro joining for various industrial applications.

List of the Experiments:

The student shall perform following experiments:

Sr. No.	Title of the Experiments
1	Design of mould cavity, selection of parting line, design of pattens and cores, design of feeding system, Riser design and location for a casting.
2	Experiment on 3D printer to study the effect various machining parameters on metal deposition rate and surface roughness.
3	Experiment on CNC Wire Cut, CNC Die Sinking EDM and Laser Cutting to study the effect of process parameters on Metal Removal Rate and Surface Roughness.
4	Visit to micro and nano-machining, finishing, joining industry.

Assessment:

ISE II- Continuous Assessment of individual student during each experiment.

Maximum Marks-25

Assessment Pattern:

Assessment Pattern Level No.	Knowledge Level	ISE II
S1	Implementation	04
S2	Manipulation	07

MEPCC5103: Advanced Mathematical Methods		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Apply differential equations to solve engineering problems.
CO2	Solve system of equations using direct and iterative numerical methods.
CO3	Apply systems of equations to solve mechanical engineering problems.
CO4	Design and create a model using curve fitting.
CO5	Apply finite difference method for solving engineering problems.

Detailed Syllabus:

Unit 1	Numerical Methods to Solve Partial Differential Equations: Hyperbolic equations, parabolic equations, elliptic equations, solution of Laplace equations, solution of Poisson's equations, solution of elliptic equations by relaxation method, solution of 1-D and 2-D heat flow equation, solution of wave equation.
Unit 2	Matrices: Matrix inversion, Gauss elimination method, Gauss Jordan method, Crout's triangularisation method, Partition method, Iterative method, Homogeneous systems the eigen- value problem, the power method, Jacobi's method, eigen-values of symmetric matrices, transformation method, transformation of generalized eigen-value problem to standard, Thomas Algorithm for Tri-Diagonal Matrix.
Unit 3	Solution of Algebraic and Transcendental Equations: Basic properties of equations, Bisection method, False Position method, Secant method, Iteration method, Aitken's Δ^2 method, Newton Raphson method, Horner's method, Muller's method, Root squaring method and Comparison of iterative method.
Unit 4	Curve Fitting: Least square curve fitting procedures for straight line, Nonlinear curve fitting, weighted least square approximation, Method of least square for continuous function.
Unit 5	Finite Difference Methods: Formation of difference equation, linear difference equation, rules for finding out complementary function and particular integral, difference equations reducible to linear form, simultaneous difference equation with constant coefficients, application to deflection of a loaded string and simply supported beams or cantilevers.

Teaching Scheme	Examination Scheme	
Practical: 02 Hrs. / Week	ISE II	25 Marks
Credit: 01		

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Estimate solutions for differential equations using numerical techniques.
CO2	Solve system of equations using iterative numerical methods.
CO3	Design and create a model using curve fitting.
CO4	Develop solution for engineering applications with numerical techniques.

List of the Experiments:

The student shall perform following experiments:

Sr. No.	Title of the Experiments
1	Development of codes for solving partial differential equations for a) Parabolic Equation, b) Laplace Equation
2	Development of codes for solving matrices a) Gauss Elimination Method, b) Thomas Algorithm for Tridiagonal Matrix
3	Development of codes for solving algebraic and Transcendental equations a) Bisection Method, b) False Position method, c) Newton Raphson method
4	Development of codes for curve fitting a) Straight line, b) Power equation, c) Exponential equation, d) Quadratic equation
5	Coding the algorithms developed for solution of any problem selected by student from the field of Production Engineering.

Assessment:

ISE II- Continuous Assessment of individual student during each experiment.

Maximum Marks-25

MEPCC5105: Collaborative Engineering		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Illustrate product life management, Conceptual design, QFD
CO2	Infer the design considerations in casting, moulding, welding, forging, sheet metal operations.
CO3	Compute Cost, reliability, Value, quality house of product and experiment DFA on new product.
CO4	Explain soft tools used for product developments

Detailed Syllabus:

Unit 1	Collaborative PLM: Concept – product development through cross-functional teams supported by information and communication technologies, Product innovation, Product lifecycle, Product definition using QFD, Conceptual design, Concept evaluation.
Unit 2	Design for Manufacture: Design for moulding, Design for forging and welding, Design for sheet metal forming, Design for machining.
Unit 3	Design for Assembly: Design for use (ergonomics), Design for safety and reliability, Design for service/maintenance, Design for environment.
Unit 4	Design for Quality and Cost: Design for quality, Design to cost, Product cost estimation, Product lifecycle cost, important aspects affecting market competitiveness, Value engineering (self-study).
Unit 5	Product Lifecycle Engineering: Product data management, Product structure and storage, Workflow and project management, Change management, Distributed product data management, Web-based collaboration, Knowledge management, Collaborative engineering team, PDM/PLM systems, DFM/PLM software demonstration, Intelligent CAX/PLM, Future evolution.

MEPEC5101: Flexible Manufacturing Systems		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Articulate basic concepts of FMS
CO2	Describe elements of automation and automation strategies
CO3	Illustrate automated flow lines in FMS
CO4	Explain group technology in FMS
CO5	Predict different AMM systems and automated storage

Detailed Syllabus:

Unit 1	FMS Concept: CAD-CAE-CAM, components of FMS, flexibility in manufacturing, volume variety relationship, FMS workstation, machining centers, application and benefits, building blocks of FMS, FMS control.
Unit 2	FMS Layout: Planning for the FMS, analysis and optimization of FMS, organization and information processing in manufacturing, production concepts and mathematical models (numerical), automation strategies.
Unit 3	Automated Flow Lines: Methods of work-part transport, transfer mechanisms, buffer storage, control functions, automation for machining operations, analysis of transfer lines without storage, concept of partial automation, automated flow lines with storage buffers.
Unit 4	Group Technology: Introduction, Definition, Reasons for Adopting Group Technology, Benefits of Group Technology Affecting Many Areas of a Company, Obstacles to Application of GT
Unit 5	Automated Material Movement and Storage System: Introduction, Types of AGV and Their principle of working, Advantages, Limitation and General AGV Guide path, Robots, Benefits of using Industrial Robots, Basic components and benefits of Automated Storage and Retrieval Systems, Conveyors and Pallet Flotation System, Queuing Carrousel and Automatic Work Changers, Coolant and Chip Disposal and Recovery system.

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Infer solutions and its implementation by using advanced operation research techniques
CO2	Solve the problems using spreadsheet
CO3	Formulate the real-life problems
CO4	Solve CPM and PERT problems using spreadsheet

Detailed Syllabus:

Unit 1	Introduction: History, what is Operations Research, where can OR be applied, what are OR techniques, Important steps in tackling OR problems effectively, general methods of deriving solution, limitations of OR Advanced Linear Programming: The techniques and its applications, definitions and mathematical formulation, problems formulations, graphical solution, simplex method, duality in LP, dual simplex method, sensitivity analysis in LP, degeneracy in LP, no feasible solution, unbounded solution. Modeling and solving LP problems using spreadsheet
Unit 2	Goal programming: Revised simplex method, parametric programming, integer linear programming, Branch & bound algorithm, Gomory's cutting plane algorithm.
Unit 3	Investment Decision: Rationale and criteria, the concept of chain of equipment, cost volume profit analysis under uncertainty, risk adjusted discounted rate, risk analysis. Replacement Analysis: Why to replace, replacement of items, which gradually deteriorate, sudden failure preventive replacement.
Unit 4	Project Management: CPM, PERT, forward pass, backward pass, critical path, Project Management using spreadsheet, Gantt Chart, project crashing using spreadsheet.
Unit 5	Dynamic Programming: Introduction, concept of dynamic programming, principle of optimality, stage coach problem, optimum route problem, allocation of salesman to territories, planning production of seasonal items, Markovian decision process, Toy makers problem, Taxi cab problem.

Assessment: ISEI (Class Test), ISEII (TA) & ESE**TA: Students will perform one or more of the following activities**

1. Surprise Test
2. Assignment
3. Quiz
4. Any other activity suggested by course coordinator

Assessment Pattern

Assessment Pattern Level No.	Knowledge Level	ISE I	ISE II	End Semester Examination
K1	Remember	05	00	12
K2	Understand	05	10	18
K3	Apply	10	10	18
K4	Analyze	00	00	12
K5	Evaluate	00	00	00
K6	Create	00	00	00
Total		20	20	60

Mapping of Course Outcomes with Program Outcomes:

Outcomes	PO1	PO2	PO3	PO4	PO5
CO1	1	2	1	3	2
CO2	1	1	2	2	3
CO3	1	2	2		
CO4	1	1	2		

1 – Low, 2 – Medium, 3 – High

MEPEC5103: Modern Management Systems		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Explain the current state of the modern management techniques
CO2	Demonstrate latest management tools and techniques
CO3	Interpret strategic management tools and its efficient application

Detailed Syllabus:

Unit 1	Quality Management: Introduction to Quality management, principal of Quality management, Philosophies of various Quality Gurus, Quality planning, Quality circle, Human dimension in TQM, Quality Management Tools like Brainstorming, Histogram, check sheet, pareto diagram, Ishikawa Diagram, control chart, scatter diagram, Affinity diagram, Tree diagram, Five S theory. Quality certification, ISO 9000.
Unit 2	Just In Time: Element of JIT manufacturing, Advantages, limitations, plant arrangement for flexible plan, planning, control, kanban, just in time logistics, Implementation issues in JIT manufacturing, Inventory management for JIT.
Unit 3	Consumer Behavior: Concept, Definition and Importance -A conceptual overview of Customer and Consumers –Applying Consumer Behavior knowledge – Interdisciplinary influence on the study of Consumer Behavior – On line Consumer Behavior –Interactive Decision Aids and Electronic Satisfaction.
Unit 4	Strategic Management: Objectives of strategic management process, formulation of strategic intent, Strategic analysis, Formulation of strategy, Implementation of strategy, Strategic evaluation and control Types of Strategies, SWOT analysis, benchmarking, Concept, Meaning and definitions, Process and Types of Benchmarking, Advantages and Limitations of Benchmarking
Unit 5	Contemporary Advance Management: Digital Transformation, Design Thinking, Sustainability and Corporate Social Responsibility (CSR), Data Analytics and Business Intelligence Innovation Management, Leadership in the Digital Age Global Business Management

Outcomes	PO1	PO2	PO3	PO4	PO5
CO1	2	2	1		1
CO2	1		2	2	
CO3	1	3	2	1	

1 – Low, 2 – Medium, 3 – High

MEPEC5104: Modern Engineering Materials		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Predict the heat treatment process for a particular ferrous and nonferrous material.
CO2	Determine composite material for different applications.
CO3	Select a material for design and construction.
CO4	Explain composite and organic material properties

Detailed Syllabus:

Unit 1	Ferrous Materials: Mechanical properties, heat treatments and applications; stainless steel and heat resisting steels, precipitation hardened able steels, valve steels, high strength low alloy steel (HSLA), micro alloyed steels, ball bearing steel, tool steels, high nitrogen steels, alloy cast-iron
Unit 2	Nonferrous Materials: Mechanical properties, heat treatments and applications; copper alloys (Brasses and Bronzes), Al-alloys (Al-Mg-Si, Al-Cu, Al-Si), designation system in Al – alloys.
Unit 3	Composites: Classifications, properties, application of composites, polymer matrix materials, metal matrix materials, ceramic matrix materials, carbon materials, glass materials, fiber reinforcements, types of fibers, whiskers, laminar composites, filled composites, particulate reinforced composites
Unit 4	Design of composites materials: Hybrid composites, angle plied composites, mechanism of composites, calculation of properties, unidirectional fiber composites, critical volume fraction, discontinuous fiber composites, rule of mixtures equation, critical angle. Analysis of an Orthotropic Lamina, strengths of orthotropic lamina, analysis of Laminated Composites, stress strain variations in laminates
Unit 5	Nanomaterial and Organic Materials: Classification, properties, application of polymers, plastics and elastomers. Ceramics: Classification, properties, structures of refractories, abrasive materials, electronic ceramics, cement and concrete. Nanomaterials: Introduction, Classification: 0D, 1D, 2D, 3D nanomaterials and nano-composites, their mechanical, electrical, optical, magnetic properties, Nanomaterials versus bulk materials

MEPEC5105: Engineering Experimental Techniques		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Explain dynamic measurements
CO2	Analyze experimental data
CO3	Interpret experimental observation using statistical tools
CO4	Selection of appropriate measuring equipment, measuring sensors, data acquisition and storage system

Detailed Syllabus:

Unit 1	Basic Concepts: Definition of terms, Calibration, Standards, Dimensions and units, the generalized measurement system, Basic concepts in dynamic measurements, system response, distortion, impedance matching, experimental planning, first-order and second-order responses.
Unit 2	Analysis of Experimental Data: Causes and types of experimental errors, uncertainty analysis, evaluation of uncertainties for complicated data reduction
Unit 3	Statistical analysis of experimental data: probability distributions, the Gaussian, normal error distribution, probability graph paper, the Chi-square test of Goodness of fit, The method of least squares, the correlation coefficient, standard deviation of the mean, t-distribution, Graphical analysis and curve fitting, general considerations in data analysis.
Unit 4	Force Torque and Strain Measurements: Mass balance measurements, elastic elements of force measurements, torque measurement, stress strain measurements, various types of strain gauges, Motion and Vibration measurement: Simple vibration instruments, principles of the seismic instruments, practical considerations of seismic instruments, sound measurements. Pressure, Temperature, Heat flux, Thermal conductivity measurement, various transducers, selection of measuring instruments.
Unit 5	Data Acquisition and Processing: The general data acquisition system, signal conditioning, data transmission, analog to digital and digital to analog conversions, data storage and display, the program as substitute for wired logic.

MEPEC5106: Management Information Systems & Enterprise Resource Planning		
Teaching Scheme	Examination Scheme	
Lectures: 04 Hrs. / Week	ISE I	20 Marks
Credits: 04	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Describe the use and function of management information systems;
CO2	Describe the different roles of people in information systems
CO3	Demonstrate a good understanding of the basic issues in ERP systems
CO4	Interpret the strategic options for ERP identification and adoption
CO5	Design the ERP implementation strategies

Detailed Syllabus:

Unit 1	Basic Concepts of Information System Role of data and information, Organization structures, Business Process, Systems Approach and introduction to Information Systems.
Unit 2	Types of Information System Resources and components of Information System, integration and automation of business functions and developing business models. Role and advantages of Transaction Processing System, Management Information System, Expert Systems and Artificial Intelligence, Executive Support Systems and Strategic Information Systems.
Unit 3	Introduction to ERP Introduction, evolution, Scenario and Justification of ERP in India, Evaluation of ERP, Various Modules of ERP, Advantage of ERP, Integrated Management Information, Business Modeling, ERP for Small Business
Unit 4	ERP and Related Technologies ERP and Related Technologies, Business Process Reengineering (BPR), Management Information System (MIS), Executive Information System (EIS), Decision support System (DSS), Supply Chain Management (SCM)
Unit 5	ERP Implementation Lifecycle Issues in Implementing ERP Packages, Pre-evaluation Screening, Package Evaluation, Project Planning Phase, Gap Analysis, Reengineering, Configuration, Implementation, Team Training, Testing, Going Live, End-User Training, Post Implementation (Maintenance Mode). Future Directions in ERP New Markets, New Channels, Faster Implementation Methodologies
	Expert lecture on topics related to practical tools in the field to be arranged.

MERMC5101: Research Methodology		
Teaching Scheme	Examination Scheme	
Lectures: 02 Hrs. / Week	ISE I	10 Marks
Credits: 02	ISE II	10 Marks
	ESE	30 Marks

Course Outcomes:

After completing the course students will be able to

Course Outcomes	
CO1	Develop the ability to comprehend core research concepts, define key elements like variables and hypotheses, and critically evaluate literature to identify research gaps.
CO2	Justify their chosen research methods and explain their advantages and limitations.
CO3	Create well-structured research proposals that include clear research objectives, methods, and expected outcomes.

Detailed Syllabus:

Unit 1	Foundations and Methods of Research Meaning, objectives, significance of research; research approaches; research methods vs. methodology; scientific method; research process; criteria of good research; identifying and defining the research problem; selecting a research problem; research design; research plan; literature review; qualitative and quantitative research methods; historical, case study, ethnography, ex post facto, documentary and content analysis; survey methods (descriptive, normative, evaluative); field and laboratory experimental studies; characteristics, advantages, limitations, and implications of various research methods.
Unit 2	Data Collection and Data Analysis Concept of sampling; probability and non-probability sampling; sampling techniques and implications; tools of data collection—questionnaire, opinionnaire, observation, interviews, scales, and tests; designing and standardizing research tools; qualitative data analysis; quantitative data analysis; tabulation, graphs and charts; measures of central tendency and dispersion; hypothesis testing; parametric and non-parametric tests; validity, reliability, and delimitations of research findings.
Unit 3	Research Proposal, Interpretation and Report Writing Research proposal and its elements; formulation and definition of research problems; sources and criteria for selecting research problems; development of objectives; characteristics of objectives; formulation and application of hypotheses; interpretation of research findings; techniques of interpretation; research report writing; layout and types of research reports; technical paper writing; oral presentation of research findings; mechanics of report writing; plagiarism and research ethics.

INCCC5101: Stress Management through Yoga		
Teaching Scheme	Examination Scheme	
Practicals: 02 Hrs. / Week	Audit Course	
Credits: 00		

Course Description: Co-curricular activities are activities that take place outside of a course's curriculum but are related to academics in some way. Although involvement is not part of classroom instruction, it does supplement and enhance a student's academic experience.

Yoga - In today's stressful life, there is much more need to experience relaxation and remain focused. The inner connect is very much needed to retain stability. Beyond physical exercise there is much more to do in the field of Yoga. The content of this course includes Yoga, Pranayam, Meditation, Relaxation, rejuvenation and connection with our own self. The introduction of such an experiential course helps to boost self-confidence and with regulation of mind through meditation improves concentration. Meditation is basically training of mind and helps to regulate it. Along with experiential learning, the students are also exposed to learnings contained in the supported literature.

The student shall perform: a) Perfection in at least 3 types of Yoga-asanas (Trikonasan, Konasan and Ushtrasan) b) Perfection in at least 3 types of Pranayama (Anulom-Vilom, Bhramari and Kapalbhathi) c) Regular practice of Yoga-asanas, Pranayam and Meditation for 10 minutes during the allotted periods as per the time table and daily at home.

The evaluation is based on participating and performing Yoga, Pranayam and meditation regularly and perfectly under the guidance by Yoga Teachers. Meditation trainers will observe intrinsic goodness, right attitude and happy and joyous way of doing things.

Club activities: Government Engineering College Chhatrapati Sambhajinagar has various clubs that focus on specific interests such as robotics, coding, literature, environment, etc. These clubs often organize events, workshops, and competitions that provide students with opportunities to learn new skills and showcase their talents. Students will participate in Club Activities throughout semester. Faculty coordinators will coordinate along with students bodies the activities of club.

The faculty coordinators will certify at the end of semester about participation of students.

MEPCC5106: Robotics and Automation		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Explain robot anatomy and robot performance
CO2	Illustrate robot force and motion for particular case and knowledge for sensor and gripper selection
CO3	Classify different controllers of robots and compute the gripper operations
CO4	Illustrate PLC's programming for particular industrial systems

Detailed Syllabus:

Unit 1	Automation and Robotics: Definition, need of the robotics, market and future prospects, differentiation of robots from other automation systems, near relations to robots, robot usages and conditions for its application, robot anatomy and characteristics: classification, point to point and continuous path system, control loops of robot system, work volume, speed of movement, dynamic performance, accuracy and repeatability, drive system, sensors used in robotics, letter symbol, coding and kinematics arrangement
Unit 2	Transformations and Kinematics: Coordinate transformation -vector operations – basic transformations matrices - properties of transformation matrices-homogeneous transformations– forward solution, DH algorithm - inverse kinematic solution, brief robot dynamics
Unit 3	Controls and End Effectors: Control system concepts - analysis - control of joints -adaptive and optimal control – end effectors - classification - mechanical - magnetic - vacuum - adhesive - drive systems and controls- force analysis and gripper design
Unit 4	Robot Applications: Work cell control and interlocks, robot applications in manufacturing like material transfer and machine loading/unloading, processing operations, assembly and inspection, etc., introduction to robotics technology of the future, future applications.
Unit 5	Automation: Introduction, types of automation, types of automation systems, Programmable Logic Controllers, parts of a typical PLC system, programming of PLC, example applications of PLC in a CNC machine.

MEPCC5107: Lab – Robotics and Automation		
Teaching Scheme	Examination Scheme	
Practical: 02 Hrs. / Week	ISE II	25 Marks
Credit: 01		

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Illustrate Robot Anatomy
CO2	Demonstrate different robot sensors and grippers
CO3	Illustrate robot programme methods for particular industrial applications
CO4	Explain PLC programming for particular industrial applications

List of the Experiments:

The student shall perform following experiments:

Sr. No.	Title of the Experiments
1	Study of robot anatomy
2	Experiment on various robotic sensors and its use in practice
3	Robot programming methods and languages
4	PLC: Various hardware types of PLC (CPU and I/O modules). Centralized configuration of PLC.
5	Visit to an automation industry

Assessment:

ISE II- Continuous Assessment of individual student during each experiment.

Maximum Marks-25

Assessment Pattern:

Assessment Pattern Level No.	Knowledge Level	ISE II

MEPCC5108: Production Management		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Implementation of various manufacturing strategies and able to work out manufacturing excellence
CO2	Development of product design procedures and implementation of forecasting techniques and various design processes
CO3	To derive capacity strategies of various processes and its implementation
CO4	Enable to develop the use of various process flow charts and balancing methods
CO5	Implementation and execution of SCM concepts and forecasting techniques

Detailed Syllabus:

Unit 1	Operation Management: Introduction to Operations Management, Operations Strategy in a global economy, Operations Management and Productivity, Types and Characteristics of Manufacturing and Service Systems, Product Design
Unit 2	Product Design: New product concept, strategies for new product development process, concurrent engineering, designing for customer, Quality function deployment, designing products for manufacturing and assembly, technology forecasting and technology development process. Process Design: Choice of technology, process flow characteristics, process selection decisions, process strategies, use of Break-even analysis in process/machine selection
Unit 3	Project Management: Total Productive Maintenance, Introduction to Project Management, PERT and CPM, Project Risk Management
Unit 4	Quality Management: Nature of Quality, Evolution of Quality Management, Modern Quality Management, Total Quality Management, Statistical Concepts in Quality Control
Unit 5	Supply Chain Management: Supply chain, outsourcing, make or buy decision, value density, supplier selection, JIT purchasing, global sourcing and distribution. Forecasting: Time series analysis techniques, linear regression, moving average, exponential smoothing, casual relationship forecasting, forecast error, choice of forecasting techniques, aggregate planning, operation planning overview, production planning environment, production strategies and aggregate planning strategies

Credit: 01		

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Inferring of CMM for practical measurement purpose
CO2	Interpret the use of 3D scanner for measurement.
CO3	Predicting the effect of machining parameters on Metal Removal Rate and Surface Roughness in CNC Turning
CO4	Predicting the effect of machining parameters on Metal Removal Rate and Surface Roughness in CNC Milling
CO5	Implementing 3D Printers used for various industrial applications.
CO6	Illustrating the use of TIG and MIG Welding.

List of the Experiments:

The student shall perform following experiments:

Sr. No.	Title of the Experiments
1	Industrial visit to a nearby industrial hub to demonstrate Measurement of dimensions of a component by using CMM.
2	Measurement of dimensions of a component by using 3D scanner
3	Manufacturing a component by using CNC Turning
4	Manufacturing a component by using CNC Milling
4	Programming and manufacturing of product using 3D Printer
6	Experimentation on advanced Joining processes like TIG and MIG Welding

Assessment:

ISE II- Continuous Assessment of individual student during each experiment.

Maximum Marks-25

Assessment Pattern:

Assessment Pattern Level No.	Knowledge Level	ISE II
S1	Implementation	04
S2	Manipulation	07
S3	Precision	14
S4	Articulation	00
S5	Naturalization	00
Total Marks		25

Knowledge Level	ISE II
Preparation S1	04
Conduct of Experiment S2	04
Observation & analysis of Results S3	08
Record S2	03
Mini project/ Presentation/Viva Voce S3	06
Total Marks	25

Mapping of Course Outcomes with Program Outcomes:

Outcomes	PO1	PO2	PO3	PO4	PO5
CO1	2		1	2	2

CO3	3		2	2	
CO4	2		2	1	
CO5	2		2	2	
CO6			2	3	

1 – Low, 2 – Medium, 3 – High

MEPEC5107: Machine Tool Design		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Associating the concepts of transmission system
CO2	Implement the knowledge to develop machine tool
CO3	Articulate and formulate Engineering problems in Machine tool Design
CO4	Execution of analytical skill on working with Numerical Control of Machine Tools.

Detailed Syllabus:

Unit 1	Machine Tool Drives and Mechanism and design of cutting tools: Working, Auxiliary Motions in Machines tools, Calculation of machining times for turning, External relief, Chamfer, Knurling, Forming, Facing, Drilling, Boring, Undercutting, Shaping, Planning, Slotting, Broaching, Sawing, Milling, Grinding, Threading and Tapping. Machine tool drives, Hydraulic transmission, mechanical transmission, different types of driving mechanisms used in machine tools, requirements of machine tool design, Engineering design process applied to Machine Tools,
Unit 2	Regulation of Speed and Feed Rates in Machine Tools: Speed and feed rates regulation, design of speed box, design of feed box, Machine tool drives in multiple speed motors, special cases, gearing diagram, determination of number of teeth.
Unit 3	Design of Machine Tool Structures: Materials of machine tool structures, Design criteria for machine tool structures, Materials of machine tool structures, Static and Dynamic stiffness, Profiles of Machine Tool Structures, Basic design for procedure of Machine Tool Structures, Design of beds, columns, housings, bases and tables, Model technique in design of machine tool structures
Unit 4	Design of Guide ways, Power screws and spindles: Functions and types of guide ways, Design of slideways, design criteria and calculations for slideways, guideways operating under liquid friction conditions, design of aerostatic slideways, design of anti-friction guideways, combination guide ways, protecting devices of slide ways, design of power screws, design calculations of spindles. Antifriction bearings and sliding bearings, stability of machine tools, forced vibrations of machine tools
Unit 5	Numerical Control of Machine Tools: Fundamental Concepts, Classification and Structures of Numerical Control Systems, Manual Part Programming, Computer Aided Part Programming, Distributive Numerical Control, Computer Numerical Control, Machining Centres, CNC Programming.

MEPEC5108: Computer Aided Optimization		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Formulate optimal problems, address engineering optimization challenges, and apply a variety of single-variable optimization algorithms.
CO2	Proficiently utilize multivariable optimization algorithms.
CO3	Analyze constrained optimization methods aided by computer programs for real-world problem-solving.
CO4	Apply special optimization methods with practical computer program implementation across diverse applications.
CO5	Implement optimization strategies within Operations Research, encompassing linear programming, execution of the simplex method, and utilization of artificial variable techniques.

Detailed Syllabus:

Unit 1	Introduction: Optimal problem formulation, engineering optimization problems, optimization algorithms. Single Variable Optimization Algorithms: Optimality criteria, bracketing methods, region elimination methods, point estimation methods, gradient based methods, root finding using optimization techniques.
Unit 2	Multivariable Optimization Algorithms: Optimality criteria, unidirectional search, direct search methods, gradient based methods, Computer programs on above methods.
Unit 3	Constrained Optimization Algorithms: Kuhn-Tucker conditions, transformation methods, sensitivity analysis, direct search for constrained minimization, linearized search techniques, feasible direction method, generalized reduced gradient method, gradient projection method, Computer programs on above methods.
Unit 4	Special Optimization Algorithms: Integer programming, Geometric programming, Genetic Algorithms, Simulated annealing, global optimization, Computer programs on above methods.
Unit 5	Optimization in Operations Research: Linear programming problem, simplex method, artificial variable techniques, dual phase method, sensitivity analysis

MEPEC5109: Engineering Economics		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Implement the knowledge of economics to the production engineering
CO2	Evaluate investment opportunities using engineering economy factors
CO3	Perform a replacement study considering inflation and indirect cost allocation
CO4	Estimate the cost of component and total cost of operation
CO5	Perform breakeven analysis and profitability analysis under different conditions.

Detailed Syllabus:

Unit 1	Engineering Economics and Estimation: The principle and use of economic analysis in engineering practice. Discounted cash flow analysis, corporate tax and investment, Depreciation and economic studies, replacement analysis, valuation of assets. Estimating: Importance and aim, objectives, functions, Estimating Procedure, Constituents of Estimation. Concept of direct tax, indirect tax as GST.
Unit 2	Depreciation & break-even analysis: Introduction, purpose, methods for calculating depreciation-straight line method, diminishing balance method, sum of year digit method, machine hour basis method. Break even analysis: Introduction, assumptions in break-even analysis, important terms and definitions, calculation of breakeven point, advantages and limitations.
Unit 3	Economic analysis of projects: analysis of risks and uncertainty, elements of demand analysis and forecasting, production function, output and pricing decisions Comparison of Alternative Proposals: Formulating alternatives, Bases of comparison- present worth amount, annual equivalent amount, future worth amount, rate of return, Defining mutually exclusive alternatives, Decision criteria for selection of investment proposals, Comparison of alternatives with unequal service life, Sensitivity analysis
Unit 4	Costing: Definition, aims, procedure for Costing, types of costs, Costing controls, Control of Costs, Profit and Pricing Policy. Costing methodology for raw materials, Products and Services, Nature of Costs-Direct, Traceable and Non traceable. Determining of Cost of manufactured products, methods of overhead allocation
Unit 5	Corporate Planning: Corporate objectives, goals and policies, process of corporate planning, SWOT analysis, GAP analysis, strategy formulation, investment evaluation, capital budgeting, industrial dynamics, Business case development.

MEPEC5110: Computer Integrated Manufacturing		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Proficiency in analyzing the computer integrated manufacturing
CO2	Utilize the knowledge of database networking for manufacturing.
CO3	Competency in accounting the measures and evaluation of CIM systems
CO4	Develop the ability of Planning & Implementation of CIM

Detailed Syllabus:

Unit 1	Introduction to CAD, CAM and CIM: Manufacturing Planning, Manufacturing control- Introduction to CAD/CAM, Concurrent Engineering-CIM concepts, Computerized elements of CIM system, Types of production, Manufacturing models and Metrics, Mathematical models of Production Performance, Simple problems, Manufacturing Control, Simple Problems, Basic Elements of an Automated system, Levels of Automation, Lean Production and Just-In-Time Production.
Unit 2	Integration of Manufacturing: Integration of manufacturing activities and operations, CIM architecture, various models, CAD-CAM integration, CAPP, Automatic inspection systems, use of CMM, application of principals of Artificial Intelligence (AI) and expert systems to CAPP
Unit 3	DBMS in CIM: Data base management system in CIM, data acquisition, factory data collection system, data processing, data distribution, database file structure, organization and control, data structure models (hierarchical, network, relational and three schemes). Use of internet in manufacturing and business functions, E-commerce and future trends.
Unit 4	Economics of CIM: Strategic benefits of CIM and accounting measures, evaluation of CIM systems, breakeven analysis, return on investment in the context of CIM, CIM feasibility analysis. socio-techno economic aspects of CIM.
Unit 5	Planning & Implementation of CIM: Key aspects of planning and implementation, process management considerations. Various phases and steps in CIM implementation. Interfacing of computers to real life system such as machine tools, robots and other handling devices such as AGV, RGV and storage system

MEPEC5111: Materials and Logistics Management		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Decide material policies and planning in industry
CO2	Execute purchase policies and procurement and vendor development
CO3	Implement buying procedures, running contract and store procedures
CO4	Analyze various inventory models and execute logistic decisions

Detailed Syllabus:

Unit 1	Material Management: Concepts, objective and scope, organizing for materials function, various administrative practices. Interaction with production and sales, material management planning and budgeting, various techniques, ABC analysis, standardization and codification, make and buy decision
Unit 2	Purchasing Scheme: Purchasing system, ordering, post purchase activity, price forecasting and analysis, purchasing under uncertainty vendor development and evaluation, purchase negotiation and pricing, purchasing of capital equipment tendering, purchase aerosol lease, import substitution, import regulations and procedure, legal aspects of purchasing
Unit 3	Public Buying and Stores Management: Buying procedure related to various governmental organizations like DGS and D registration of suppliers, rate and running contracts, indenting procedure Purchase of stores location and layout, various types of stores, stores procedures, stores accounting and stock checking management of scrap, obsolete, damage and unwanted stocks.
Unit 4	International Buying and Import Purchasing: Import procedures and documents, categories of import, import duties, basics of licensing, Import purchasing procedures, Registration of licenses at port
Unit 5	Logistics Management and Inventory: Genesis of logistics-logistics decision on facility location, need for inventory and its control, types of inventories, cost of inventory, determination of safety stock, EOQ, Q system or re-order point system, P system or replenishment system, S policy, store keeping and inventory control

MEPEC5112: Facility Planning and Material Handling Systems		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Assess the value of facility planning on the strategy of a firm
CO2	Develop a systematic plant layout
CO3	Articulate the environmental and economic aspects in facility planning
CO4	Interpret various material handling systems
CO5	Contrasting different conveying machinery industry

Detailed Syllabus:

Unit 1	Design and Layout: Design of layout of factories, Office, Storage area etc. on consideration of facility of working people, Storage facilities and general equipment for amenities of working people – Product, Process and combination layout – Systematic layout planning, Design of Assembly lines, Line balancing methods.
Unit 2	Computer applications in layout designs, ALDEP, CORELAP, CRAFT, BLOCPLAN, etc. Warehouse operations: function, storage operations. Manufacturing operation: JIT, TQM, AM, CIM, SCM, Facility systems, Quantitative models: Layout model, waiting line, AS/RS, simulation model, etc. Environmental aspects like lighting, Ventilation, dust control, humidity. Different type of Plant services like steam compressed air etc. Plant safety, Elements off Industrial safety- Causes and prevention of accidents – Pollution and environmental consideration.
Unit 3	Material handling systems: Material Handling principles, Classification of Material Handling Equipment, Relationship of material handling to plant layout.
Unit 4	Components of material handling: Flexible hoisting appliances - fastening methods - Load handling attachments – Classification of hooks, forged - eye hook - Appliances for suspending hooks- crane grab for unit and piece loads- electric lifting magnet - vacuum lifter - Grabbing attachment for loose materials - crane attachment for handling liquids - Arresting gear – brakes - construction - working - electromagnetic shoe brakes - construction - use - thruster operated shoe brakes - control brakes
Unit 5	Conveying machinery: Traction type conveyors - Working - belt conveyors- chain conveyors-bucket elevators- escalators Working of traction less type conveyors - gravity type conveyors, vibrating and oscillating conveyors, screw conveyors - pneumatic - hydraulic conveyors – hoppers - gates and feeders - Surface transport equipment - functions - working of trackless equipment - hand operated trucks - powered trucks - tractors, AGV (Automatic Guided Vehicle) - industrial trailers - functions - working - cross handling equipment – winches – capstans – turntables - transfer tables - monorail conveyors.

MEPEC5113: Reliability Engineering		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will be able to

Course Outcomes	
CO1	Infer reliability technique and its execution.
CO2	Carry out decision making process using event tree analysis and other methods
CO3	Explain methods of reliability analysis in life cycle cost
CO4	Analyze FMEA procedure to solve a product development problem

Detailed Syllabus:

Unit 1	Introduction to Reliability: Applications to engineering, discussions on Reliability failure rate, Patterns of Failure Distribution and Bathtub curve, Failure data collection and life estimation and Monte Carlo simulation of cumulative probability of failure of consistent components.
Unit 2	Reliability Methods: Survival probabilities of various systems having subsystems in series, parallel or combined configuration, Assessment of overall reliability by various methods: - Star Delta, set theory, Conditional Probability, Matrix Method, Event Tree Analysis, Allocation of Reliability through programming and other algorithms, through proper appointment of unreliability's, AGREE, ARINC and other methods
Unit 3	Reliability in Engineering Design: Carter's concept of reliability, and Safety Margin in a structural mechanical design, Hazard Analysis through RPN & Graph theory, Through stacking of dimensional tolerance, Reliability Effort Function, Reliability, Availability, Maintainability and Safety (RAMS), Life Cycle Cost – algorithms, mathematical models & nomograms, Non-Parametric Analysis: Mean and Median Ranking Statistics
Unit 4	Accelerated Method of Reliability Testing: Variable, attribute and K Statistic, Truncated Test, Reliability Centered Maintenance (RCM): Predictive Preventive Maintenance, Diagnostic Techniques used in PPM, Condition Monitoring leading to CBM, HUM
Unit 5	Failure Modes and Effect Analysis (FMEA), Failure Modes, Effects and Criticality Analysis (FMECA)

MEPEC5114: Sustainability in Materials and Design		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	20 Marks
Credits: 03	ISE II	20 Marks
	End Semester Examination	60 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Comparative analysis of product sustainability
CO2	Analysis and use of LCA for material selection
CO3	Understanding and analysis of carbon footprints of various materials
CO4	Selection and use materials for sustainable development

Detailed Syllabus:

Unit 1	Introduction to Sustainability: Sustainability Manufacturing, Product Sustainability, Introduction to GaBi, Introduction to Life cycle analysis, Global sustainability standard.
Unit 2	Carbon footprint analysis: calculation of carbon footprint, Materials for environment, Life cycle analysis of ecofriendly materials
Unit 3	Green supply chain: Sustainability through unit process and enterprise level, Design for disassemble, Product design for better environment, Numerical on Product design.
Unit 4	Sustainable smart materials: green machining and numerical, Material selection with life cycle analysis, Sustainable smart manufacturing with Industry 4.0 approach
Unit 5	Sustainability with additive manufacturing: Sustainable ergonomics, Minimum level lubrication (MQL) sustainability, Numerical on LCA of PET bottle, Cement etc.

MEVSE5101: Mini Project – I		
Teaching Scheme	Examination Scheme	
Practical: 04 Hrs. / Week	ISE II	25 Marks
Credit: 02	ESE	25 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Illustrate industrial project / in-house project
CO2	Identify industrial problems / in-house
CO3	Integrate and apply the knowledge gained through different courses into practical problems
CO4	Prepare a consolidated report

Detailed description:

1. Student shall identify and collect pragmatic industrial information / in-house project / social problem as a Mini Project – II.
2. Student shall obtain a solution by applying suitable techniques.
3. Student has to exhibit the continuous progress review through regular reporting and presentations (at least two during semester) and proper documentation of the frequency of the activities. The continuous assessment of the progress needs to be documented unambiguously. Progress will be monitored by an evaluation committee consisting of guide, two faculty appointed by the BoS / Head of Department / BoS Chairman.
4. The candidate shall submit the report on Mini Project – II in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on work undergone, content delivery, presentation skills, documentation and report.
6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Assessment:

ISE II- Continuous Assessment of individual student

Maximum Marks-25

ESE – Viva Voce based on presentation and report.

CO3	1	1	1	3	1
CO4		3		1	

1 – Low, 2 – Medium, 3 – High

MEAEC5101: Technical Communication		
Teaching Scheme	Examination Scheme	
Lectures: 03 Hrs. / Week	ISE I	10 Marks
Credits: 02	ISE II	10 Marks
	End Semester Examination	30 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Understand the nature and objective of Technical Communication relevant for the work place as Engineers.
CO2	Utilize the technical writing for the purposes of Technical Communication and its exposure in various dimensions
CO3	Enhance confidence in face of diverse audience.

Detailed Syllabus:

Unit 1	Fundamentals and Forms of Technical Communication: Technical Communication: Features; distinction between general and technical communication; language as a tool of communication; dimensions of communication; reading and comprehension; technical writing (sentences, paragraphs, technical style, definition, types and methods); flow of communication (downward, upward, lateral/horizontal); barriers to communication; technical reports; thesis/project writing; synopsis writing; technical research paper writing; seminar and conference papers; keynote speech; expert technical lecture; 7 Cs of effective business writing (concreteness, completeness, clarity, conciseness, courtesy, correctness and consideration).
Unit 2	Technical Presentation and Professional Communication Skills: Technical presentation: strategies, techniques and forms; interpersonal communication; classroom presentation; presentation style and methods; individual conferencing; public speaking: methods and techniques; clarity of substance, emotion and humour; modes of presentation; overcoming stage fear; audience analysis and audience engagement; audience participation through quizzes and interjections; interview skills; group discussion: objectives and methods; seminar and conference presentation skills; focus, content and style; argumentation skills; analysis, cohesion and emphasis; critical thinking; exposition, narration and description.
Unit 3	Advanced Communication Skills, Kinesics and Voice Dynamics: Effective business communication competence; grammatical competence; discourse competence; socio-linguistic competence; strategic competence; solving communication problems using verbal and non-verbal communication; kinesics: definition, importance and features of body language; voice dynamics: voice modulation, quality, pitch, rhythm, intonation, pronunciation, articulation, stress and accent; linguistic features of voice control; vowel and consonant sounds.

Text and Reference Books

1. Technical Communication – Principles and Practices by Meenakshi Raman & Sangeeta Sharma, Oxford Univ. Press, 2007, New Delhi.
2. Business Correspondence and Report Writing by Prof. R.C. Sharma & Krishna Mohan, Tata McGraw Hill & Co. Ltd., 2001, New Delhi.
3. Practical Communication: Process and Practice by L.U.B. Pandey; A.I.T.B.S. Publications India Ltd.; Krishan Nagar, 2014, Delhi.
4. Modern Technical Writing by Sherman, Theodore A (et.al); Apprenrice Hall; New Jersey; U.S.
5. A Text Book of Scientific and Technical Writing by S.D. Sharma; Vikas Publication, Delhi.
6. Skills for Effective Business Communication by Michael Murphy, Harward University, U.S.
7. Business Communication for Managers by Payal Mehra, Pearson Publication, Delhi.

MEOEC6104: Open Elective – I (Additive Manufacturing)		
Teaching Scheme	Examination Scheme	
Lectures: 02 Hrs. / Week	ISE I	10 Marks
Credits: 02	ISE II	10 Marks
	End Semester Examination	30 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Understand the concept of additive manufacturing and evaluation of its process sequence
CO2	Understand the materials required for AM and its molecular structures
CO3	Apply the knowledge of software tools for additive manufacturing
CO4	Develop the 3D component using additive manufacturing process

Detailed Syllabus:

Unit 1	Fundamentals of Additive Manufacturing, Design and Materials: Introduction to Additive Manufacturing (AM); overview of AM; reverse engineering; traditional manufacturing vs. AM; CAD, CAM and AM integration; AM process chain; direct and indirect AM processes (rapid prototyping, rapid tooling, rapid manufacturing, indirect prototyping, indirect tooling and indirect manufacturing); software technologies and tools; design and fabrication processes; data sources; software tools; file formats; model repair and validation; pre-processing and post-processing; design for additive manufacturing (DfAM); materials for AM; multiple, multifunctional and graded materials; solidification rate; non-equilibrium structures; structure–property relationships; grain structure and microstructure.
Unit 2	Additive Manufacturing Technologies and Process Planning: Powder-based AM processes: selective laser sintering (SLS), selective laser melting (SLM), electron beam melting (EBM) and related processes; printing processes; droplet-based 3D printing; solid-based AM processes; extrusion-based fused deposition modelling (FDM); stereolithography (SLA); micro- and nano-additive manufacturing; selection of AM technologies; decision-making methods; process planning; build strategies; post-processing techniques; monitoring and control of defects; process control and transformation.
Unit 3	Applications and Emerging Trends in Additive Manufacturing: Applications of AM in aerospace, automotive and biomedical engineering; AM in product development and rapid product realization; commercialization of AM; industrial implementation; recent advances; sustainability; challenges; trends and future directions in additive manufacturing.

MEEEM6101: Entrepreneurship Skills (Entrepreneurship Course)		
Teaching Scheme	Examination Scheme	
Lectures: 02 Hrs. / Week	ISE I	10 Marks
Credits: 02	ISE II	10 Marks
	End Semester Examination	30 Marks

Course Objectives:

1. Interpreting information about support systems, skill sets, financial and risk covering institutions and other for building an enterprise so that a budding entrepreneurs can make right decisions for starting and running a venture.
2. Articulating the entrepreneurial process of creating new businesses, role of Creativity and innovation in Entrepreneurial start-ups
3. Preparing a context of social innovation and social entrepreneurship and issues and practices of financing entrepreneurial businesses., and live cases of social, techno, women entrepreneurs

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Articulate the value proposition of an Entrepreneurial venture.
CO2	Evaluate a business plan to determine if it is complete and of investment grade;
CO3	Demonstrate key entrepreneurial leadership qualities
CO4	Determine the competitiveness of their business versus direct competitors by creating a competitive matrix

Detailed Syllabus:

Unit 1	Introduction to Entrepreneurship. Business ideas, Development of a Business plan
Unit 2	Establishing a small-scale enterprise, Functional strategies for new business, Overview of financial markets – Meaning and scope
Unit 3	Social entrepreneurship, Sustainability of non-profit organizations, Financing and risks in social enterprises, Business Strategies and Scaling up
Unit 4	Entrepreneurial Management, managing growth, expansion and winding up of business, Valuation of a new company, corporate entrepreneurship, Entrepreneurship in the era of Globalization: Environment and Strategy
Unit 5	Entrepreneurship, Creativity and Innovation, Centre of Innovation, Incubation and Entrepreneurship- An expert Interview, Entrepreneurship: Role of stimulating creativity, Creative teams and managerial responsibilities, Innovation and entrepreneurship: types and sources of innovation, Creativity and Innovations in Start Ups, Start-up Case Studies

MEEEM6103: Industrial Management (Management Course)		
Teaching Scheme	Examination Scheme	
Lectures: 02 Hrs. / Week	ISE I	10 Marks
Credits: 02	ISE II	10 Marks
	End Semester Examination	30 Marks

Course Objectives:

1. Provide an overview of the principles, concepts, and importance of industrial management in modern business environments.
2. Examine techniques for maintaining and improving product and service quality.
3. Develop skills in formulating and implementing strategic plans for industrial organizations to achieve long-term objectives and stay competitive in the market.
4. Provide an overview of the role and importance of Management Information Systems in modern organizations, including their impact on decision-making, efficiency, and competitive advantage.
5. Introduce students to the fundamental concepts, theories, and models that underlie human resource development, including adult learning principles, organizational development, talent management, and performance improvement.

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Understanding of fundamental concepts and theories related to industrial management.
CO2	Acquire the ability to analyze complex industrial challenges
CO3	Evaluate methodologies to ensure consistent product quality and process improvement.
CO4	Examining human resources in various industrial setting
CO5	Formulate and implement strategic plans that align with organizational goals and adapt to changing market dynamics.

Detailed Syllabus:

Unit 1	Basics of Management: Introduction, Definition of management, characteristics of management, functions of management - Planning, Organizing, Staffing, Directing, Co-ordination, Controlling, Motivating, Communication, Decision Making, Principles of management – F. W. Taylor, Henry Fayol, Elton Mayo, Administration and management, Nature of management, levels of management, managerial skills, managerial roles, Forms of Organization- Line, Line –staff etc. Forms of ownerships – Partnership, Proprietorship, Joint stock, Co-operative society, Govt. Sector etc., concept of Globalization
Unit 2	Quality Management: Definition of quality, goalpost view of quality, continuous improvement definition of quality, types of quality – quality of design, conformance and performance, phases of quality management, Juran's and Demings view of quality, Quality Management Assistance Tools: Ishikawa diagram – Pareto Analysis – Pokka Yoke (Mistake Proofing).quality circles, TQM, Kaizen, Five S (5S), Six sigma Quality Management Standards (Introductory aspects only)- The ISO 9001:2000 Quality Management System Standard- The ISO 14001:2004 Environmental Management System Standard- ISO 27001:2005 Information Security Management System.

Unit 3	Strategic Management: Military origins of strategy Evolution - Concept and Characteristics of strategic management –Defining strategy – Mintzberg’s 5P’s of strategy – Corporate, Business and Functional Levels of strategy - Strategic Management Process.
Unit 4	Management Information Systems: Concept of data and information, characteristics of information, types of information, Definition of MIS, Need, Purpose and Objectives, Contemporary Approaches to MIS, Components of an information system, need to study information systems, Classification of information systems, Decision-making models, Types of decisions, Decision Support Systems
Unit 5	Human Resource Development (HRM): Objectives of HRM; challenges to HR professionals; role, Responsibilities and competencies of HR professionals; HR department operations; Human Resource Planning - objectives and process; human resource information system. Talent acquisition; recruitment and selection strategies, career planning and management, training and development, investment in training Programme; executive development.

INIKS5101: Vedic Approach to Mathematics		
Teaching Scheme	Examination Scheme	
Lectures: 2 Hrs. / Week	ISE I	10 Marks
Credits: 2	ISE II	10 Marks
	End Semester Examination	30 Marks

Course description: This course is planned as Ability enhancement course. It is an exposure to the engineering students about Vedic Mathematics. Vedic Mathematics is a collection of Techniques/Sutras to solve mathematical arithmetic in easy and faster way. It consists of 16 Sutras (Formulae) and 13 sub-sutras (Sub Formulae) which can be used for problems involved in arithmetic, algebra, geometry, calculus, conics. By using Vedic Mathematics, the problems are solved mentally with the use of few or some of steps which increase accuracy and reduce mistakes. Through the application of the sutras, it ensures both speed and accuracy and enhances computational skills. In this course some of the topics from Vedic Mathematics are introduced which are use full to Engineering Students.

Course Objectives:

1. Multiply two- or three-digits numbers.
2. Compute the division by two- and three-digit divisors.
3. Check the divisibility by two- or three-digit numbers without actual division.
4. Evaluate square, cubes, square roots and cube roots of larger numbers within no time.
5. To factorize the quadratic expressions of single variable.
6. To find the Solution of Linear Simultaneous Equations.

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Do multiplication and division of two- and three-digit numbers by applying Sutras in Vedic Mathematics.
CO2	To factorize and find LCM/HCF of numbers by applying Sutras in Vedic Mathematics.
CO3	To solve Simultaneous Linear Equations by applying Sutras in Vedic Mathematics.

Detailed Syllabus:

Unit 1	Multiplication: 1. Ekadhikenpurven method (multiplication of two numbers of two digits) 2. Eknunenpurven method (multiplication of two numbers of three digits) 3. Urdhvatiragbhyam method (multiplication of two numbers of three digits) 4. Nikhilam Navtashchramam Dashtaha (multiplication of two numbers of three digits)
Unit 2	Division and Divisibility: Part A: Division 1. Nikhilam Navtashchramam Dashtaha (two digits divisor) 2. Paravartya Yojyet method (three digits divisor) Part B: Divisibility 1. Ekadhikenpurven method (two digits divisor) 2. Eknunenpurven method (two digits divisor)
Unit 3	Factorisation /LCM/HCF

Unit 4	Solution of Linear Simultaneous Equations: Simple equations, Simultaneous Simple Equations, Quadratic Equations, Cubic Equations, Simultaneous Quadratic Equations.
Unit 5	Power and Root Power: (i) Square (two-digit numbers), (ii) Cube (two-digit numbers). (iii) Square root (four-digit number) (iv) Cube root (six digit numbers) [Self Study and assignments]

CO2					2
CO3					2

1 – Low, 2 – Medium, 3 – High

MEDIS6101: Dissertation – I		
Teaching Scheme	Examination Scheme	
Practical: 16 Hrs. / Week	ISE II	100 Marks
Credit: 08	ESE	100 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Identify a practical problem from industry or research problem
CO2	Review literature to identify gaps and define objectives & scope of the work to decide the problem definition
CO3	Interpret the problem

Detailed description:

1. Dissertation – I is an integral part of the dissertation work. In this, the student shall complete the preliminary work of the dissertation which will consist of problem statement, literature review, scheme of implementation, Layout and Design of the Set-up. The student is expected to complete the dissertation at least up to the design phase.
2. The candidate has to exhibit the continuous progress through regular reporting and presentations (at least three during semester) and proper documentation of the frequency of the activities. The continuous assessment of the progress needs to be documented unambiguously. Progress will be monitored by an evaluation committee consisting of guide, two faculty appointed by the BoS / Head of Department / BoS Chairman.
3. The candidates have to validate their work undertaken by submitting and/or publishing it at standard platforms – conference and/or peer reviewed journal.
4. The candidate shall submit the report of dissertation – I in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on literature study, work undergone, content delivery, presentation skills, documentation and report.
6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Assessment:

ISE II- Continuous Assessment of individual student

Maximum Marks-100

ESE – Viva Voce based on presentation and report

Maximum Marks-100

Assessment Pattern:

Knowledge Level	ISE II	ESE
Preparation S1	10	10
Literature analysis and summarization of Results S3	50	50
Record and Articulation S4	20	20
Mini project / Presentation / Viva Voce S3	20	20
Total Marks	100	100

Mapping of Course Outcomes with Program Outcomes:

Outcomes	PO1	PO2	PO3	PO4	PO5
CO1	2	1	2	2	2
CO2	2	2	2	2	2
CO3	2	2	2	3	1

1 – Low, 2 – Medium, 3 – High

MEDIS6102: Dissertation – II		
Teaching Scheme	Examination Scheme	
Practical: 24 Hrs. / Week	ISE II	150 Marks
Credit: 12	ESE	150 Marks

Course Outcomes:

After completing the course students will able to

Course Outcomes	
CO1	Implement suitable research methodology
CO2	Carryout experimentation responsibly and ethically
CO3	Evaluate data and evidence of work
CO4	Synthesize and write the project work

Detailed description:

1. In Dissertation – II, the student shall consolidate and complete the remaining part of the dissertation which will consist of selection of research methodology, installations, implementations, testing, results, measuring performance, discussions using data tables considered for the improvement with existing / known algorithms / systems, comparative analysis, characterization and validation of results and conclusions.
2. The candidate has to exhibit the continuous progress through regular reporting and presentations (at least three during semester) and proper documentation of the frequency of the activities. The continuous assessment of the progress needs to be documented unambiguously. Progress will be monitored by an evaluation committee consisting of guide, two faculty appointed by the BoS / Head of Department / BoS Chairman.
3. The investigations and findings need to be validated appropriately at standard platforms one at conference and other in peer reviewed journal.
4. The candidate shall submit the report of dissertation – II in standard format for satisfactory completion of the work, duly approved and certified by the concerned guide, Head of the Department and Principal.
5. The candidate will be assessed during ESE by two examiners, one of whom will be the guide and other is necessarily an external examiner appointed by the BoS / Head of Department / BoS Chairman. The assessment will be broadly based on literature study, work undergone, results and conclusion, contribution, content delivery, presentation skills, documentation and report.
6. For standardization and documentation, it is recommended to follow the formats and guidelines approved by the Board of Studies.

Format for Dissertation Report:

1. The total No. of minimum pages shall not be less than 70.
2. Plagiarism check by standard and approved software is must, and certificate shall be enclosed with the report.

3. Three report copies, loosely bound, shall be submitted in the department, one for examiner, one for supervisor and one for department.
4. The report shall be both side print hard bound. A hardbound report shall be made after examination by completing the examiner and guide's expected correction, before that report must be loosely bound.
5. For standardization of the reports the following format shall be strictly followed.
 - Page size: A4
 - Top Margin: 1"
 - Bottom Margin: 1"
 - Left Margin: 1.5"
 - Right Margin: 1.5"
 - Para Text: Times New Roman 12-point font
 - Line Spacing: 1.5 Lines
 - Page Numbers: Right aligned at footer. Font 10-point Times New Roman
 - Headings: 14-Points, Times New Roman, Boldface.

Index of Report

1. Title Sheet
2. Certificate (Institution) as per standard format. Certificate shall have signatures of Guide, External Examiner, HoD and Principal.
3. Certificate (Company, if sponsored by company)
4. Undertaking by candidate as per standard format
5. Acknowledgement
6. Table of Contents
7. List of abbreviations
8. List of Figures
9. List of Photographs / Plates
10. List of Tables
11. Abstract of the Dissertation
12. Introduction
13. Literature Survey / Theory
14. Design / Experimentation / Fabrication / Production / Actual work carried out for the same
15. Observation, Results Analysis and validation
16. Conclusion
17. References
18. List of papers published
19. Plagiarism check report

MEINT6101: Internship/ On Job Training		
Teaching Scheme	Examination Scheme	
Practical: 20 Hrs. / Week	ISE I	50 Marks
Credit: 10	ISE II	100 Marks
	ESE	150 Marks

Course Outcomes:

CO1	Observe & experience the practices, processes and work culture of the industry
CO2	Apply engineering concepts to solve the problems
CO3	Develop employability skills and attitude

Course Description: Industrial training (In-Plant Training / Internship) refers to work experience done during the program of study that is relevant to professional development prior to graduation. The training will provide an industrial exposure to the students and opportunity to develop as per the expectations and requirement of industry giving a good start of the career.

The students shall study the technology, processes, practices and work culture in the industry during the training. They shall also work on the project, if allotted. A Professor from the institute and one mentor from the industry will guide the students. The training period will be of minimum 90 working days.

ISE I, II and III: The evaluation is done through reviews. The student has to present his work during the internship. Every candidate has to give a presentation in presence of faculty members and students. The Head of the department will appoint two internal examiners to assess the term work; guide shall be one of the examiners. The student has to prepare typed report of about 25 pages or more, on the work carried out in the respective industry.

Mapping of Course outcome with Program Outcomes:

Program Outcome	1	2	3	4	5	6	7	8	9	10	11	12	PSO1	2	3
